

CONTENTS

VOLUME III

1. The Study of Organic Reaction Mechanisms-Paul D. Bartlett	1
2. Applications of infrared and ultraviolet Spectra to Organic Chemistry-Foil A. Miller	122
3. Lipids-J.C. Cowan and H.E. Carter	178
4. Organic Dyes-H.W. Grimmel	243
5. Some Aspects of Chemotherapy-H.R. Ing	392
6. Antibiotics-Lee C. Cheney	533

VOLUME IV

7. The Terpenes-Richard H. Eastman and Carl R. Noller	581
8. Heterocyclic Chemistry-Richard H. Wiley	723
9. Starch-W.Z. Hassid	901
10. Chemistry of Explosives-George F Wright	951
11. Reactions of Organic Gases Under Pressure-W.E. Hanford and D. E. Sargent	1001
12. Oxidation Processes-William A. Waters	1120
