

CONTENTS

1 Introduction	1
2 structure of the atom	16
ALIPHATIC COMPOUNDS	
3 Paraffins	51
4 Unsaturated hydrocarbons	73
5 Halogen derivatives of the paraffins	117
6 Monohydric alcohols	144
7 Ethers	162
8 Aldehydes and ketones	168
9 Fatty acids	199
10 Tautomerism	242
11 Polyhydric alcohols	276
12 Unsaturated alcohols, ethers, carbonyl compounds and acids	294
13 Nitrogen compounds	321
14 Aliphatic compounds of sulphur, phosphorus, arsenic and silicon	363
15 Organo-metallic compounds	380
16 Saturated dicarboxylic acid	400
17 Hydroxyacids. Stereochemistry, unsaturated dicarboxylic acids	425
18 Carbohydrates	469
Alicyclic compounds	
19 Alicyclic compounds	499
Aromatic Compounds	
20 Simple aromatic hydrocarbons	533
21 Aromatic halogen compounds	587
22 Aromatic nitro-compounds	596
23 Aromatic amino-compounds	609
24 Diazonium salts and their related compounds	629
25 Sulphonic acids	650
26 Phenols	662
27 Alcohols, aldehydes, ketones and quinones	688
28 Aromatic acids	720
29 Polynuclear hydrocarbons and their derivatives	742
Heterocyclic Compounds	
30 Heterocyclic compounds	785
31 Dyes	821

Examination questions	862
Appendix	866
Index	875
