<i>preface</i>	vii
<i>to the student</i>	xxvii

1	FUNDAMENTAL FACTS AND PRINCIPLES	1
1.1	DETERMINATION OF MOLECULAR FORMULA	2
	<i>purification methods</i>	2
	<i>combustion analysis</i>	4
	<i>composition</i>	4
	<i>empirical formula</i>	5
	<i>molecular formula</i>	5
	<i>mass spectroscopy</i>	6
1.2	DETERMINATION OF STRUCTURAL FORMULA	8
	<i>the problem of isomerism</i>	8
	<i>diffraction analysis</i>	8
	<i>molecular spectroscopy</i>	10
	<i>infrared spectroscopy</i>	12
	<i>electronic and rotational spectroscopy</i>	14
	<i>nuclear-magnetic-resonance spectroscopy</i>	15
1.3	THEORETICAL MODELS FOR MOLECULAR STRUCTURE	19
	<i>the ionic bond</i>	19
	<i>the covalent bond</i>	20
	<i>molecular geometry</i>	22
	<i>charge distribution</i>	23
1.4	CHEMICAL REACTIVITY	25
	<i>types of organic reactions</i>	25
	<i>reaction mechanisms</i>	26
	<i>reactive intermediates</i>	28
	<i>functional groups</i>	29
	SUMMARY	31
	PROBLEMS	32

2	ALKANES AND CYCLOALKANES	35
2.1	NOMENCLATURE AND REPRESENTATION	35
	<i>nomenclature of simple alkanes</i>	35
	<i>representation of molecular structure</i>	36
	<i>conformations</i>	39
	<i>the IUPAC nomenclature system</i>	40
2.2	PROPERTIES OF ALKANES	43
	<i>physical properties</i>	43
	<i>spectroscopic properties</i>	46
2.3	CHEMICAL REACTIVITY OF ALKANES	46
	<i>combustion</i>	46
	<i>heat of reaction</i>	47
	<i>bond energies</i>	47
	<i>halogenation</i>	51
	<i>chlorination of methane</i>	51
	<i>other alkanes</i>	54
2.4	REACTION-RATE THEORY	54
	<i>energy of activation</i>	55
	<i>the probability factor</i>	57
2.5	CYCLOALKANES	59
	<i>stereoisomerism of substituted cycloalkanes</i>	60
	<i>ring strain</i>	61
	<i>conformations of cycloalkanes</i>	63
	chemical reactivity	68
	SUMMARY	68
	PROBLEMS	69
3	ALKYL HALIDES	73
3.1	NOMENCLATURE OF ALKYL HALIDES	74
3.2	PROPERTIES OF ALKYL HALIDES	74
	<i>physical properties</i>	74
	infrared spectroscopy	75
	<i>pmr spectroscopy</i>	76
	<i>conformational effects</i>	78
3.3	NUCLEOPHILIC SUBSTITUTION REACTIONS AT CARBON	79
	<i>structure and reactivity</i>	79
	<i>reaction-rate studies</i>	80

3·4	THE S_N2 MECHANISM	81
	<i>transition-state configuration</i>	82
	<i>nucleophilicity</i>	83
3·5	THE S_N1 MECHANISM	84
	<i>solvent effects</i>	85
	<i>the rate-determining step</i>	86
	stereochemistry of S_N1 reactions	87
3·6	CARBONIUM-ION INTERMEDIATES	88
	<i>carbonium-ion stability</i>	88
	<i>the Hammond postulate</i>	89
	<i>molecular rearrangement</i>	90
3·7	ELIMINATION REACTIONS	91
	<i>the E2 mechanism</i>	92
	<i>the Saytzeff rule</i>	92
	<i>transition-state configuration</i>	93
	<i>basicity and acidity</i>	94
	<i>the E1 mechanism</i>	96
3·8	ORGANOMETALLIC COMPOUNDS	97
	<i>formation of organometallic compounds</i>	97
	<i>reactions of organometallic compounds</i>	98
	SUMMARY	100
	PROBLEMS	101

4 ALKENES 107

4·1	NOMENCLATURE OF ALKENES AND CYCLOALKENES	108
4·2	STRUCTURE AND PROPERTIES OF ALKENES	110
	<i>spectroscopic properties</i>	110
	<i>stereoisomerism of alkenes</i>	112
4·3	THE LCAO BONDING MODEL	115
	<i>sigma bonding</i>	116
	<i>pi bonding</i>	118
	<i>tau bonding</i>	120
4·4	STRUCTURE AND STABILITY IN ALKENES	121
	<i>heats of hydrogenation</i>	121
	<i>thermodynamic stability</i>	122
	SUMMARY	124
	PROBLEMS	125

5	REACTIONS OF ALKENES	127
5.1	ADDITION OF BRONSTED ACIDS TO ALKENES	127
	<i>Markovnikov's rule</i>	128
	<i>mechanism for addition reactions</i>	129
	<i>testing the mechanism</i>	130
5.2	ADDITION OF LEWIS ACIDS TO ALKENES	132
	<i>halogen addition</i>	132
	<i>hypohalous acid addition</i>	133
	<i>diborane addition</i>	133
5.3	ADDITION MECHANISMS AND STEREOCHEMISTRY	135
5.4	COORDINATION OF ALKENES WITH TRANSITION METALS	138
5.5	OXIDATION REACTIONS OF ALKENES	140
	<i>oxidation-reduction terminology</i>	140
	<i>hydroxylation</i>	140
	<i>ozonolysis</i>	142
	<i>ozone reactions</i>	142
	<i>mechanism of ozonolysis</i>	144
5.6	ADDITION OF RADICALS TO ALKENES	144
5.7	DIMERIZATION AND POLYMERIZATION	145
5.8	ADDITION OF CARBENES TO ALKENES	148
5.9	ADDITION REACTIONS OF CYCLOPROPANE	149
	SUMMARY	151
	PROBLEMS	152

6	ALKYNES	155
6.1	NOMENCLATURE OF ALKYNES	156
6.2	STRUCTURE AND PROPERTIES OF ALKYNES	157
	<i>structure-composition relationship</i>	157
	<i>structural and bonding characteristics</i>	158
	<i>spectroscopic properties</i>	159
	<i>acidity of ethynyl hydrogen atoms</i>	160
6.3	ADDITION REACTIONS OF ALKYNES	162
	<i>hydrogen addition</i>	162

	<i>reactions with electrophilic reagents</i>	163
	<i>halogen</i>	163
	<i>Brønsted acids</i>	163
	<i>hydration and tautomerism</i>	164
	<i>the nucleophilicity of alkynes</i>	166
	<i>reactions with nucleophilic reagents</i>	167
6.4	ADDITION REACTIONS WITH DIBORANE	168
6.5	OXIDATION REACTIONS OF ALKYNES	169
6.6	DIMERIZATION, TRIMERIZATION, AND POLYMERIZATION	169
	SUMMARY	172
	PROBLEMS	173
7	STEREOCHEMISTRY	177
7.1	OPTICAL ACTIVITY	177
	<i>plane-polarized light</i>	177
	<i>optical isomerism</i>	179
7.2	ENANTIOMERISM	180
	<i>elements of symmetry</i>	181
	<i>axis of symmetry</i>	181
	<i>mirror plane of symmetry</i>	182
	<i>center of symmetry</i>	182
	<i>molecular chirality</i>	183
	<i>racemic modifications</i>	186
7.3	DIASTEREOISOMERISM	187
7.4	RESOLUTION OF ENANTIOMERS	189
7.5	CONFIGURATION	191
	<i>the structural dilemma</i>	191
	<i>conjugational notation</i>	192
	<i>the Cahn-Ingold-Prelog nomenclature rules</i>	193
7.6	CONFORMATIONAL ANALYSIS	196
	SUMMARY	199
	REFERENCES	200
	PROBLEMS	200

8	ALCOHOLS AND ETHERS	205
8.1	NOMENCLATURE OF ALCOHOLS AND ETHERS	206
8.2	PROPERTIES OF ALCOHOLS AND ETHERS	208
	hydrogen-bonding <i>effects</i>	208
	spectroscopic properties	209
8.3	SPIN-SPIN INTERACTIONS	211
	predicting spin-spin splitting patterns	213
	the spin-spin coupling constant	214
	proton exchange and spin-spin coupling	215
8.4	CHEMICAL REACTIVITY OF ALCOHOLS AND ETHERS	217
	<i>acidity</i> and basicity of alcohols and ethers	219
8.5	ELECTROPHILIC SUBSTITUTION AT OXYGEN	221
	ester formation	221
	Williamson ether synthesis	222
	oxime formation	224
8.6	NUCLEOPHILIC SUBSTITUTION REACTIONS	225
	<i>sulfonate</i> esters as leaving groups	225
	<i>sulfite</i> and phosphite ester intermediates as leaving groups	227
	conjugate acids as leaving groups	229
	ring-opening reactions of oximes	230
8.7	ELIMINATION REACTIONS	231
	dehydration	231
	oxidation and dehydrogenation	233
8.8	THIOLS, SULFIDES, AND PEROXIDES	235
	SUMMARY	237
	PROBLEMS	239
9	AROMATIC COMPOUNDS	245
9.1	THE BENZENE PUZZLE	246
9.2	CONJUGATED DIENES AND POLYENES	248
	thermodynamic stability	248
	ultraviolet-visible spectroscopy	250
	conjugation in benzene	253
9.3	THEORETICAL MODELS FOR BENZENE	254
	the molecular-orbital <i>model</i>	254
	the resonance model	256

9.4	NOMENCLATURE AND PROPERTIES OF AROMATIC COMPOUNDS	259
	<i>compounds related to benzene</i>	259
	<i>properties of aromatic hydrocarbons</i>	261
	<i>ultraviolet-visible spectroscopy</i>	261
	infrared spectroscopy	262
	<i>pmr spectroscopy</i>	262
9.5	CONFORMATIONAL ENANTIOMERISM IN BIPHENYLS	265
9.6	ELECTROPHILIC SUBSTITUTION REACTIONS OF BENZENE	268
	<i>electrophilic attack on the benzene ring</i>	268
	<i>halogenation</i>	268
	nitration	268
	sulfonation	269
	Friedel-Crafts alkylation	269
	<i>a mechanism for electrophilic aromatic substitution</i>	270
	<i>oxidation of alkyl side chain</i>	272
9.7	CRITERIA OF AROMATICITY	273
	<i>minor changes in the benzene ring</i>	273
	<i>other cyclic conjugated polyenes</i>	274
	<i>the Huckel rule</i>	276
	six-π-electron systems	276
	two-π-electron systems	280
	ten-π-electron systems	280
	fourteen-π-electron systems	281
	eighteen-π-electron systems	282
	SUMMARY	282
	PROBLEMS	284

10 ARYL HALIDES AND PHENOLS 289

10.1	ARYL HALIDES	289
10.2	REACTIONS OF ARYL HALIDES: THE HALIDE GROUP	291
	<i>nucleophilic displacement of halide</i>	291
	<i>elimination reactions</i>	295
	<i>formation of organometallic compounds</i>	296
10.3	REACTIONS OF ARYL HALIDES AT THE AROMATIC RING	297
10.4	PHENOLS AND THEIR DERIVATIVES	299
10.5	REACTIONS OF PHENOLS	302
	<i>acidity of phenols</i>	302
	<i>substitution reactions at oxygen</i>	304

	<i>substitution at carbon</i>	305
	reactions at the aromatic ring	305
10·6	QUINONES	307
10·7	NONBENZENOID COMPOUNDS RELATED TO PHENOLS	309
10.8	BENZYL AND ALLYL HALIDES AND ALCOHOLS	310
	<i>S_N2 reactions of benzyl halides</i>	310
	<i>S_N2 reactions of allyl and propargyl halides</i>	312
	<i>S_N1 reactions of benzyl derivatives</i>	313
	<i>S_N1 reactions of allyl derivatives</i>	315
	<i>stability of benzyl and allyl intermediates</i>	316
	SUMMARY	317
	PROBLEMS	319
11	AMINES	323
11.1	NOMENCLATURE OF AMINES	323
11.2	NATURALLY OCCURRING AMINES	325
	<i>alkaloids</i>	325
	<i>hormones and drugs</i>	327
11.3	STRUCTURE AND PROPERTIES OF NITROGEN COMPOUNDS	328
	<i>bonding and stereochemistry</i>	328
	<i>a modified structure-composition relationship</i>	329
	<i>hydrogen-bonding effects in amines</i>	330
	<i>spectroscopic properties</i>	330
	<i>basicity of amines</i>	333
11.4	ELECTROPHILIC SUBSTITUTION AT NITROGEN	335
	<i>N-alkylation</i>	335
	<i>N-acylation and sulfonation</i>	337
	<i>N-nitrosation</i>	338
	<i>N-oxidation</i>	339
11.5	DISPLACEMENT AND ELIMINATION OF NITROGEN FROM ALIPHATIC AMINES	340
	<i>quaternary salts as leaving groups</i>	340
	<i>amine oxides as leaving groups</i>	342
11.6	RING-SUBSTITUTION REACTIONS OF AROMATIC AMINES	343
11.7	REACTIONS OF ARYL DIAZONIUM SALTS	344
	<i>displacement of nitrogen</i>	344
	<i>the S_N1 mechanism</i>	345
	<i>radical decomposition</i>	346

nucleophilic attack at nitrogen	347
diazo coupling reactions	348
reduction of the diazonium cation	350
11·8 METHODS OF PREPARING AMINES	350
11.9 PHOSPHINES	352
SUMMARY	353
PROBLEMS	354

12 ALDEHYDES AND KETONES 361

12·1 NOMENCLATURE OF ALDEHYDES AND KETONES	363
12.2 PROPERTIES OF ALDEHYDES AND KETONES	364
<i>structure</i> and bonding of the carbonyl group	364
physical properties	365
spectroscopic properties	366
<i>ultraviolet-visible</i> spectroscopy	366
<i>infrared</i> spectroscopy	367
pmr spectroscopy	368
12·3 REVERSIBLE ADDITION REACTIONS	369
formation of hydmtes, hemiacetals, and hemiketals	370
formation of acetals and ketals	371
cyanohydrin formation	373
formation of imines and related compounds	374
<i>oximes</i> , hydrazones, and <i>semicarbazones</i>	375
reduction of imines to amines	378
12.4 IRREVERSIBLE ADDITION TO THE CARBONYL GROUP	379
reduction by complex metal <i>hydrides</i>	379
reduction by diborane	380
reactions with <i>organometallic</i> reagents	380
the Wittig reaction	381
12·5 REDUCTIVE DEOXYGENATION OF CARBONYL COMPOUNDS	383
oxidation reactions	384
12·6 REACTIONS VIA ENOL INTERMEDIATES	385
conjugate acids and bases of carbonyl compounds	387
12·7 REACTIONS OF ENOLATE ANIONS	391
<i>alkylation</i> reactions	392
the <i>aldol</i> condensation	394
SUMMARY	398
PROBLEMS	399

13 CARBOXYLIC ACIDS AND THEIR DERIVATIVES 407

- 13·1** NOMENCLATURE OF CARBOXYLIC ACIDS 407
- 13·2** SOURCES OF CARBOXYLIC ACIDS AND THEIR DERIVATIVES 411
- methods of preparing carboxylic acids* 411
 - oxidation states of carbon* 412
 - organic acid derivatives* 413
- 13·3** PROPERTIES OF CARBOXYLIC ACIDS AND THEIR DERIVATIVES 416
- hydrogen-bonding effects* 416
 - spectroscopic properties* 416
 - infrared spectroscopy* 416
 - pmr spectroscopy* 419
- 13.4** NATURALLY OCCURRING CARBOXYL DERIVATIVES 421
- waxes, fats, oils, and phospholipids* 421
 - soaps and detergents* 423
 - flavor and perfume components* 423
 - proteins* 424
 - alkaloids and other physiologically active compounds* 425
 - insect hormones and pheromones* 430
- SUMMARY 432
- PROBLEMS 432

14 REACTIONS OF CARBOXYLIC ACIDS AND THEIR DERIVATIVES 437

- 14·1** SUBSTITUTION OF HYDROGEN IN THE CARBOXYL GROUP 437
- acidity and salt formation* 437
 - carboxylate oxygen as a nucleophile* 440
- 14·2** SUBSTITUTION OF **HYDROXYL** IN THE CARBOXYL GROUP 441
- esterification* 441
 - acyl halide formation* 443
 - anhydride formation* 443
- 14·3** DECARBOXYLATION REACTIONS 444
- 14.4** REDUCTION OF THE CARBOXYL GROUP 445
- lithium aluminum hydride* 445
 - dibomne* 445
- 14·5** ACYLATION REACTIONS OF CARBOXYLIC ACID DERIVATIVES 446
- reactivity to nucleophilic substitution* 446
 - reactions of acyl halides* 447
 - amines, alcohols, water, and hydrogen peroxide* 447
 - Friedel-Crafts acylation of aromatic rings and alkenes* 448

<i>formyl chloride</i>	449
<i>phosgene</i>	449
<i>ketenes</i>	450
<i>reactions of anhydrides</i>	451
<i>reactions of esters</i>	452
<i>reactions of amides</i>	454
<i>reactions of nitriles</i>	456

14·6	BIOLOGICAL ACYLATION REACTIONS	457
	<i>enzyme catalysis</i>	457
	<i>nerve-impulse transmission</i>	458
14·7	SULFONYLATION AND PHOSPHORYLATION	459
14·8	REDUCTION OF CARBOXYLIC ACID DERIVATIVES	463
