1 X-ray powder diffraction of synthetic organic colorants	1
A. WHITAKER	
1.1 Introduction	1
1.1.1 Diffraction of X-rays from crystals	1
1.1.2 Advantages and disadvantages of the powder technique	2
1.1.3 Reliability of an X-ray pattern	4
1.1.4 Presentation of X-ray powder data	5
1.2 X-ray powder diffraction data	5
1.2.1 Nitroso and nitro compounds	6
1.2.2 Monoazo compounds	6
1.2.3 Disazo compounds	19
1.2.4 Azoic compounds	22
1.2.5 Stilbene optical brighteners	22
1.2.6 Quinacridones	24
1.2.7 Dioxazines	27
1.2.8 Amino ketone compounds	28
1.2.9 Anthraquinone compounds	28
1.2.10 Perylene compounds	31
1.2.11 Indigoids	32
1.2.12 Phthalocyanines	32
1.2.13 Miscellaneous compounds	38
Acknowledgement	40
References	40
2 Solid state NMR spectroscopy of synthetic dyes	49
A. LYČKA, J. JIRMAN and J. STRAKA	
2.1 Introduction	49
2.2 Basic principles of cross polarization/magic angle spinning measurements	50
2.2.1 Dipolar interactions	50
2.2.2 Chemical shift anisotropy	52
2.2.3 Cross polarization	53
2.2.4 Cross-polarization/magic angle spinning method	55
2.3 Examples of solid state NMR spectra of dyes	56
2.4 Survey of published chemical shift data on the solid state	66
2.4.1 ¹³ C NMR data	66
2.4.2 ¹⁵ N NMR data	72
2.5 Conclusions	73
Acknowledgement	73
References	74
3 Near IR spectroscopy	75
M. MATSUOKA	
3.1 Introduction	75
3.2 Chromophoric systems of NIR dyes	76
3.2.1 Intramolecular charge-transfer chromophores	77

3.3	NIR spectra of dyes	78
3.3.1	Cyanine dyes	79
3.3.2	Quinone dyes	85
3.3.3	Metal complex dyes	87
3.3.4	Phthalocyanine and naphthalocyanine dyes	89
3.3.5	Azo dyes	91
3.3.6	Miscellaneous chromophoric systems	92
3.4	Conclusion	94
	References	94
4	Mass spectroscopy	96
	R.B. VAN BREEMEN	
4.1	Introduction	96
4.2	Ionization methods	98
4.2.1	Electron impact	98
4.2.2	Chemical ionization	99
4.2.3	Desorption EI and CI	100
4.2.4	Field desorption	102
4.2.5	Fast atom bombardment and liquid secondary ion mass spectrometry	103
4.2.6	Laser desorption	107
4.2.7	Plasma desorption	108
4.2.8	Thermospray	110
4.2.9	Electrospray and ion spray	112
4.3	Conclusion	114
	References	115
5	Electron spin resonance spectroscopy	117
	H.S. FREEMAN and R.D. BEREMAN	
5.1	Introduction	117
5.2	Basic principles	117
5.2.1	Spin relaxation and line broadening	118
5.2.2	The g -value	120
5.2.3	Hyperfine coupling	120
5.2.4	Anisotropic effects	121
5.3	Applications	122
5.3.1	Sensitizing and desensitizing dyes	122
5.3.2	Azo dyes	124
5.3.3	Triarylmethane dyes	125
5.3.4	Acridine dyes	126
5.3.5	Miscellaneous dyes	127
5.4	Conclusion	131
	References	132
6	Microspectrophotometry	133

6.1	Introduction	133
6.2	Microdensitometry and microspectrophotometry	133
6.2.1	Instrumentation	133
6.2.2	Analysis of <i>in situ</i> dye spectra	135
6.2.3	Dye concentration profiles in fibres and films	137
6.2.4	Applications	144
6.3	Microfluorometry	156
6.3.1	Background	156
6.3.2	Methods of measurement	159

6.3.3 Applications	162
6.4 Conclusion	168
References	168
7 Emission spectroscopy	171
K.P. GHIGGINO	
7.1 Introduction	171
7.2 Principles	171
7.3 Techniques	175
7.3.1 Steady state measurements	175
7.3.2 Time-resolved measurements	178
7.4 Applications to fluorescent whitening 'dyes'	181

8 Identification and analysis of diarylide pigments by spectroscopic and chemical methods	186
C. NICOLAOU and M. DA ROCHA	
8.1 Introduction	186
8.1.1 Historical background	186
8.1.2 Method of manufacture	187
8.2 Analytical methodology of diarylide pigments	189
8.3 Analysis of diarylide pigments by infra-red spectroscopy	192
8.3.1 Sample preparation	192
8.3.2 Characteristic bands of the IR spectra of diarylide pigments	193
8.4 Analysis of diarylide pigments by visible spectroscopy	195
8.5 Thin layer chromatography in diarylide pigments	197
8.5.1 Identification of diarylide pigments	198
8.5.2 Determination of unreacted coupler in diarylide pigments	199
8.5.3 Determination of aromatic amines in diarylide pigments	199
8.5.4 Analysis of fatty diamines and triamines in diarylide pigments	200
8.6 General scheme for the analysis in diarylide pigments	200
8.7 Identification of diarylide pigments by reduction	204
8.8 High performance liquid chromatography of aromatic amines in diarylide pigments	204
8.8.1 Determination of 3,3'-dichlorobenzidine in diarylide pigments	205
8.8.2 Determination of 2,5-dimethoxy-4-chloroaniline (DMCA) in C.I. Pigment Yellow 83	205
8.9 Gas chromatography of 3,3'-dichlorobiphenyl in diarylide pigments	206
