

CONTENTS

Part I. Aliphatic Compounds

	page
Chapter 1. Introduction	1
Organic Chemistry	1
Composition and analysis of organic compounds	3
Qualitative detection of elements in organic compounds.	3
(a) Detection of carbon and hydrogen.	3
(b) Detection of nitrogen	4
(c) Detection of oxygen	4
Quantitative determination of elements.	5
(a) Quantitative determination of carbon and hydrogen	5
(b) Quantitative estimation of nitrogen	7
1. Dumas' Method	7
2. Kjeldahl method	7
(c) Quantitative estimation of halogens, phosphorus, arsenic, sulphur, etc., in organic compounds	8
Ultimate analysis of organic compounds by micro-analytical methods.	9
Micro-volumetric method of determination of nitrogen as gas.	9
Micro-analytical estimation of carbon and hydrogen.	10
Derivation of chemical formulæ	11
(a) Empirical and Molecular formulæ	11
(b) Structural or constitutional formulæ	14
Historical review of the development of the formulation of organic compounds	17

Section I. Hydrocarbons and Compounds with a Monovalent Function

Chapter 2. Hydrocarbons	22
Saturated hydrocarbons or Paraffins	22
The Geneva Nomenclature.	24
Natural occurrence of paraffin hydrocarbons	26
Methods of preparation of paraffin hydrocarbons	26
Physical properties of the paraffins	30
Chemical properties of the saturated hydrocarbons	31
Individual members of the paraffin series	33
Mineral Oil	36
Unsaturated aliphatic hydrocarbons.	40
Olefines or hydrocarbons of the ethylene series	41
Structure and spatial configuration of the olefines	41
Nomenclature of the olefines	46
Occurrence and preparation of the olefines	46
Physical properties of the olefines	48
Chemical properties of the olefines.	49
Unsaturated hydrocarbons with two or more double bonds. C_nH_{2n-2} , C_nH_{2n-4} , etc.	53
1. Compounds with isolated double bonds	53
2. Hydrocarbons with cumulative double bonds	54
3. Hydrocarbons with conjugated double bonds	54

	page
Hydrocarbons of the acetylene series.	57
Methods of preparation of the acetylenic hydrocarbons	58
Metallic derivatives of the acetylenic hydrocarbons	59
Acetylene.	59
Chapter 3. The Monovalent Halogen Function: Alkyl Halides. Alkylene Halides.	63
Alkyl halides.	63
Methods of preparation	63
Properties of the alkyl halides	65
Monohalogen derivatives of unsaturated hydrocarbons.	68
Chapter 4. The Monovalent Hydroxyl Function: Monohydric Alcohols	69
Occurrence and preparation of the alcohols.	71
Physical properties of the alcohols	74
General chemical properties of the alcohols	75
Methyl alcohol	76
Ethyl alcohol	77
Alcoholic fermentation	78
Propyl alcohols	85
Butyl alcohols.	85
Amyl alcohols	86
Optical activity	87
Spontaneous resolution	92
Biochemical resolution.	92
Chemical resolution.	92
Higher alcohols.	96
Unsaturated alcohols.	97
Esters of the alcohols with inorganic acids	100
Esters of the halogen hydracids	100
Esters of nitrous acid	100
Esters of nitric acid	100
Esters of hypochlorous acid	100
Esters of sulphuric acid	101
Esters of sulphurous acid.	101
Esters of phosphoric acid	102
Esters of boric acid	102
Esters of silicic acid	103
Ethers	103
Preparation	103
Properties	104
Chapter 5. The Monovalent Sulphur Function: Alkyl Sulphur Com- pounds.	107
Thio-alcohols. Mercaptans.	107
Thio-ethers. Alkyl sulphides	109
Sulphoxides and sulphones.	111
Alkyl sulphonic acids	111
Chapter 6. Monovalent Nitrogen Function	112
I. Amines.	112
Methods of preparation	113
Properties of amines.	116
II. Alkyl derivatives of hydrazine	120
III. Alkyl derivatives of hydroxylamine	121
IV. Aliphatic nitro-compounds.	121

	page
Chapter 7. Organic Derivatives of Other Elements	125
Aliphatic phosphorus compounds	125
Aliphatic arsenic compounds	126
Aliphatic antimony and bismuth compounds	128
Aliphatic silicon compounds	129
Aliphatic germanium compounds	130
Organic compounds of tin	130
Organic lead compounds	131
Organic compounds of boron	132
Organic compounds of aluminium	133
Organic compounds of magnesium	133
Organic compounds of zinc	135
Organic compounds of cadmium	136
Organic compounds of mercury	136
Organic compounds of copper, silver, gold, and platinum	136
Organic compounds of chromium	137
Organic compounds of the alkali metals	137

Section II. Compounds with a Divalent Function

Chapter 8. The Divalent Halogen Function: Gem.-Dihalogen Derivatives	138
Chapter 9. The Divalent Oxygen Function: Aldehydes and Ketones	139
Aldehydes	139
Formaldehyde, Methanal	146
Acetaldehyde, Ethanal	148
Higher aldehydes	149
Unsaturated aldehydes	149
Ketones	152
Acetone	156
Higher ketones	158
Unsaturated ketones	158
Ketenes	160

Section III. Compounds with a Trivalent Function

Chapter 10. The Trivalent Halogen Function.	161
Chapter 11. Trivalent Nitrogen Functions. Hydrocyanic acid. Nitriles	163
Hydrocyanic acid, or Prussic acid.	163
Nitriles	167
Isonitriles	168
Chapter 12. The Trivalent Oxygen Function. Monobasic Carboxylic Acids	169
Saturated monobasic carboxylic acids. Fatty acids,	169
Formic acid	176
Acetic acid	177
Propionic acid	179
Butyric acids,	179
Valeric acids,	180
Higher fatty acids	181
Monobasic unsaturated acids with ethylenic linkages; acrylic or oleic acid series, $C_nH_{2n-1}COOH$	182
Unsaturated carboxylic acids with two or three ethylenic linkages	187

	page
Unsaturated carboxylic acids with the triple bond.	187
Esters of the carboxylic acids.	188
Fruit essences	189
Waxes	190
Fats and oils.	190
Phosphatides.	194
Lecithins.	195
Esters of the <i>ortho</i> -carboxylic acids	196
Acid halides of the carboxylic acids	196
Acid anhydrides	197
Acid amides	198
Imino-ethers. Amidines	200
Hydroxamic acids	200
Acid hydrazides. Hydrazidines. Acid azides.	201

Section IV. Compounds with Tetravalent Functions

Chapter 13. Simple Tetrasubstitution Products of Methane	202
Tetravalent halogen function.	202
Halogen-, sulphur-, and nitrogen-containing derivatives of carbonic acid	203
Phosgene, carbonyl chloride	203
Chlorocarbonic esters	204
Carbon oxysulphide.	204
Carbon disulphide	204
Carbamic acid and its derivatives.	205
Urea	206
Guanidine.	208
Thiourea	209
Cyanic acid	209
Fulminic acid	212
Thiocyanic acid	213

Section V. Compounds with Two Functions in the Molecule

Chapter 14. Compounds with Two Monovalent Functions	215
Dihalogen compounds.	215
Glycols	217
Mono- and di-thioglycols	221
Amino-alcohols.	222
Diamines	223
Chapter 15. Polyhalogen Compounds. Halogen Derivatives of Aldehydes and Carboxylic Acids	226
I. Polyhalogen derivatives	226
II. Halogen derivatives of the aldehydes and carboxylic acids	227
Chloral	227
Halogen substituted fatty acids	227
Chapter 16. Oxidation Products of Glycol.	229
Hydroxyaldehydes . Hydroxyketones.	229
Dialdehydes. Diketones	231
Monohydroxy-carboxylic acids	235
Aldehydic carboxylic acids.	238
Ketonic carboxylic acids.	239
Pyruvic acid	239
Acetoacetic acid	240
Laevulinic acid	245

	page
Chapter 17. Cyanogen. Dicarboxylic Acids	245
I. Cyanogen.	245
II. Free thiocyanogen	246
III. Saturated dicarboxylic acids	247
Oxalic acid	249
Malonic acid.	250
Succinic acid.	253
Glutaric acid.	254
Adipic acid	254
Pimelic acid.	254
Suberic acid	254
Azelaic acid.	254
Sebacic acid	254
IV. Unsaturated dicarboxylic acids.	255
Maleic and fumaric acids	255
Citraconic, mesaconic, and itaconic acids	257
 Chapter 18. Amino-carboxylic acids and Proteins.	 258
I. Amino-carboxylic acids	258
Aliphatic diazo-compounds	266
Polypeptides	268
Stereochemistry of the α -amino-acids	272
II. Proteins	276
Types of proteins.	279
 Section VI. Compounds with Three or More Functions in the Molecule	
 Chapter 19. Poly-alcohols	 280
Glycerol.	280
Erythritol	282
Pentaerythritol.	284
Pentitols.	284
Hexitols.	285
Heptitols	286
 Chapter 20. Oxidation Products of the Polyhydric Alcohols (with the exception of Carbohydrates).	 286
Tartronic acid	286
Malic acid.	286
Oxalacetic acid.	287
Mesoxalic acid.	288
Tartaric acids	288
Citric acid.	290
 Chapter 21. Carbohydrates	 291
I. Monosaccharides.	292
Configuration of the sugars and their related derivatives	303
Synthesis of natural sugars.	312
Detection of sugars	314
Some monosaccharides	314
Glucuronic acid. Galacturonic acid. Mannuronic acid	317
Amino-sugars	318
Chitin	318

	page
II. Polysaccharides resembling sugars.	319
Some polysaccharides resembling sugars	321
A. Disaccharides.	321
B. Trisaccharides.	325
C. Tetrasaccharides.	325
III. Polysaccharides not resembling sugars.	325
Starch	326
Glycogen	328
Inulin.	329
Pectins	330
Cellulose	330
Wood.	333
Lichenin (reserve cellulose)	334
Hemicelluloses.	334
Artificial silk.	335

Part II. Carbocyclic Compounds

A. Aromatic Compounds

Chapter 22. Introduction. Constitution of Benzene	339
Constitution of benzene	340
Substitution isomerism in the benzene series	347

Section I. Compounds with a Monovalent Function

Chapter 23. Aromatic Hydrocarbons	348
Benzene.	348
Homologues of benzene	354
Hydrocarbons with more than one uncondensed benzene nucleus	358
Aromatic hydrocarbons with 'trivalent' carbon	362
Unsaturated aromatic hydrocarbons.	364
Aromatic hydrocarbons with condensed benzene nuclei	367
Naphthalene.	367
Acenaphthene	370
Perylene.	370
Anthracene	371
Phenanthrene	372
Chapter 24. Halogen Derivatives of Aromatic Hydrocarbons.	374
Benzene derivatives substituted with halogen in the side-chain	380
Chapter 25. Nitro-compounds of Aromatic Hydrocarbons	381
Nitro-compounds with the nitro-group in the side-chain	384
Chapter 26. Nitroso- and Hydroxylamine Derivatives of Aromatic Hydrocarbons.	384
Nitroso-compounds	384
Hydroxylamine derivatives.	385
Chapter 27. Aromatic Sulphonic Acids and their Reduction Products	
Sulphinic acids.	387
Thiophenols.	387
Halogen and nitro-benzene sulphonic acids.	388

	page
Chapter 28. Phenols	388
Monohydric phenols	388
Preparation of phenols	388
Properties of phenols	391
Individual monohydric phenols	393
Polyhydric phenols	396
Dihydroxybenzenes	396
Trihydroxybenzenes	400
Polyhydroxybenzenes	403
Naphthols	404
Hydroxy-anthracenes	405
Chapter 29. Halogen Compounds of Phenols , Sulphonic Derivatives of Phenols. and Nitrophenols	406
Halogen derivatives of phenols	406
Phenol - and naphthol sulphonic acids	406
Nitrophenols	408
Chapter 30. Aromatic Alcohols	411
Chapter 31. Aromatic Amines	412
Aromatic monoamines	415
Aniline	415
Homologues of aniline	418
Aromatic diamines	419
Naphthylamines	422
Aromatic amines with the amino-group in the side chain.	422
Halogen derivatives of aromatic amines	423
Nitro-derivatives of aromatic amines	423
Sulphonic acids of aromatic amines	425
A. Sulphonic acids of aniline	425
B. Sulphonic acids of the naphthylamines	425
Aminophenols	427
Chapter 32. Acid Derivatives of the Aromatic Amines	428
Organic acyl-derivatives of the aromatic amines	428
Inorganic acid derivatives of the amines	430
1. Thionylamines	430
2. Sulphamic acids	430
3. Nitranilides	430
4. Nitrous acid derivatives. Diazonium salts	431
Substitution of the diazo-group by other radicals	435
Reduction and oxidation of diazonium salts	438
Chapter 33. Azo-Compounds. Azo-Dyes.	439
Colour and dyes	442
Azo-dyes	445
Azoxy-compounds	454
Chapter 34. Aromatic derivatives of hydrazine	455
Hydrazo-compounds	455
Tetra-arylhydrazines	457
Chapter 35. Aromatic Phosphorus, Arsenic, and Antimony Compounds	458
Phosphorus derivatives	458
Arsenic compounds	459
Antimony compounds	461
Aryl alkali-metal compounds	461

Section II. Compounds with Di- and Trivalent Functions		page
Chapter 36. Aromatic aldehydes.		462
Benzaldehyde.		462
Other aromatic aldehydes		463
Chapter 37. Aromatic ketones.		467
Individual ketones		472
Unsaturated ketones		474
Hydroxy-ketones		475
Chapter 38. Simple Aromatic Carboxylic Acids.		479
Benzoic acid.		479
Derivatives of benzoic acid.		480
Benzonitrile, phenyl cyanide.		481
Homologues of benzoic acid		482
Unsaturated aromatic carboxylic acids.		483
Vulpinic acid		485
Chapter 39. Polybasic Aromatic Carboxylic Acids		486
Chapter 40. Chloro-, Nitro-, and Amino-derivatives of aromatic carbo- xyllic acids		490
Chlorobenzoic acids.		490
Nitrobenzoic acids		490
Aminobenzoic acids.		491
Chapter 41. Aromatic Hydroxy-acids		492
A. Hydroxy-acids with a phenolic nature		492
1. Monohydroxy-acids		492
2. Dihydroxy -acids		496
3. Trihydroxy-acids.		500
4. Tannins		501
B. Aromatic Hydroxy-acids with an alcoholic nature		504
 Section III. Pyrone compounds. Indigo dyes 		
Chapter 42. Derivatives of α - and γ -pyrone.		506
A. Derivatives of α -pyrone		506
Coumarin derivatives		507
Derivatives of dibenzo- α -pyrone		508
B. Derivatives of γ -pyrone		509
Chromone		509
Flavone.		510
Flavanone derivatives.		514
Isoflavone derivatives.		515
Dyes of brazil-wood and logwood.		516
Xanthone		516
Chapter 43. Anthocyanins. Catechins		517
Catechins		521
Chapter 44. Indigo Dyes.		522
Indigo		522
Indigo derivatives . Indigoids.		528
Thio-indigo		528

Section IV. Quinones

	page
Chapter 45. Benzoquinones and their simpler Derivatives	531
Individual quinones.	534
Derivatives of benzoquinone	536
A. Quinone oximes.	536
B. Quinone-imines	537
C. Indophenols. Indamines	538
Aniline black	539
Chapter 46. Naphthaquinones. Phenanthraquinone.	541
Dyes derived from the naphthaquinones	541
Phenanthraquinone.	544
Chapter 47. Anthraquinone and its derivatives	544
Anthraquinone.	544
Anthraquinone sulphonic acids	546
Hydroxy-anthraquinones	547
Trihydroxy-anthraquinones	550
Polyhydroxy-anthraquinones.	550
Amino-anthraquinones	552
Vat dyes of the anthraquinone series	554
(a) Indanthrene dyes	554
(b) Flavanthrene dyes.	554
(c) Benzanthrone dyes	555
(d) Anthraquinone imine dyes and acylaminoanthraquinones	557
(e) Anthraquinone-acridone dyes.	558
Chapter 48. Dyes derived from Fuchsone	558
Hydroxy-derivatives of fuchsone	561
Fuchsone-imonium dyes.	563
(a) Malachite green class	563
(b) Fuchsine class	564
Chapter 49. Quinone dyes with closed rings.	567
A. Phenazine dyes	568
B. Oxazine dyes	574
C. Thiazine dyes.	576
D. Sulphur dyes	578
Blue sulphur dyes.	579
Yellow sulphur dyes.	581
E. Acridine dyes.	582
F. Xanthylium salts	585
(a) Pyronines	585
(b) Rosamines	586
(c) Rhodamines	586
(d) Fluoresceins	587

B. Alicyclic Compounds

Chapter 50. Introduction	588
Natural occurrence of naphthenes, terpenes and camphors	589
Synthetic alicyclic compounds	590
Ring-fission of alicyclic compounds	592
Conversion of one ring system into another.	593
(a) Methods of contracting the ring	593
(b) Methods of expanding the ring.	595

	page
Chapter 51. Cyclopropane and its derivatives.	596
Chapter 52. Cyclobutane and its derivatives	599
Chapter 53. Cyclopentane and its derivatives.	603
Fulvenes	604
Ketones of the cyclopentane series	605
Carboxylic acids of the cyclopentane series	606
Chapter 54. Cyclohexane and its derivatives (excluding aromatic compounds).	609
Connection between <i>cyclohexane</i> derivatives of aromatic and alicyclic character	609
Occurrence and preparation of <i>cyclohexane</i> compounds.	612
Stereoisomerism of the <i>cyclohexane</i> compounds	613
Hydrocarbons of the <i>cyclohexane</i> series.	615
A. Saturated hydrocarbons	615
B. Unsaturated hydrocarbons with one double bond	616
C. Unsaturated hydrocarbons with two double bonds	618
Cyclohexatriene.	623
Alcohols of the <i>cyclohexane</i> series	624
Hydroxyl derivatives of <i>cyclohexane</i>	624
Alcohols derived from <i>p</i> -menthane	626
Aldehydes and ketones of the cyclohexane series	630
Aldehydes.	630
Saturated ketones.	630
Unsaturated ketones	632
Exocyclic ketones of the <i>cyclohexane</i> series	635
Carboxylic acids of the <i>cyclohexane</i> series.	636
Chapter 55. Bicyclic terpenes and camphors	640
Thujane group.	641
Carane group	643
Pinane group	644
Camphane group.	646
Chapter 56. Sesquiterpenes. Polyterpenes. Sterols. Vitamins. Caoutchouc.	651
Sesquiterpenes.	651
Carotenoid pigments	655
Sterols	659
Bile acids	662
Sexual hormones	663
Hormones of the adrenal cortex	667
Vitamins	672
Caoutchouc	678
Chapter 57. Cycloheptane and its derivatives.	681
Chapter 58. Cyclooctane and its derivatives. Alicyclic compounds with higher ring systems.	684

Part III. Heterocyclic Compounds

Section I. Simpler Heterocyclic Compounds with more or less Aromatic Nature		page
Nature		691
Chapter 59. Five-membered Heterocyclic Rings with one Hetero-atom		693
Furan group.		693
Furan.		694
Coumarone		696
Thiophen group		700
Thiophen		700
Homologues of thiophen.		700
Thionaphthen		702
Pyrrole group		703
Pyrrole		704
Homologues of pyrrole		707
Colouring matter of blood		707
Chlorophyll		712
Reduction products of pyrrole		715
Carboxylic acids of pyrrole and its hydrogenation products.		715
Indole group.		717
Carbazole		721
Chapter 60. Five-membered Heterocyclic Rings with two or more Hetero-atoms.		722
A. Five-membered rings with two hetero-atoms.		722
Oxazole derivatives		722
Thiazole derivatives.		723
Iminazole (glyoxaline) and its derivatives		724
Pyrazole and its derivatives		727
B. Five-membered heterocyclic rings with three or more hetero-atoms		731
Furazanes		731
1 : 2 : 3-Triazoles.		731
1 : 2 : 4-Triazoles.		733
Tetrazole		734
Chapter 61. Six-membered Heterocyclic Rings with One Hetero-atom.		735
Pyran derivatives.		735
Pyridine and its derivatives		737
Quinoline compounds.		742
Isoquinoline		746
Chapter 62. Six-membered Heterocyclic Rings with two or more Hetero-atoms.		747
Diazines.		747
Pyrimidines		748
Pyrazines		751
Purine compounds		753
Uric acid		753
Xanthine		757
Hypoxanthine		758
Adenine.		758
Guanine.		758
Nucleic acids.		759
Triazines		762
Tetrazines.		763

Section II. Alkaloids

	page
Chapter 63. Definition. Occurrence. Isolation	764
Chapter 64. Alkaloids of the Aromatic Amine type	766
1. Derivatives of anthranilic acid	766
2. Benzylamine derivatives.	767
3. Derivatives of phenylethylamine	767
Ephedrine and Pseudo-ephedrine	767
Tyramine	769
Hordenine.	769
Adrenaline	769
Mezcaline.	770
Chapter 65. Alkaloids with a Pyrrole Nucleus.	771
Stachydrine.	771
Betonicine and Turicine.	771
Hygrine and Cuskygrine	771
Nicotine.	772
Chapter 66. Pyridine Alkaloids	774
1. Hemlock alkaloids	774
Coniine	775
γ -Coniceine	775
Conhydrine	776
2. Trigonelline.	777
3. Areca alkaloids	778
Arecaidine and arecoline	778
Guvacine and guvacoline	779
4. Alkaloids of pepper.	779
Piperine.	779
5. Ricinine, Lobeline, Anabasine	780
Chapter 67. Alkaloids with condensed Pyrrolidine- and Piperidine-rings	782
1. Atropine group	782
Atropine	782
Tropelines	785
Hyoscyamine	786
Convolamine.	786
Scopolamine.	786
2. Cocaine group.	787
Cocaine.	787
Tropacocaine	790
Cinnamyl-cocaine	790
α - and β -Truxilline	790
Benzoyl-ecgonine.	791
3. Alkaloids of Pomegranate bark.	791
Pseudo-pelletierine	791
Isopelletierine	792
4. Alkaloids of the Broom and Lupin group	792
Chapter 68. Cinchona Alkaloids (Alkaloids with a Quinoline ring)	794
Cinchonine	794
Cinchonidine	797
Quinine.	797
Quinidine	801
Cupreine	801

	page
Chapter 69. Alkaloids with an Isoquinoline ring	802
1. Anhalonium alkaloids.	802
2. Papaverine group	802
Papaverine	802
Laudanosine.	804
Laudanine.	805
Narcotine	806
Narceine	809
Hydrastine	810
3. Berberine group	811
Berberine	811
Canadine	814
Corydaline	814
Chapter 70. Morphine and Cryptopine Alkaloids. Colchicine.	815
1. Morphine alkaloids.	815
Morphine and Codeine	815
Thebaine	819
2. Colchicine	820
3. Alkaloids of the Cryptopine type	821
Chapter 71. Carboline Alkaloids. Vasicine (Peganine)	823
Harmine alkaloids	823
Yohimbine	823
Evodiamine. Rutaecarpine.	824
Vasicine (Peganine).	824
Chapter 72. Alkaloids of Ergot, Pilocarpine, Eserine, and Alkaloids of Unknown Constitution.	825
Alkaloids of ergot	825
Pilocarpine	826
Aconitine	827
Cytisine.	827
Emetine.	827
Physostigmine or eserine.	827
Strychnine and brucine	828
The Production of Alkaloids in Nature	828
Robinson's theory of phytochemical synthesis of alkaloids	830

Part IV. Organic Compounds with Heavy Hydrogen

Methods of preparation	835
Properties	837

Tables

Compounds of most frequent occurrence in coal-tar	843
Compounds definitely present in coal-tar arranged in order of boiling points	844
Number of structural isomerides of some aliphatic compounds	847
Number of isomerides of paraffins and alcohols	848
Number of structural isomerides of cyclic hydrocarbons	848
Number of structural isomerides of the substitution products of some cyclic compounds	848
World production of coal, 1936.	849

	page
Estimate of the coal reserves of the world (1923)	849
Increase in the production of mineral oil	849
Estimate of World sugar production	850
Comparison of World-production of beet-sugar and cane-sugar (1895-1937)	850
Relative sweetness of various organic substances	851
Consumption of alcoholic beverages in some civilised countries	851
Classification of smells of organic compounds	852
Minimal concentrations of some perfumes which can be detected	852
More important poisonous compounds occurring in industry	853
Best-known poisonous substances used in warfare	853
Effects of corrosive and poisonous gases and vapours	854
Limits of tolerance of human beings towards poisonous substances	855
Annual production of morphine, heroin, and cocaine	855
Opium production	856
World production and use of the more important textiles	856
Amount of cotton, natural silk, and artificial silk produced by the more important producing countries.	856
Percentage of various textiles in clothing	856
Sections of various textiles	857
Various textiles.	858
Percentage of various artificial silks produced in 1937	859
Chemical imports and exports of various countries	859
Production of coal-tar dyes.	859
Comparison of properties of some explosives	860
Dissociation constants of some important organic bases	860
Dissociation constants of the more important organic acids	861
Intervals over which indicators change colour	861
Constants of normal primary alcohols	862
Atomic refractions	862
 Important dates in the history of Organic Chemistry.	 863
References	867
Index.	873
