

CONTENTS

SEGMENTED COPOLYMERS

1. Morphology and Properties of Segmented Copolymers	3
2. Morphological Studies of PCP/MDI/BDO-Based Segmented Polyurethanes	31
3. Time Dependence of Mechanical Properties and Domain Formation of Linear and Crosslinked Segmented Polyurethanes	53
4. Surface Chemical Analysis of Segmented Polyurethanes. Fourier Transform IR Internal Reflection Studies	69
5. Thermoplastic Polyurethane Elastomer Structure-Thermal Response Relations	83
6. A Dynamic Mechanical Study of Phase Segregation in Toluene Diisocyanate, Block Polyurethanes	97
7. Elastomeric Polyether-Ester Block Copolymers. Properties as a Function of the Structure and Concentration of the Ester Group	129
8. Phase Separation and Mechanical Properties of an Amorphous Poly(ether-b-ester)	153

BLOCK COPOLYMERS

9. Properties and Morphology of Amorphous Hydrocarbon Block Copolymers	181
10. Block Size and Glass-Transition Temperatures of the Polystyrene Phase in Different Block Copolymers Containing Styrene Blocks as the Hard Phase	205
11. Dilatometry and Relaxations in Triblock Polymer Systems	217
12. Molecular Theories of the Interdomain Contribution to the Deformation of Multiple Domain Polymeric Systems	231
13. Viscoclastic Properties of Homopolymers and Diblock Copolymers of Polybutadiene and Polyisoprene	237
14. Strain-Induced Plastic-to-Rubber Transition of a SBS Block Copolymer and Its Blend with PS	257
15. Morphology and Dynamic Viscoelastic Behavior of Blends of Styrene-Butadiene Block Copolymers	277
16. Poly(Arylene Ether Sulfone)-Poly(Aryl Carbonate) Block Copolymers	293

BLENDS

17. A Brief Review of Polymer Blend Technology	315
18. Morphology, Viscoelastic Properties, and Stress-Strain Behavior of Blends of Polycarbonate of Bisphenol A (PC) and Atactic Polystyrene (PST)	337
19. Morphology of Low Density Polyethylene/EPDM Blends Having Tensile Strength Synergism	367

20. Fracture Surface Morphology and Phase Relationships of Polystyrene/Poly(methyl Methacrylate) Systems. Low-Molecular-Weight Poly(methyl Methacrylate) in Polystyrene	381
21. Physical Properties of Blends of Poly (vinyl Chloride) and a Terpolymer of Ethylene	413
22. Physical Properties of Blends of Polystyrene with Poly(methyl Methacrylate) and Styrene/ (methyl Methacrylate) Copolymers	433
23. Stress-Strain Behavior of PMMA/CIEA Gradient Polymers	443
24. Crystallization Studies of Blends of Polyethylene Terephthalate and Polybutylene Terephthalate	455
25. Characterization of Injection Molded Impact Polypropylene Blends	489
26. Segmental Orientation, Physical Properties, and Morphology of Poly- ϵ -Caprolactone Blends	517
27. Brillouin Scattering from Polymer Blends	529
28. Domain Flow in Two-Phase Polymer Systems. A Study of the Flow Properties of a Styrene-Methylmethacrylate Diblock Copolymer and SBS Triblock Copolymers	541
29. Polymer Compatibilization: Blends of Polyarylethers with Styrenic Interpolymers	559
30. Effect of Branch Length of Neoprene-g-Poly(tetrahydrofuran) Copolymers on Properties	587
31. Evaluation of the Polymer-Polymer Interaction Parameter from the Equation of State Thermodynamic Theory	599
32. A Proposed Generalized Nomenclature Scheme for Multipolymer and Multimonomer Systems	609
Index	631
