

CONTENTS

PART ONE. INTRODUCTION

- | | |
|---|----------|
| 1. The Science of Large Molecules | 3 |
| A. Basic Concepts of Polymer Science | 3 |
| B. The Rise of Macromolecular Science | 8 |
| C. Molecular Forces and Chemical Bonding in Polymers | 11 |
| D. Molecular Weight and Molecular-Weight Distribution | 16 |
| Discussion Questions and Problems | 19 |
| Bibliography | 19 |

PART TWO. POLYMERIZATION

- | | |
|--|-----------|
| 2. Step-Reaction (Condensation) Polymerization | 25 |
| A. Classification of Polymers and Polymerization Mechanisms | 25 |
| B. Mechanism of Stepwise Polymerization | 26 |
| C. Kinetics and Statistics of Linear Stepwise Polymerization | 33 |
| D. Polyfunctional Step-Reaction Polymerization | 40 |
| Discussion Questions and Problems | 46 |
| Bibliography | 47 |
|
 | |
| 3. Radical Chain (Addition) Polymerization | 49 |
| A. Mechanism of Vinyl Polymerization | 49 |
| B. Kinetics of Vinyl Radical Polymerization | 56 |
| C. Molecular Weight and Its Distribution | 68 |

D.	Effects of Temperature and Pressure on Chain Polymerization	71
	Discussion Questions and Problems	75
	Bibliography	77
4.	Ionic and Coordination Chain (Addition) Polymerization	82
A.	Similarities and Contrasts in Ionic Polymerization	82
B.	Cationic Polymerization	85
C.	Anionic Polymerization	88
D.	Coordination Polymerization	91
E.	Ring-Opening Polymerization	96
	Discussion Questions and Problems	97
	Bibliography	98
5.	Copolymerization	101
A.	Kinetics of Copolymerization	101
B.	Composition of Copolymers	110
C.	Mechanisms of Copolymerization	114
D.	Block and Graft Copolymers	120
	Discussion Questions and Problems	122
	Bibliography	123
6.	Polymerization Conditions and Polymer Reactions	126
A.	Polymerization in Homogeneous Systems	127
B.	Polymerization in Heterogeneous Systems	128
C.	Polymerization Reaction Engineering	134
D.	Chemical Reactions of Polymers	136
	Discussion Questions and Problems	144
	Bibliography	145
 PART THREE. CHARACTERIZATION		
7.	Polymer Solutions	151
A.	Criteria for Polymer Solubility	151
B.	Conformations of Dissolved Polymer Chains	154
C.	Thermodynamics of Polymer Solutions	159
D.	Phase Equilibrium in Polymer Solutions	168
E.	Fractionation of Polymers by Solubility	177
	Discussion Questions and Problems	180
	Bibliography	181

8. Measurement of Molecular Weight and Size	186
A. End-Group Analysis	186
B. Colligative Property Measurement	187
C. Light Scattering	198
D. Ultracentrifugation	205
E. Solution Viscosity and Molecular Size	208
F. Gel Permeation Chromatography	214
G. Polyelectrolytes	218
Discussion Questions and Problems	219
Bibliography	223
9. Analysis and Testing of Polymers	229
A. Chemical Analysis of Polymers	229
B. Spectroscopic Methods	230
C. X-Ray Diffraction Analysis	238
D. Microscopy	241
E. Thermal Analysis	242
F. Physical Testing	245
Discussion Questions and Problems	252
Bibliography	253

PART FOUR. STRUCTURE AND PROPERTIES

10. Morphology and Order in Crystalline Polymers	261
A. Configurations of Polymer Chains	261
B. Crystal Structures of Polymers	266
C. Morphology of Crystalline Polymers	273
D. Crystallization and Melting	281
E. Strain-Induced Morphology	289
Discussion Questions and Problems	295
Bibliography	297
11. Rheology and the Mechanical Properties of Polymers	301
A. Viscous Flow	302
B. Kinetic Theory of Rubber Elasticity	307
C. Viscoelasticity	311
D. The Glassy State and the Glass Transition	320
E. The Mechanical Properties of Crystalline Polymers	323
Discussion Questions and Problems	326
Bibliography	327

12. Polymer Structure and Physical Properties	330
A. The Crystalline Melting Point	331
B. The Glass Transition	337
C. Properties Involving Large Deformations	340
D. Properties Involving Small Deformations	343
E. Property Requirements and Polymer Utilization	349
Discussion Questions and Problems	354
Bibliography	355

PART FIVE. PROPERTIES OF COMMERCIAL POLYMERS

13. Hydrocarbon Plastics and Elastomers	361
A. Polyethylene	361
B. Polypropylene	368
C. Other Olefin-Based Polymers and Copolymers	369
D. Natural Rubber and Other Polyisoprenes	372
E. Rubbers Derived from Butadiene	373
F. Other Synthetic Elastomers	376
Discussion Questions and Problems	380
Bibliography	380
14. Other Carbon-Chain Polymers	383
A. Polystyrene and Related Polymers	383
B. Acrylic Polymers	387
C. Poly(vinyl esters) and Derived Polymers	391
D. Chlorine-Containing Polymers	395
E. Fluorine-Containing Polymers	398
Discussion Questions and Problems	404
Bibliography	404
15. Heterochain Thermoplastics	407
A. Polyamides and Polypeptides	407
B. Polyesters, Polyethers, and Related Polymers	413
C. Cellulosic Polymers	419
D. High-Temperature and Inorganic Polymers	426
Discussion Questions and Problems	431
Bibliography	431

16. Thermosetting Resins	436
A. Phenolic and Amino Resins	436
B. Unsaturated Polyester Resins	442
C. Epoxy Resins and Polyurethanes	445
D. Silicone Polymers	448
E. Miscellaneous Thermosetting Resins	451
Discussion Questions and Problems	452
Bibliography	453

PART SIX. POLYMER PROCESSING

17. Plastics Technology	457
A. Molding	458
B. Extrusion	461
C. Other Processing Methods	464
D. Multipolymer Systems and Composites	469
E. Additives and Compounding	471
F. Tables of Plastics Properties	475
Discussion Questions and Problems	475
Bibliography	481
18. Fiber Technology	486
A. Textile and Fabric Properties	487
B. Spinning	491
C. Fiber After-Treatments	497
D. Table of Fiber Properties	501
Discussion Questions and Problems	501
Bibliography	504
19. Elastomer Technology	506
A. Vulcanization	507
B. Reinforcement	513
C. Elastomer Properties and Compounding	516
D. Table of Elastomer Properties	518
Discussion Questions and Problems	518
Bibliography	521

APPENDIXES

Appendix 1	List of Symbols	522
Appendix 2	Table of Physical Constants	532
Appendix 3	Trade Names and Generic Names	533
AUTHOR INDEX		541
SUBJECT INDEX		555
