

CONTENTS

1 INTRODUCTION	1
2 DEFINITIONS	4
2.1 Fundamental Definitions, 4	
2.2 Polymer Classification, 7	
Condensation Polymers, 9	
Addition Polymers, 15	
Unusual Condensation and Addition Polymers, 17	
3 PHYSICAL CHEMISTRY OF POLYMERS	19
3.1 Chemical Bonds, 19	
3.2 Configuration and Structure of Polymer Chains, 20	
3.3 Relation of Polymer Structure to Physical Properties, 25	
Molecular Weight, 25	
Crystallinity, 25	
Structure and Crystalline Melting Point, 27	
Crystallinity—Structure and Other Physical Properties, 30	
Phase Transition Temperature, 30	
Three-Dimensional Networks, 32	
4 CHARACTERIZATION OF POLYMERS	34
4.1 Molecular Weight Determination, 34	
Osmotic Pressure Measurements, 35	

	Light Scattering, 36	
	Ultracentrifuge, 38	
	Solution Viscosity, 39	
×	4.2 Chemical Methods of Structure Determination, 40	
	4.3 Infrared Methods, 43	
	4.4 X-Ray Methods, 44	
5	MECHANISMS AND KINETICS OF POLYMERIZATION	48
	5.1 Condensation Polymerization, 48	
	Chemical Reactions of Monomeric Compounds, 48	
	Large Molecules, 50	
	Kinetics of Condensation Polymerization, 51	
	Gellation in Condensation Polymers, 54	
	Interfacial Condensation Polymerization, 55	
×	5.2 Free Radical Addition Polymerization, 56	
	The Free Radical Mechanism, 56	
	Copolymerization, 61	
	Monomer and Radical Reactivity, 64	
	Polymerization Systems and the Theory of Emulsion Systems, 66	
	5.3 Ionic Addition Polymerization, 67	
	Cationic Mechanisms, 70	
	Anionic Mechanisms, 73	
6	CONVENTIONAL CONDENSATION POLYMERS	87
	6.1 Polyesters, 87	
	Poly(ethylene terephthalate), 88	
	Polycarbonates, 88	
	Polyesters through a Reaction at the Interface, 89	
	Three-Dimensional or Crosslinked Polyester Resins, 90	
	6.2 Polyamides and Related Polymers, 93	
	Nylon 66, 93	
	Other Methods of Polyamide Preparation, 95	
	Polyimides, Imidazoles, and Triazoles, 97	
	Polyureas, 98	
	Polyurethanes, 100	
	6.3 Formaldehyde Resins, 102	
	Phenol-Formaldehyde Resins, 102	
	Urea-Formaldehyde Resins, 103	
	6.4 Thiokols and Polythioethers, 106	
	6.5 Silicones, 107	

- 6.6 Polymeric Anhydrides, 110
- 6.7 Polyacetals and Mercaptals, 111

7 POLYMERIZATION BY RING-OPENING REACTIONS 115

- 7.1 Cyclic Esters, 115
- 7.2 Cyclic Amides, 118
 - Caprolactam and α -Pyrrolidone, 119
- 7.3 Carboanhydrides, 121
- 7.4 Cyclic Ethers, 124
 - Oxiranes, 124
 - Epoxy Resins, 128
 - Oxetanes and Furans, 130
- 7.5 Imines, 132
- 7.6 Silicones, 133

8 SPECIAL POLYMERIZATION REACTIONS

- 8.1 H-Addition Polymerization, 137
- 8.2 Polyformaldehyde and Polyaldehydes, 139
- 8.3 Diels-Alder Polymers, 142
- 8.4 Polyphenylene Ethers, 144
- 8.5 Polymerization of Diazoalkanes, 146

9 VINYL ADDITION POLYMERS

- 9.1 Polyethylene, 149
 - High Pressure Process, 149
 - Low Pressure Process, 151
 - Structure and Properties of Polyethylene, 151
- 9.2 Polypropylene and Other 1-Olefins, 154
- 9.3 Polyisobutylene, 155
- 9.4 Polystyrene, 157
- 9.5 α -Methyl Styrene and Other Styrene Derivatives, 161
- 9.6 Poly(vinyl chloride), 162
- 9.7 Poly(vinylidene chloride), 164
- 9.8 Polychlorotrifluoroethylene, 164
- 9.9 Polytetrafluoroethylene, 165
- 9.10 Other Haloethylenes and Their Polymers, 167
- 9.11 Poly(methyl methacrylate), 167
- 9.12 Other Polyacrylates, 170
 - Poly(methacrylic esters), 170
 - Poly(methyl α -chloroacrylate), 171

	Poly(methyl acrylate), 171	
	Poly(acrylic acid), 172	
9.13	Polyacrylonitrile, 172	
9.14	Related Acrylic Polymers, 175	
9.15	Poly(vinyl acetate), Poly(vinyl alcohol), and Related Polymers, 175	
	Poly(vinyl acetate), 175	
	Poly(vinyl alcohol), 177	
	Poly(vinyl acetals), 178	
9.16	Other Vinyl Polymers, 179	
	Poly(vinyl ethers), 179	
	Poly(vinyl ketones), 180	
	Nitrogen Vinyl Polymers, 180	
10	POLYMERS FROM CONJUGATED DIENES	183
10.1	Polybutadiene, 183	
10.2	Polyisoprene, 187	
10.3	Polychloroprene, 191	
10.4	Poly(dimethylbutadiene), 192	
10.5	Polymerization of Other Conjugated Olefins, 193	
11	COPOLYMERS	197
11.1	Random Copolymers, 197	
	Ethylene Copolymers, 197	
	Vinyl Chloride Copolymers, 199	
	Butadiene-Styrene Copolymers (GR-S), 200	
	Butadiene-Acrylonitrile Copolymers (GR-N), 203	
	Olefin-Sulfur Dioxide Copolymers, 204	
11.2	Block Copolymers, 205	
	Block Polymers from Living Systems, 206	
	Block Polymers from Two-Phase Reaction Systems, 208	
	Block Copolymers from Polymeric Initiators, 208	
	Block Copolymers by Condensation Reactions, 211	
11.3	Stereoblock Polymers, 213	
11.4	Graft Copolymers, 213	
	Grafting by Free Radical Formation on a Polymer Chain, 214	
	Grafting from a Potential Free Radical Initiator, 215	
	Grafting by Condensation Polymerization on a Reactive Polymer Chain Group, 215	
	Monomer Grafting Prior to Polymerization. 218	

12	CYCLOPOLYMERIZATION	222
13	NATURALLY OCCURRING POLYMERS	230
13.1	Cellulose, 230	
	Structure and Properties, 230	
	Reactions of Cellulose and Cellulose Derivatives, 231	
13.2	Keratin, 233	
	Structure, 233	
	Properties and Reactions, 234	
13.3	Nucleic Acids, 237
