

CONTENTS

I. Studies of Microtacticity	1
II. Infrared Spectra of Polymers: Deuteration and Polarization	33
III. Optical Rotatory Dispersion	103
IV. Optical Methods of characterizing High Polymers,	155
V. Fluorescence Techniques	207
VI. Small-Angle X-Ray Studies of Polymers	231
VII. Electron Diffraction	279
VIII. High-Resolution Nuclear Magnetic Resonance	321
IX. Differential Thermal Analysis	347
X. Differeential Thermometric Measurements during Mechanical Deformation	421
XI. Column Fractionation of Polymers	447
XII. Characterization of High Polymers in Solutions-with Emphasis on Techniques at Elevated Temperatures	471
XIII. Density-Gradient Centrifugation	525
XIV. Flow Birefringence,	563
XV. Elasto-osmometry,	667
XVI. Monomolecular Film Studies of Polymers,	677
Index	713
