

CONTENTS

Chapter 1 Introduction	1
Chapter 2 The Thermodynamics of Reactions in Solution	5
Chapter 3 The Contribution from Statistical Mechanics	37
Chapter 4 The Evaluation of Rate Data	53
Chapter 5 Transition-state Theory	101
Chapter 6 Some Displacement Reactions	147
Chapter 7 Salt Effects	187
Chapter 8 Effect of Solvent on Reactivity	221
Chapter 9 The Quantitative Study of Acids and Bases	263
Chapter 10 Rates of Reactions Involving Acids and Bases	315
Chapter 11 Quantitative Relationships Involving Structure and Reactivity	347
Chapter 12 Effect of Structure on Enthalpy and Entropy Changes	391
Name Index	409
Subject Index	415
