

# CONTENTS

Introduction <i>by</i> A. WASSERMANN	vii
Elementary Mechanochemical Processes A. KATCHALSKY, S. LIFSON, I. MICHAELIS and H. ZWICK	
2 Conversion of Chemical into Mechanical Energy by Homogeneous and Cross-striated Polymeric Systems W. KUHN, A. RAMEL and D. H. WALTERS	41
3 Indications on Muscle Contraction from X-ray Diffraction Studies of the Fibrous Proteins W. T. ASTBURY	78
4 Influence of Hydrogen-ion and Salt Concentration on Polyelectrolytes J. A. V. BUTLER	90
5 Influence of Counterions on Molecular Weight and Shape of a Polyelectrolyte R. E. COOPER and A. WASSERMANN	98
6 The High-energy Phosphate Bond Concept C. A. VERNON	109
