

# CONTENTS

I. General Considerations . . . . .	1
A. Reactivity of Functional Groups on Polymers (T. ALFREY, JR.) . . . . .	
1. Introduction . . . . .	2
2. Concerted Nucleophilic Displacement Reactions (and Related Polar Reactions) . . . . .	7
3. Free Radical Chain Reactions . . . . .	10
B. Effect of Group Interactions on Reactivity (H. MORAWETZ) . . . . .	
1. Introduction . . . . .	11
2. Reaction Equilibria . . . . .	11
a. Ionization Equilibria . . . . .	11
b. Chelate Formation . . . . .	14
c. Other Reaction Equilibria . . . . .	16
3. Rates of Reaction . . . . .	17
a. Electrostatic Effects on the Reactivity of Polyions . . . . .	17
b. Specific Effects of Neighboring Groups . . . . .	24
c. Catalytic Effects of Non-Neighboring Groups . . . . .	42
C. Effect of Morphology on Reactivity (LEON SEGAL) . . . . .	44
1. Introduction . . . . .	44
2. Cellulose . . . . .	46
a. General Considerations . . . . .	46
b. Reactivity of Cellulose . . . . .	50
3. Polymers Other than Cellulose . . . . .	69
a. General Considerations . . . . .	69
b. Poly(ethylene Terephthalate) . . . . .	70
c. Polyethylene . . . . .	71
D. Reaction of Polymeric Functional Groups (G. J. SMETS) . . . . .	74
1. Monofunctional Chemical Reactions . . . . .	75
2. Polyfunctional Chemical Reactions . . . . .	79
3. Stereoisomerism of the Polymeric Chain . . . . .	91
4. Site of Reaction . . . . .	96
References . . . . .	98
II. Reactions of Unsaturated Polymeric Hydrocarbons . . . . .	107
A. Isomerization (M. A. GOLUB) . . . . .	107
1. Isomerization in Polymers . . . . .	107
2. Isomerization of Polymers . . . . .	110
a. Cyclization Processes . . . . .	110
b. Double Bond Shifts . . . . .	111
c. <i>cis-trans</i> Isomerization . . . . .	116

B. Cyclization (J. SCANLAN)	125
1. Introduction	125
2. Structure of Cyclized Rubber	125
3. Kinetics of Cyclization	129
C. Addition of Thiols (G. E. MEYER, L. B. TEWKSBURY, and R. M. PIERSON)	133
1. Introduction	133
2. Mechanism of Addition	133
3. Addition of Alkanethiols	135
4. Introduction of Reactive Groups	139
5. Isomerization by Thiols	140
6. Plasticization of Elastomers by Thiols	141
D. Halogenation (PETER J. CANTERINO)	142
1. Chemistry of the Chlorination Process	142
a. Natural Rubber	142
b. Synthetic Polymers	146
c. Hydrohalogenation	149
2. Manufacture and Uses	149
a. Chlorinated Rubber	149
b. Rubber Hydrochloride	150
E. Epoxidation (FRANK P. GREENSPAN)	152
1. Epoxidation Reactions	152
a. Air Oxidation	152
b. Hypochlorous Acid	152
c. Hydrogen Peroxide and/or Peracids	152
d. Organic Peracid	153
2. Epoxidation of Polymers	156
a. Epoxidation of Polybutadiene by Preformed Peracetic Acid Method	158
b. Epoxidation of Polybutadiene by <i>In situ</i> Method	159
3. Chemistry of Epoxidized Polymers	159
a. Structure	159
b. Reactions	164
4. Properties of Epoxidized Polymers	166
a. Physical Properties	166
b. Electrical Properties	167
5. Applications of Epoxidized Polymers	168
a. Surface Coatings	171
b. Reinforced Plastics	171
c. Modification of Rubber	171
d. Adhesives	172
F. Hydrogenation (JOHN WICKLATZ)	173
1. Introduction	173
2. Hydrogenation Processes	175
a. Destructive Hydrogenation	176
b. Nondestructive Hydrogenation	178
3. Factors Affecting Hydrogenation	180
a. Reaction Temperature	181

b. Reaction Pressure . . . . .	183
c. Catalyst . . . . .	183
d. Polymer Composition . . . . .	186
4. Properties of Hydrogenated Products . . . . .	187
a. Degree of Hydrogenation . . . . .	187
b. Reaction Temperature . . . . .	190
c. Molecular Weight . . . . .	191
5. Microstructure of Hydrogenated Products . . . . .	191
a. Stereoregular Polymers . . . . .	191
b. Random Diene Polymers . . . . .	192
G. Reagents with Multiple Bonds (J. LE BRAS, R. PAUTRAT, and C. PINAZZI) . . . . .	194
1. Relation between Structure and Elasticity . . . . .	194
2. Reactions Altering the Polyisoprene Chain . . . . .	196
3. Structure and Reactivity of Rubber . . . . .	197
a. Radical Reactions . . . . .	197
b. Polar Additions . . . . .	201
4. Addition of Ethylenic Compounds to Rubber and Analogous Polymeric Dienes . . . . .	202
a. Addition of Maleic Anhydride or N-Methylmaleimide . . . . .	203
b. Extension to Polymeric Dienes with Analogous Structure . . . . .	209
c. Properties and Preparation of Maleic Rubbers . . . . .	210
d. Reactions of Other Ethylenic Compounds with Rubber . . . . .	214
5. Reactions of Carbonyl Reagents with Rubber . . . . .	219
a. Formaldehyde . . . . .	221
b. Glyoxal . . . . .	223
c. Chloral . . . . .	226
6. Conclusions . . . . .	231
References . . . . .	233
III. Reactions of Saturated Polymeric Hydrocarbons (Giffin D. Jones). . . . .	247
A. Polyolefin Substitution . . . . .	247
1. General Considerations . . . . .	247
a. Physical Factors . . . . .	247
b. Ionic Processes . . . . .	249
c. Free Radical Processes . . . . .	250
d. Fluorination . . . . .	255
2. Halogenation of Polyethylene . . . . .	257
a. Fluorination . . . . .	257
b. Chlorination . . . . .	258
3. Halogenation of Other Aliphatic Polymers . . . . .	261
a. Halogenation of Polypropylene and Polyisobutylene . . . . .	261
b. Chlorination of Poly(vinyl Chloride) . . . . .	262
4. Chlorosulfonation . . . . .	263
5. Other Chain Reactions Involving Halogen . . . . .	266
a. Chlorocarbonylation . . . . .	266
b. Phosphorylation . . . . .	267

6. Poly(vinyl Chloride) Reactions . . . . .	268
7. Oxidation of Polyolefins . . . . .	269
8. Reaction of Polyethylene with Sulfur . . . . .	271
B. Side Chain Substitution of Polyvinylaromatics . . . . .	273
1. Oxidation . . . . .	273
2. Halogenation . . . . .	273
C. Nuclear Substitution of Polyvinylaromatics . . . . .	274
1. Chloromethylation . . . . .	274
2. Alkylation . . . . .	276
3. Amine Derivatives of Chloromethylated Polystyrene . . . . .	276
4. Sulfonium Derivative of Chloromethylated Styrene Polymers . . . . .	277
5. Thiol Derivative . . . . .	279
6. Acylation . . . . .	279
7. Sulfonation . . . . .	280
8. Nitration . . . . .	283
9. Amino Aromatic Polymers . . . . .	284
10. Phenolic Aromatic Polymers . . . . .	285
11. Metallation . . . . .	285
12. Halogenation . . . . .	287
References . . . . .	287
IV. Addition Polymers with Reactive Terminals (R. H. GOBRAN)	295
A. General Introduction . . . . .	295
B. Terminally Reactive Polymers Prepared by Free Radical Mechanism . . . . .	296
1. Introduction . . . . .	296
2. Initiators with Functional Terminals . . . . .	298
a. Hydroxyl Terminals . . . . .	298
b. Carboxyl Terminals . . . . .	299
c. General . . . . .	302
3. Termination in Free Radical Polymerization . . . . .	302
4. Determination of the Termination Mechanism in Radical Polymerizations . . . . .	303
a. Kinetic Method . . . . .	303
b. Endgroup Methods . . . . .	305
c. Coupling Method . . . . .	306
d. Retardation Method . . . . .	307
5. Mode of Termination of Various Monomers . . . . .	308
C. Terminally Reactive Polymers Prepared by Ionic Mechanism . . . . .	309
1. Introduction . . . . .	309
2. Anionic Polymers with "Living" Terminals . . . . .	311
a. Alkali Metal Initiators . . . . .	311
b. Ion Radical Initiators: Use of Sodium Naphthalene or Sodium Biphenyl . . . . .	312
c. Use of Organometallic Initiators . . . . .	313
3. Reactions of "Living" Terminals . . . . .	314
4. Conversion of "Living" Terminals into Functional Endgroups . . . . .	314
a. Hydroxyl Endgroups . . . . .	315

CONTENTS

xiii

b. Carboxyl Endgroups . . . . .	317
c. Terminal Double Bonds . . . . .	317
d. Amine Endgroups . . . . .	317
References . . . . .	317
V. Reactions of Cellulose (KYLE WARD, JR. and A. J. MORAK)	321
A. Introduction . . . . .	321
B. Degradative Reactions . . . . .	322
1. Hydrolysis . . . . .	322
2. Oxidation . . . . .	323
3. Nonoxidative Alkaline Degradation . . . . .	328
4. Other Types of Degradation . . . . .	329
C. Substitution Reactions . . . . .	330
1. Esters . . . . .	330
a. Inorganic Acids . . . . .	331
b. Organic Acids . . . . .	333
2. Ethers . . . . .	339
3. Crosslinking . . . . .	345
4. Miscellaneous Derivatives . . . . .	347
D. Graft Polymers . . . . .	349
References . . . . .	350
VI. Reactions of Proteins (R. E. WHITFIELD and W. L. WASLEY)	367
A. Introduction . . . . .	367
1. General . . . . .	367
2. Multiplicity of Residues: Sequences . . . . .	368
3. Structure of Proteins . . . . .	370
4. Chemical Reactions . . . . .	371
B. Reactions of Side Chain Functional Groups . . . . .	373
1. Nucleophilic Substitution Reactions . . . . .	374
a. General . . . . .	374
b. Alkylation . . . . .	377
c. Acylation . . . . .	380
d. Esterification . . . . .	384
e. Sulfation and Phosphorylation . . . . .	387
f. Guanidylation . . . . .	389
2. Electrophilic Substitution Reactions . . . . .	392
a. Halogenation . . . . .	392
b. Nitration . . . . .	394
c. Diazotization and Coupling . . . . .	396
d. Sulfonation . . . . .	402
3. Addition to Unsaturated Systems . . . . .	403
a. Ketene . . . . .	403
b. Carbonyl Bonds . . . . .	404
c. Olefinic Compounds . . . . .	408
d. Isocyanates and Isothiocyanates . . . . .	410

e. Carbon Suboxide . . . . .	413
f. Carbon Disulfide . . . . .	414
C. Main Chain Reactions . . . . .	415
1. Reactions of Endgroups . . . . .	415
a. $\alpha$ -Amino Endgroups . . . . .	416
b. Carboxyl Endgroups . . . . .	418
2. Hydrolysis and Solvolysis . . . . .	418
a. Steric Effects . . . . .	420
b. Electrical Effects and Neighboring Group Participation . . . . .	426
3. Peptidyl Shift: Nitrogen to Oxygen . . . . .	427
4. Selective Main Chain Cleavages . . . . .	430
a. Tryptophan Peptides . . . . .	432
b. Tyrosine Peptides . . . . .	433
c. Methionine Peptides . . . . .	433
d. Histidine Peptides . . . . .	434
5. Hydrogen-Deuterium Exchange . . . . .	434
D. Crosslink Reactions . . . . .	437
1. General . . . . .	437
2. Experimental Methods . . . . .	438
a. Solubility . . . . .	439
b. Supercontraction . . . . .	439
c. Properties of Single Fibers . . . . .	440
d. Chemical Analysis . . . . .	440
e. Chemical Degradation . . . . .	440
f. Swelling Behavior . . . . .	441
g. Solution Properties . . . . .	441
3. Disulfide Crosslinks . . . . .	441
a. Cleavage Reactions . . . . .	443
b. Disulfide Bond Formation . . . . .	452
4. New Crosslinks in Proteins . . . . .	455
a. Disulfide Expansion . . . . .	455
b. Crosslinks Containing No Sulfur . . . . .	458
E. Graft Polymers of Proteins . . . . .	461
1. Reactions Involving Sulfur . . . . .	461
2. Reactions Involving Amino, Hydroxyl, or Carboxyl Groups . . . . .	464
3. Chemically Modified Proteins . . . . .	473
4. Organosilicon Polymers . . . . .	473
