

TABLE OF CONTENTS

EXPLANATORY LIST OF ABBREVIATIONS	viii
INTRODUCTION	1
Chapter I. THE CONCEPT OF THE MOLECULE AND MOLECULAR WEIGHT OF HIGH-MOLECULAR COMPOUNDS	3
1. The Polydispersity of High-Molecular Compounds and Its Influence on the Average Values of Molecular Weights	5
2. The Influence of Low-Molecular Admixtures on the Average Values of Molecular Weight	11
3. Special Features of Solutions of Polymeric Substances	13
BIBLIOGRAPHY	18
Chapter II. FRACTIONATION OF HIGH-MOLECULAR COMPOUNDS	19
1. Fractional Precipitation	26
(a) Fractional precipitation by evaporation of solvent	39
(b) Fractional precipitation by decreasing the temperature of the solution	41
2. Fractional Dissolution	43
3. Chromatographic Fractionation	50
4. Fractionation by Distribution between Two Immiscible Solvents	56
5. Polymer Fractionation by Thermal Diffusion	58
6. Turbidimetric Titration	61
7. Treatment of Results	63
BIBLIOGRAPHY	80
Chapter III. LIGHT SCATTERING	86
1. Introduction	86

1 2 3

(a) Light scattering by molecules which are small in comparison with the light wavelength	87
(b) Light scattering by particles of dimensions comparable to the wavelength of the light	90
(c) Determination of polydispersity from light scattering data	96
2. Experimental Procedure and Instruments	99
(a) The preparation of the solutions	99
(b) Nephelometers	103
(c) Cells and thermostats	118
3. Corrections	121
(a) Correction for light absorption by the solution	121
(b) Correction for the fluorescence of the solution	122
(c) Correction for the refractive index	122
(d) Volume correction factor	123
BIBLIOGRAPHY	128
Chapter IV. DIFFUSION METHOD	130
1. Calculation of the Diffusion Coefficient	133
(a) The method of maximum ordinate	133
(b) The method of moments	133
2. Experimental Methods	134
(a) Diffusion cells	134
(b) Optical recording methods	136
BIBLIOGRAPHY	141
Chapter V. ULTRACENTRIFUGE SEDIMENTATION METHOD	142
1. Ultracentrifuges	144
(a) General information	144
(b) Rotor	147
(c) Cells	148
2. The Calculation of the Sedimentation Constant and of Molecular Weight	150
(a) Measurement of sedimentation velocity	151
(b) The method of sedimentation equilibrium	154
(c) Non-equilibrium method	155
3. The Estimation of the Polydispersity	159
(a) Calculating the distribution curves	160
(b) The average values of the molecular weight and polydispersity	165

4. The Dependence of the Sedimentation Constant on the Concentration	166
BIBLIOGRAPHY	167
Chapter VI. OSMOMETRY	169
1. Introduction	169 -
2. Osmotic Method	170
3. The Influence of the Nature of the Solvent and of the Concentration of the Polymer Solution on the Osmotic Pressure (Second Virial Coefficient A_2)	171
4. Osmometers	172
(a) Osmometers with a horizontal membrane	174
(b) Osmometers with vertical membranes	177
(c) Other osmometers	187
(d) Osmotic balance	196
5. General Information on Membranes	201
(a) Preparation and treatment of membranes	205
(b) The application of membranes to special purposes	211
(c) Membrane porosity and permeability	212
(d) Membrane swelling	218
(e) The optimum number of membranes, their diameter and the volume of the cell	219
6. Errors in Osmometry	219
(a) Adsorption of material on the membrane	219
(b) Membrane asymmetry	220
(c) Sagging ("balloon effect")	221
(d) Partial drying of membrane while the osmometer is being filled	222
(e) Evaporation of solvent	222
(f) Osmometers with loose seals	223
(g) Air bubbles in the osmometer	223
(h) Diffusion of the dissolved material through the membrane	223
7. The Accuracy of the Osmometric Method	224
BIBLIOGRAPHY	225
Chapter VII. EBULLIOSCOPIC, CRYOSCOPIC AND ISOPIESTIC METHODS	228
1. Introduction	228

2. Ebullioscopy	233
(a) Ebullioscopes	235
(b) Parts of the ebullioscopes	249
(c) Errors in ebullioscopy	251
3. Cryoscopy	255
(a) Cryoscopes	255
(b) Introducing the sample into the cryoscope	262
4. Anomalous Effects in Cryoscopy and Ebullioscopy	263
5. Isopiestic Method	263
(a) Micro- and macromethods of molecular weight determination	263
(b) Other methods	270
BIBLIOGRAPHY	271
CHapter VIII. MOLECULAR WEIGHT DETERMINATION BY END GROUP ASSAY	273
1. Determination of Carboxyl Groups	278
2. Determination of Amino Groups or the Combined Determination of Amino and Carboxyl Groups	284
3. Determination of Hydroxyl Groups	288
4. Determination of Aldehyde Groups	296
5. Determination of Other Terminal Groups	297
BIBLIOGRAPHY	300
Chapter IX, VISCOMETRY	302
1. Viscosity of Polymer Solutions	302
(a) Dependence of viscosity on the molecular weight of the polymer	302
(b) Viscomeuc evaluation of polydispersity	310
(c) Effect of rate of shear on solution viscosity	311
(d) Anomalies in the concentration dependence of viscosity at high dilutions	317
2. General Information on Viscometers and Manostats	322
(a) Viscometers	322
(b) Manostats	330
3. General Information about Thermostats	332
BIBLIOGRAPHY	334

Chapter X. METHODS OF WEIGHT DETERMINATION OF LINEAR POLYMERS, BASED ON THE STUDY OF THEIR VARIOUS PHYSICAL PROPERTIES	337
1. Molecular Weight Determination of Amorphous Linear Polymers by Their Pour Point	337
2. Molecular Weight Determination from Relaxation Data	338
3. Determination of the Molecular Weight of a Polymer by Its Viscosity	340
4. Determination of the Molecular Weight of High Polymers by Means of Dynamic Mechanical Measurements	341
5. Determination of the Molecular Weight of Polymers by Spectroscopic, Electron-Microscope and Other Physical Investigations	343
BIBLIOGRAPHY	344
APPENDIX. The Constants K and a in the equation $[\eta] = KM^a$	345
BIBLIOGRAPHY	354
