I. Introduction	1
II. Apparatus and Experimental Procedures	10
III. Styrene Polymers	26
1. Polystyrene	26
A. Molecular Structure	26
B. Molecular Weight of Partially Degraded Polystyrene	28
C. Pyrolysis and Composition of the Products of Degradation	35
D. Rate of Thermal Degradation of Polystyrene	47
2. Poly- α -methylstyrene	61
A. Pyrolysis	61
B. Rates	65
3. Poly- α -deuterostyrene and Poly- β -deuterostyrene	72
4. Poly- <i>m</i> -methylstyrene	76
5. Crosslinked Styrene Polymers	79
6. Hydrogenated Polystyrene	89
IV. Polyolefins	93
1. Polyethylene and Polymethylene	96
2. Copolymers of Ethylene and Propylene	112
3. Polypropylene and Polyisobutylene	115
V. Fluorocarbon and Chlorocarbon Polymers	130
1. Polytetrafluoroethylene (Teflon)	130
2. Polychlorotrifluoroethylene (Kel-F)	140
3. Hydrofluoroethylene Polymers	143
4. Poly- α,β,β -trifluorostyrene and Poly-2,3,4,5,6-pentafluorostyrene	150
5. Perfluoroamidine Polymers: Polymer of Perfluoroglutarodiamidine and Copolymer of Perfluoroglutarodiamidine and Perfluorobutyrodiamidine in the Ratio of 1:1	156
6. Perfluoro, Hydrofluoro, and Chlorofluoro Polymers: Polyperfluoropropylene, Polyperfluoroheptene, Poly-4-chloroper-fluoroheptadiene-1,6, and Polytrifluorovinylphenylether	157
7. Poly(vinyl chloride) and Poly(vinylidene chloride)	160
8. Relative Thermal Stability of High-Temperature Polymers	167

VI. Poly(vinyl acetate) and Poly(vinyl alcohol)	173
VII. Acrylate Polymers	176
1. Polymethylmethacrylate	176
2. Polymethylacrylate	188
VIII. Acrylonitrile Polymers	194
1. Polyacrylonitrile	194
2. Polymethacrylonitrile	200
IX. Polybutadiene and Copolymers of Butadiene with Styrene and Acrylonitrile	203
1. Polybutadiene	203
2. Copolymers of Butadiene with Styrene and Acrylonitrile	207
X. Polyisoprene, Natural Rubber, and Neoprene	213
1. Polyisoprene and Natural Rubber	214
2. Neoprene	226
XI. Polyoxides	228
1. Polyoxymethylene	228
2. Poly(ethylene oxide) and Poly(propylene oxide)	229
XII. Cellulosic Materials: Cotton Cellulose, Hydrocellulose, Viscose Rayon, Fortisan, Cellulose Triacetate, and Oxidized Cellulose	238
XIII. Polyamides: 6 Nylon, 66 Nylon, 610 Nylon	262
XIV. Poly(ethylene terephthalate) (Dacron)	272
XV. Polybenzyl and Poly-p-xylylene	277
XVI. Phenolic Resin	288
XVII. Summary	293
Author Index	305
Subject Index	309
