

CONTENTS

I. Acrylic Plastics. <i>By Edward L. Stanley</i>	1
I. Monomers.....	1
1. Assay.....	1
2. Inhibitor Content.....	3
3. Detection of Traces of Polymer in Monomer.....	9
4. Spectra of Monomers.....	9
II. Polymers.....	11
1. Chemical Composition.....	11
2. Physicochemical Properties of Solutions.....	15
II. Alkyds. <i>By John R. Jones, Jr.</i>	17
I. Introduction.....	17
II. Nonvolatile Content.....	18
1. Dish Method.....	18
2. Foil Method.....	19
III. Dibasic Acids.....	19
1. Alkyds Containing Phthalic Acid.....	19
2. Phthalic Alkyds Containing Other Dibasic Acids.....	20
3. Nonphthalic Alkyds.....	24
IV. Fatty Acids.....	24
V. Polyhydric Alcohols.....	25
1. Polyol Isolation.....	26
2. Glycerol.....	26
3. Total Glycols.....	27
4. Propylene Glycol and Ethylene Glycol.....	28
5. Glycerol and Glycols.....	29
6. Pentaerythritol.....	30
VI. Modified Alkyd Resins.....	31
1. Rosin Modifications.....	31
2. Phenolic Modifications.....	32
3. Siliconated Alkyds.....	32
4. Styrenated Alkyds.....	33
VII. Alkyd Resin Blends.....	34
1. Urea- and Melamine-Alkyd Blends.....	34
2. Nitrocellulose-Alkyd Blends.....	34
3. Vinyl Chloride-Acetate Copolymer-Alkyd Blends.....	35
4. Chlorinated Rubber-Alkyd Blends.....	35
VIII. Solvents.....	35
IX. Specifications and Quality Control.....	35
1. Alkyd Resins.....	36
2. Raw Material Specifications.....	38

III. Amino Resins. By P. R. Averell.....	49
I. Introduction	49
II. Raw Materials Analysis.....	49
1. Urea.....	50
2. Melamine.....	54
3. Formaldehyde.....	58
III. Process Control.....	60
IV. Analysis of Product.....	60
1. Free Formaldehyde.....	61
2. Total Formaldehyde.....	66
3. Total Nitrogen.....	71
4. Amine Constituents.....	72
5. Total Alcohol.....	76
6. Free Alcohol.....	80
7. Solids.....	81
8. Water or Volatiles.....	84
9. pH and Buffer Curves.....	88
10. Solvent Tolerance.....	90
11. Ash and Ash Constituents.....	91
12. Filler.....	91
13. Miscellaneous.....	92
IV. Cellulose Derivatives. By P. H. Ericksen and B. F. Brown.....	97
I. Introduction.....	97
II. Unplasticized Cellulose Derivatives.....	97
1. Soluble Cellulose Nitrate.....	98
2. Cellulose Acetate.....	101
3. Cellulose Acetate Butyrate.....	102
4. Methylcellulose.....	105
5. Ethylcellulose.....	108
6. Sodium Carboxymethylcellulose.....	110
III. Plasticized Cellulose Derivatives.....	159
1. Specific Gravity.....	115
2. Plasticizer Content.....	115
3. Analysis of the Recovered Cellulose Derivative.....	121
4. Analysis of Recovered Plasticizer.....	121
V. Epoxy Resins. By Robert E. Burge, Jr., and Bradford P. Geyer	123
I. Introduction.....	123
II. Chemical Analysis of Epoxy Resins.....	124
1. Intermediate (Uncured) Resins.....	124
2. Cured Resins.....	143
III. Qualitative Tests for Epoxy Resins.....	151
IV. Epoxy Resin Properties and Analysis.....	153
1. Methods Used in Determining the Physical Properties of Epoxy Resins.....	155
V. Performance Testing of Epoxy Resins.....	159
1. Evaluation of a Liquid Resin.....	160
2. Evaluation of a Solid Resin.....	162

VI. Ethylene and Fluoroethylene Polymers. <i>By R. C. Voter...</i>	165
I. Polyethylene.....	165
1. Properties and Uses of Polyethylene.....	166
2. Structure.....	167
3. Qualitative Identification.....	168
4. Quantitative Measurements.....	169
5. Quantitative Chemical Determinations.....	175
II. Polytetrafluoroethylene.....	176
1. Properties and Uses of Tetrafluoroethylene Resins.....	177
2. Structure.....	178
3. Qualitative Identification.....	179
4. Quantitative Measurements.....	180
5. Quantitative Chemical Determinations.....	186
III. Polychlorotrifluoroethylene.....	188
1. Properties, Uses, and Structure.....	188
2. Qualitative Identification.....	189
3. Quantitative Measurements and Analyses.....	190
VII. Furan Resins. <i>By Lloyd H. Brown.....</i>	197
I. Introduction.....	197
II. Raw Materials.....	199
1. Tests Applied to Both Furfural and Furfuryl Alcohol.....	199
2. Furfural Test.....	200
3. Furfuryl Alcohol Tests.....	202
III. Intermediate Resins.....	206
1. Tests Applied to Both Furfuryl Alcohol Resins and Furfural-Phenol Resins.....	206
2. Furfural-Phenol Resins.....	209
3. Furfuryl Alcohol Resins.....	212
IV. Performance Tests on Intermediate Resins.....	213
1. Tests Used on Both Furfural-Phenol and Furfuryl Alcohol Resins.....	213
2. Tests on Furfuryl Alcohol Resins.....	215
VIII. Natural Resins. <i>By Charles M. Ferri.....</i>	221
I. Introduction.....	221
II. Physical Methods of Analysis.....	223
1. Hardness.....	223
2. Microscopic Characteristics.....	223
3. Melting Behavior.....	223
4. Specific Gravity.....	232
5. Refractive Index.....	232
6. Optical Rotation.....	232
7. Color.....	233
8. Viscosity.....	233
III. Chemical Methods of Analysis.....	234
1. Insoluble Content.....	234
2. Ash.....	234
3. Acid Number.....	234

4. Saponification Number.....	236
5. Iodine Number (Hübl).....	236
6. Solubility.....	236
7. Essential Constituents.....	238
IV. Thermal-Processed Resins.....	238
IX. Phenolic Resins. <i>By H. E. Riley</i>	239
I. Introduction.....	239
II. Raw Materials.....	241
1. Test Methods Applicable to Phenols.....	241
2. Test Methods Applicable to Aldehydes.....	250
III. Control and Inspection.....	254
1. pH.....	255
2. Composition of Reaction Mixture.....	255
3. Unreacted Raw Materials.....	256
4. Refractive Index.....	256
5. Viscosity.....	256
6. Fusing Point of Resins.....	257
7. Reactivity of Resins.....	258
8. Specific Gravity.....	259
9. Solids Content.....	259
10. Color.....	260
11. Moisture in Resin.....	260
12. Ash.....	260
13. Total Nitrogen.....	261
IV. Phenolic Resin Composition.....	261
1. Total Hydroxyl.....	262
2. Methylol.....	263
3. Diarylmethane.....	264
4. Ether Structure.....	264
5. Fractionation.....	265
6. Molecular Weight.....	266
7. Ultimate Analysis.....	268
X. Polyamides. <i>By H. J. Frey and J. R. Knox</i>	273
I. Introduction.....	273
II. Identification Tests.....	275
1. Spectroscopy.....	275
2. Flame Test.....	276
3. Solubility.....	277
4. Colorimetric Tests.....	277
5. Density.....	278
6. Chromatography.....	278
III. Qualitative and Quantitative Analysis.....	279
IV. Determination of Moisture.....	282
1. Hot Block Method.....	282
2. Solution Method.....	284
V. Determination of Additives and Impurities.....	284

1. Monomer	284
2. Carbon Black	285
3. Trace Metals	286
VI. Determination of Crystallinity	286
1. Density Method	286
2. Infrared Method	287
VII. Determination of Molecular Weight	289
1. Potentiometric Titration of End Groups	289
2. Conductometric Titration of Amine End Groups	290
3. Titration of Carboxyl End Groups in Benzyl Alcohol	291
XI. Polyesters. <i>By Earl E. Parker</i>	295
I. Introduction	295
II. Analysis of Polyester Resins	295
1. Separation	295
2. Chemical Identification of Polyester Components	297
3. Instrumental Methods	300
III. Control Tests for Polyester Resins	301
1. Storage Stability	301
2. Gel Time	302
3. Viscosity	303
4. Color	303
5. Haze	303
6. Acid Number	303
IV. Polyester Resin Raw Materials	304
1. Styrene	304
2. Maleic Anhydride	305
3. Phthalic Anhydride	305
4. Propylene Glycol	306
5. Adipic Acid	306
6. Diethylene Glycol	306
XII. Proteins. <i>By Harold K. Salzberg and David Fergus</i>	309
I. Introduction	309
II. Nature of the Protein Molecule	310
III. Qualitative Analysis of Proteins	312
IV. Separation of Proteins	313
V. Amino Acid Composition	316
1. Hydroxyproline	317
2. Lysine	317
3. Tryptophane	317
4. Phenylalanine	318
5. Methionine	318
6. Cystine	319
7. Glycine	319
8. Alanine	320
9. Leucine	320
VI. Physical Methods of Analysis	321
1. Molecular Weight	321

2. Optical Properties.....	322
3. Color.....	323
4. Odor.....	323
5. Cleanness.....	323
6. Fineness.....	324
7. Solubility.....	324
8. Viscosity.....	325
VII. Chemical Methods of Analysis.....	326
1. Nitrogen.....	326
2. Phosphorus in Casein.....	328
3. Sulfur.....	329
4. Carbohydrates in Casein.....	330
5. Fat in Casein.....	331
6. Moisture.....	332
7. Ash.....	334
8. Acidity.....	334
VIII. Casein Plastic.....	335
IX. Animal Glue.....	336
X. Photographic Gelatin.....	338
XIII. Rubbers (Elastomers). <i>By Willard P. Tyler.....</i>	343
I. Introduction.....	343
II. Crude Natural Rubber.....	343
1. Rubber Hydrocarbon Determination.....	343
2. Unsaturation Determination.....	344
3. Moisture Content.....	344
4. Nitrogen Content.....	345
5. Trace Metals Analysis.....	345
6. Acetone Extract.....	347
7. Dirt Content.....	347
III. Styrene-Butadiene Copolymers.....	348
1. Bound Styrene Content.....	348
2. Moisture Determination.....	348
3. Determination of Ash.....	349
4. Determination of Organic Acid and Soap.....	349
5. Determination of Carbon Black in Master Batch.....	349
6. Determination of Stabilizer.....	350
7. Estimation of Oil Content.....	350
8. Analysis of Latices.....	351
9. Unsaturation of SBR and Related Polymers.....	351
10. Other Methods of Chemical Testing of SBR.....	351
11. Trace Metal Analysis.....	352
IV. Acrylonitrile Copolymers (Nitrile Rubbers).....	352
1. Nitrogen Determination.....	352
2. Soap and Organic (Fatty) Acid Determination.....	353
V. Butyl Rubber.....	353
1. Unsaturation Determination.....	353
2. Total Stearate.....	354

VI. Chlorine-Containing Polymers.....	355
1. Chlorine Content of Elastomers and Rubber Derivatives..	355
VII. Polysulfide Rubber.....	356
1. Sulfur Determination.....	356
VIII. Analysis of Vulcanized Elastomers.....	356
IX. Absorption Spectroscopic Methods.....	358
1. Infrared Absorption Analysis of Elastomers.....	358
2. Stabilizers and Accelerators in SBR and Butyl Rubber...	359
XIV. Silicones. By James A. McHard.	361
I. Introduction.....	361
1. Types of Commercial Silicones.....	361
2. Terminology.....	363
II. Monomers.....	364
1. Chlorosilanes.....	364
2. Alkoxysilanes.....	371
3. Silanols.....	373
4. Silane Hydrogen.....	375
III. Finished-Product Analysis.....	375
1. Preliminary Testing.....	375
2. Fluids.....	375
3. Emulsions.....	388
4. Compounds and Greases.....	389
5. Resins.....	389
IV. Summary.....	394
XV. Styrene Monomers and Polymers. By E. N. Luce.	399
I. Monomer Analysis.....	399
1. Sampling.....	399
2. Styrene.....	400
3. <i>o</i> -Methylstyrene.....	426
4. Ethylvinylbenzene and Divinylbenzene Mixtures.....	428
5. Vinyltoluene.....	434
6. Halostyrenes.....	436
7. Acrylonitrile.....	438
8. Recycle Styrene.....	442
9. Miscellaneous Unsaturation.....	442
10. Vapor Phase Chromatography.....	442
II. Polymer and Copolymer Analysis.....	443
1. Methanol Soluble.....	443
2. Volatile Content.....	444
3. Solution Viscosity.....	445
4. High Impact Polymers.	446
XVI. Vinyl Polymers and Copolymers. By Carlisle J. Kennett.	449
I. Introduction.....	449
II. Monomers.....	449
1. Vinyl Acetate.....	449
2. Vinyl Chloride.....	452

3. Vinylidene Chloride	458
4. Vinyl Ethyl Ether	459
III. Latex: Polyvinyl Acetate and Copolymers	462
1. Appearance	462
2. Particle Size	462
3. Total Solids	463
4. Weight per Gallon	463
5. Viscosity	463
6. Vinyl Acetate	464
7. pH	464
8. Phase Inversion Test	465
9. Drying Time	465
10. Freeze-Thaw Stability	465
11. Chemical Stability	465
12. Accelerated Storage Stability	465
13. Shelf Stability	466
14. Mechanical Stability	466
IV. Resins: General Methods	466
1. Particle Size	466
2. Heating Loss	471
3. Specific Gravity and Apparent Density	471
4. Color	471
5. Vixosity	473
V. Resins: Tests by Type of Resin	474
1. Polyvinyl Acetate Resins	474
2. Polyvinyl Acetals	476
3. Polyvinyl Chloride	478
4. Polyvinyl Chloride-Acetate Resins	480
5. Polyvinyl Chloride-Acetate Tripolymers	481
6. Polyvinyl Alcohol	482
7. Polyvinyl Ethyl Ether	484
8. Polyvinyl Carbazole	485
9. Polyvinyl Pyrrolidone (Clinical)	486
XVII. Ion Exchange Resins. <i>By Sallie Fisher and Robert Kunin</i>	489
I. Introduction	489
II. Sampling	490
1. Pretreatment of the Sample	491
III. Physical Properties	494
1. Screen Analysis	494
2. Whole Bead Content	497
3. Attrition Resistance	499
4. Density	503
5. Hydraulic Properties	507
6. Solubility	512
7. Aesthetic Properties	513
IV. Chemical Properties	514
1. Elemental Analysis	515

2. Skeletal Analyses.....	515
3. Solids Content.....	515
4. Ash Determination.....	517
5. Characterization of Functional Groups.....	517
6. Total Capacity Measurements.....	520
V. Performance Tests.....	525
1. Batch Methods.....	526
2. Column Testing.....	528
XVIII. Plasticizers. <i>By C. A. Pentz and R. S. Clark.</i>	531
I. Introduction.....	531
II. Physical Tests.....	532
1. Appearance.....	532
2. Specific Gravity.....	532
3. Distillation.....	535
4. Viscosity.....	537
5. Refractive Index.....	538
6. Direct Current Resistivity.....	540
7. Power Factor.....	540
8. Solubility in Various Solvents.....	541
9. Flash and Fire Point.....	542
10. Freezing Point.....	543
11. Pour Point.....	543
12. Color.....	544
13. Odor and Taste.....	545
III. Chemical Tests.....	546
1. Esters.....	546
2. Water.....	547
3. Acidity.....	549
4. Unsaturation (Iodine Number).....	549
5. Corrosion (Copper Strip Test).....	550
6. Permanganate Test for Oxidizables.....	551
7. Free Phenols.....	551
8. Hydroxy Determination and Hydroxyl Value.....	552
XIX. Synthetic and Natural Fibers. <i>By M. L. Staples.</i>	557
I. General Survey.....	557
II. Qualitative Identification of Fibers.....	558
1. Microscopic Examination.....	559
2. Reaction to Heat.....	559
3. Specific Gravity.....	561
4. Refractive Index.....	561
5. Staining with Dyestuffs.....	562
6. Selective Solvents.....	563
III. Methods of Expressing Fiber Composition.....	563
1. Dry Weight of Clean Fiber.....	564
2. Dry Weight of Clean Fiber plus Allowance for Moisture Regain.....	565
3. Total Weight of Dry Fiber.....	566

IV. Removal of Nonfibrous Materials.....	566
V. Physical Methods of Quantitative Analysis.....	567
1. Mechanical Separation.....	567
2. Flotation.....	568
3. Density Gradient Column.....	569
4. Microscopic Count Method.....	570
VI. Chemical Methods of Quantitative Analysis.....	571
1. General.....	571
2. Analysis of Binary and Ternary Fiber Mixtures.....	575
3. Preparation of Specimens for Analysis.....	575
4. Apparatus Required.....	578
5. Analytical Procedures.....	578
VII Accuracy of Results.....	594
XX. Drying Oils . By W. E. <i>Link</i>	599
I. Introduction.....	599
II. Physical Methods.....	601
1. Specific Gravity.....	601
2. Refractive Index.....	602
3. Color.....	602
4. Viscosity.....	603
III. Special Methods as Applied to Drying Oils.....	604
1. Acetone Number.....	604
2. Alcohol or Mineral Spirits Tolerance.....	605
3. Bleaching Test.....	605
4. Break Test	605
5. Drying Time	606
6. Gel Time	607
7. Heat Bodying Rate.....	607
8. Refining Loss.....	608
IV. Chemical Methods.....	609
1. Unsaturation.....	609
2. Hydroxyl or Acetyl Value.....	613
3. Carboxyl and Its Ester.....	615
4. Carbonyl Value	617
5. Peroxide Value.....	618
6. Minor Components	618
V. Spectrophotometric Methods.....	620
1. Infrared Spectroscopy.....	620
2. Ultraviolet Spectroscopy.....	621
Author Index	629
Subject Index	647
