

CONTENTS

I. Outline of a Procedure for the Characterization of Organic Compounds	1
II. Part A. Determination of Physical Constants	5
II. Part B. Qualitative Analysis for Nitrogen, Sulfur and Halogens	38
III. The Solubilities of Organic Compounds	44
IV. The Class Reactions	81
V. Laboratory Experiments with the Class Reactions	129
VI. Separations of Mixtures of Organic Compounds	160
VII. The Selection and Preparation of Derivatives	183
Appendix A. List of Experiments	281
Appendix B. List of Compounds and Reagents Required for Experiments	284
Index	287
