

## CONTENTS

Space Charge Limited Currents in Polymers . . . . .	1
Donald A. Seanor, Xerographic Materials Section, Business Products Group, Xerox Corporation, Rochester, N.Y.	
Relations between Electron Spin Resonance and Electronic Conductivity in Polymers and Polymer Complexes	26
Paul Ehrlich, Department of Chemical Engineering, State University of New York at Buffalo, N.Y.	
Triboelectrification of Polymers	37
Donald A. Seanor	
Photoconduction in Polymers . . . . .	59
P. J. Reucroft, Department of Metallurgical Engineering and Materials Science, University of Kentucky, Lexington, Ky.	
Dielectric Properties of Polyethylene with Polar Substituents . . . . .	85
William J. MacKnight, Department of Chemistry and Polymer Science and Engineering, University of Massachusetts, Amherst, Mass.	
Drift Mobility Studies in Charge-Transfer Complexes of Poly(N-Vinylcarbazole)	103
A. M. Hermann	
Electrical Conductivity of Elastomeric TCNQ Complexes	
A. M. Hermann	
Semi-Conducting Polymers, TCNQ Salts and High Temperature Superconductivity	
A. Rembaum and R. B. Somoano, Jet Propulsion Laboratory, California Institute of Technology, Pasadena, Calif.	
Complexing and Chemical Stability of Charge-Transfer Complexes in Solution .	165
Morton H. Litt and James W. Summers, Division of Macromolecular Science, Case Western Reserve University, Cleveland, Ohio	
Electrical Properties and Structure of Polymeric Charge-Transfer Complexes	186
James W. Summers and Morton H. Litt
