

## CONTENTS

1. The Nature of Organic Compounds	1
2. Structural Types	33
3. Stereochemistry	66
4. Alkanes	105
5. Alkenes	134
6. Acetylenic and Related Compounds	213
7. Petroleum	244
8. Alcohols	264
9. Displacement Reactions	315
10. Halides	338
11. Carboxylic Acids	358
12. Aldehydes and Ketones	395
13. Condensations	456
14. Amines:	488
15. Ring Formation and Sterility	531
16. History of The Benzene Problem	605
17. Aromatic Substitutions	620
18. Aromatic Hydrocarbons	640
19. Nitro Compounds	675
20. Sulfonic Acids	696
21. Aryl Amines	706
22. Phenols	743
23. Aryl Halides	773
24. Aromatic Carboxylic Acids	791
25. Aromatic Aldehydes and Ketones	813
26. Quinones and Arenones	845
27. Naphthalene	879
28. Nonbenzenoid Aromatics and Pseudoaromatics	904
29. Carbohydrates	929
30. Lipids	981
31. Proteins	1014
Answers To Problems	1089
Indexes	1102
