

CONTENTS

1. Introduction	1
2. Analysis Structure Classification	10
3. Alkanes Cycloalkanes	34
4. Alkenes	65
5. Alkynes Petroleum	87
6. resonance Alkadienes Rubber	100
7. Haloalkanes Unsaturated Halogen Derivatives	109
8. Monohydric Alcohols	133
9. Optical Isomerism Unsaturated Alcohols Polyhydric Alcohols	164
10. Ethers	185
11. Aldehydes Ketones	200
12. Monocarboxylic Acids	228
13. Unsaturated Monocarboxylic Acids Certain Acid Derivatives	250
14. Polycarboxylic Acids Hydroxy Acidss	265
15. Esters	295
16. Lipids	322
17. Aliphatic Amines Amides	334
18. Cyanides Nitro Compounds Other Nitrogen Derivatives	361
19. Amino Acids Proteins	379
20. Metalloorganic Compounds Arsenic, Sulfur, and Silicon Derivatives	403
21. Carbohydrates Monosaccharides	420
22. Carbohydrates Oligosaccharides Polysaccharides	446
23. Aromatic Hydrocarbons	469
24. Benzene series	489
25. Aromatic Halogen, Sulfonic, and Nitro Derivatives	500
26. Aromatic Amines Diazo Compounds	527
27. Aromatic Alcohols Phenols Aromatic Ethers	552
28. Aromatic Aldehydes Aromatic Ketones Quinones	577
29. Aromatic Acids Acid Derivatives	590
30. Hydroxy Aromatic Acids Deprotic Aromatic Acids	603
31. Aromatic Arsenicals and Mercurials	614
32. Polynuclear Compounds	621
33. Heterocyclic Compounds	643
34. Heterocyclic Compounds (continued)	663
35. Terpenes and Related Compounds	678
36. Alkaloids Medicinal Glycosides	691

37. Synthetic Dyes	716
38. Enzymes Antibiotics	734
39. Steroids Hormones Natural Pigments Vitamins	751
Appendix	771
Index	781
