PREFACE	v
CHAPTER 1. PRINCIPLES OF MOLECULAR SPECTROMETRY	1
1.1 Introduction	1
1.2 Absorption of Radiation by Molecules	1
1.3 Origin of Energy Levels	5
1.4 Spectral Frequencies and Molecular Structure	10
1.5 Intensities of Spectral Peaks	12
References	15
CHAPTER 2. SPECTROMETERS	16
2.1 Principles	16
2.2 Dispersing Device	19
2.3 Infrared Sources	22
2.4 Detectors	23
2.5 Slits and Resolution	24
2.6 Modulator	25
2.7 Attenuator	26
2.8 Electronics	27
2.9 Recording System	27
2.10 Atmosphere	29
2.11 Commercial Models	29
2.12 Operating Conditions	30
2.13 Calibration	33
2.14 Sample Cells	35
References	37
CHAPTER 3. PRELIMINARY SEPARATIONS	38
3.1 Extraction	38
3.2 Differential Solution	41
3.3 Differential Precipitation	42
3.4 Sublimation in Vacuum	42
3.5 Drying	44
3.3 Steam Distillation	44
3.7 Preparative Gas Chromatography	45
3.8 Pyrolysis	47
3.9 Chemical Reaction	50
References	51
CHAPTER 4. SAMPLE PREPARATION	52
4.1 Thickness	52
4.2 Optical Requirements	54
4.3 Sample Preparation Techniques	58
4.4 Pressing in a Heated Mould	58
4.5 The Microtome Technique	61
4.6 Cold Sintering	64
4.7 Suspensions of Powder	60

<b>CHAPTER 4. SAMPLE PREPARATION—<i>contd.</i></b>	
4.8 Films on Reflecting Surfaces . . . . .	70
4.9 Films by Casting from Solution . . . . .	71
4.10 Films of Varying Thickness . . . . .	74
4.11 Spectrometry of Solutions . . . . .	74
4.12 Oriented Samples . . . . .	75
4.13 Surfaces for Reflexion Spectrometry	76
4.14 Samples for Diffusion Spectrometry	76
References . . . . .	77
<b>CHAPTER 5. SPECIAL SPECTROMETRIC TECHNIQUES</b>	79
5.1 Specular Reflexion . . . . .	79
5.2 Diffuse Reflexion . . . . .	82
5.3 Attenuated Total Reflexion . . . . .	85
5.4 Differential Spectrometry (Solutions)	90
5.5 Differential Spectrometry (Solids) . . . . .	93
5.6 Scale Expansion . . . . .	94
5.7 Beam Condensers . . . . .	96
5.8 Polarization Spectrometry . . . . .	97
5.9 Refractive Index . . . . .	100
5.10 Diffusion Spectra . . . . .	109
5.11 Near Infrared Spectrometry . . . . .	113
5.12 Far Infrared Spectrometry . . . . .	116
5.13 Emission Spectra . . . . .	120
5.14 Derivative Spectrograms . . . . .	120
5.15 Ultraviolet Frozen Matrix Spectra . . . . .	123
References . . . . .	124
<b>CHAPTER 6. THE INFRARED IDENTIFICATION OF POLYMERS . . . . .</b>	128
6.1 Suitable Spectra . . . . .	128
6.2 The Comparison and the Functional Approaches	129
6.3 Extensions of the Comparison Approach . . . . .	135
6.4 Spectra of Copolymers and Mixed Polymers . . . . .	137
6.5 Identification of Components . . . . .	138
6.6 Examples . . . . .	138
6.7 References to Spectra . . . . .	144
References . . . . .	145
<b>CHAPTER 7. QUANTITATIVE ANALYSIS</b>	146
7.1 The Beer-Lambert Law . . . . .	146
7.2 The Internal Standard . . . . .	149
7.3 The Base Line . . . . .	151
7.4 Multicomponent Systems . . . . .	155
7.5 Applications . . . . .	157
References . . . . .	158

# CONTENTS

ix

<b>CHAPTER 8. POLYMER STRUCTURE</b> . . . . .	160
8.1 Studies of Reactions . . . . .	160
8.2 Isotope Substitution . . . . .	164
8.3 Dichroism . . . . .	167
8.4 The Hydrogen Bond . . . . .	173
8.5 Stereoisomerism and Crystallinity . . . . .	181
8.6 Model Compounds . . . . .	189
8.7 Symmetry . . . . .	193
8.8 Normal Coordinate Calculations . . . . .	194
References . . . . .	201
<b>CHAPTER 9. APPENDIX—SPECULAR REFLEXION SPECTRA</b>	205
<b>AUTHOR INDEX</b> . . . . .	217
<b>SUBJECT INDEX</b> . . . . .	225
