

CONTENTS

	PREFACE	v
<i>Chapter 1</i>	STRUCTURE, IDENTIFICATION, AND NOMENCLATURE	3
1-1	Bonding in Carbon Compounds	3
1-2	Structural Organic Chemistry	6
1-3	Bond Angles and Ball-and-Stick Models	10
1-4	Rotational Conformations	11
1-5	Space-Filling Models	13
1-6	Identification and Structure Determination	14
1-7	■ Nomenclature of Organic Compounds	21
<i>Chapter 2</i>	SPECTROSCOPY OF ORGANIC MOLECULES	25
2-1	Absorption of Electromagnetic Radiation	26
2-2	Infrared Spectroscopy	27
2-3	Electronic Spectra of Organic Molecules	32
2-4	Nuclear Magnetic Resonance Spectroscopy	35
2-5	Mass Spectrometry	46
<i>Chapter 3</i>	ALKANES	51
3-1	Nomenclature	51
3-2	Physical Properties of Alkanes – Concept of Homology	58
3-3	Spectroscopic Properties of Alkanes	60
3-4	Combustion of Alkanes	63
3-5	Estimation of Heats of Combustion. Bond Energies	63
3-6	Halogenation of Alkanes and General Problems Regarding Organic Synthesis	66

	3-7	Practice of Halogenation	75
	3-8	Nitration of Alkanes	77
Chapter 4		CYCLOALKANES	81
	4-1	Nomenclature	81
	4-2	Physical Properties of Cycloalkanes	82
	4-3	Spectroscopic Properties of Cycloalkanes	83
	4-4	Conformations of Cycloalkanes	85
	4-5	Strain in Cycloalkane Rings	92
	4-6	Chemical Properties	94
	4-7	<i>Cis-Trans</i> Isomerism of Substituted Cycloalkanes	96
	4-8	Conformations of Decalin	99
Chapter 5		BONDING IN ORGANIC MOLECULES. ATOMIC ORBITAL MODELS	103
	5-1	Hydrogen-like Atomic Orbitals	103
	5-2	Bond Formation Using Atomic Orbitals	107
	5-3	Directed Covalent Bonds	108
	5-4	Hybrid Bond Orbitals	111
	5-5	Atomic Orbital Models of Organic Compounds	113
	5-6	Bond Orbitals for Atoms Carrying Unshared Electron Pairs	116
	5-7	Interelectronic Repulsion and Bond Angles	117
Chapter 6		ALKENES I. STRUCTURE, SPECTRA, AND STEREOISOMERISM	121
	6-1	Nomenclature	121
	6-2	Physical Properties of Alkenes	124
	6-3	Spectroscopic Properties of Alkenes	124
	6-4	The Structure of Ethylene	129
	6-5	<i>Cis-Trans</i> Isomerism	129
	6-6	Determination of Configuration of <i>Cis-Trans</i> Isomers	132
Chapter 7		ALKENES II. REACTIONS OF CARBON-CARBON DOUBLE BONDS	135
	7-1	Additions to Alkenes. Electrophilic and Nucleophilic Reagents	135
	7-2	Hydrogenation of Alkenes: Heterogeneous Catalysis	137

Contents		xi
7-3	Electrophilic Addition to Alkenes	137
7-4	Orientation in Addition to Alkenes	144
7-5	Additions of Unsymmetrical Reagents Opposite to Markownikoff's Rule	146
7-6	Addition of Boron Hydrides to Alkenes	148
7-7	Oxidation of Alkenes	149
7-8	Polymerization of Alkenes	152
7-9	Synthesis of Organic Compounds	156
Chapter 8	ALKYNES	163
8-1	Nomenclature	164
8-2	Physical Properties of Alkynes	165
8-3	Spectroscopic Properties of Alkynes	165
8-4	Acetylene	168
8-5	Addition Reactions of Alkynes	169
8-6	1-Alkynes as Acids	171
Chapter 9	THE RESONANCE METHOD AND SOME OF ITS APPLICATIONS. THE MOLECULAR- ORBITAL APPROACH	177
9-1	Electron-Pair Bonds	177
9-2	The Benzene Problem	178
9-3	An Atomic-Orbital Model of Benzene	181
9-4	Electron-Pairing Schemes— The Resonance Method	182
9-5	Rules for Use of the Resonance Method	184
9-6	Stabilization and Resonance Energy	191
9-7	Resonance and Absorption Spectra	196
9-8	Molecular Orbital Theory	198
Chapter 10	BIFUNCTIONAL COMPOUNDS. ALKADIENES	203
10-1	Functional Groups as an Aid to the Classification of Organic Compounds	203
10-2	Alkadienes	206
10-3	1,3- or Conjugated Dienes	206
10-4	1,4-Cycloaddition Reactions of Dienes: The Diels-Alder Reaction	207
10-5	1,2-Cycloaddition of Dienes	210
10-6	Polymerization of Conjugated Dienes	210

<i>Chapter 11</i>	NUCLEOPHILIC DISPLACEMENT AND ELIMINATION REACTIONS. ALKYL, CYCLOALKYL, ALKENYL, AND ALKYNYL HALIDES	217
11-1	Organic Derivatives of Inorganic Compounds	217
11-2	Alcohol and Alkyl Halide Nomenclature	219
11-3	Ether Nomenclature	220
11-4	Carboxylic Acid Nomenclature	221
11-5	The Use of Greek Letters to Denote Substituent Positions	221
11-6	Single- or Multiple-Word Names	222
	Nucleophilic Displacement Reactions	223
11-7	General Considerations	223
11-8	Mechanisms of S_N Displacements	227
11-9	Stereochemistry of S_N2 Displacements	230
11-10	Stereochemistry of S_N1 Reactions	233
11-11	Structural and Solvent Effects in S_N Reactions	234
	Elimination Reactions	238
11-12	The E2 Reaction	238
11-13	The E1 Reaction	240
	Alkyl, Alkenyl, and Cycloalkyl Halides	243
11-14	Alkyl Halides	243
11-15	Alkenyl Halides	243
11-16	Cycloalkyl Halides	247
11-17	Polyhalogen Compounds	247
11-18	Fluorinated Alkanes	250
<i>Chapter 12</i>	ORGANOMETALLIC COMPOUNDS	257
12-1	General Properties of Organometallic Compounds	258
12-2	Preparation of Organometallic Compounds	261
12-3	Organomagnesium Compounds	263
12-4	Reactions of Grignard Reagents	263
12-5	Organosodium and Organolithium Compounds	270
12-6	Commercial Applications of Organometallic Compounds	271
12-7	Electrophilic Displacement Reactions at Carbon	272

Chapter 13	ALCOHOLS AND ETHERS	277
13-1	Nomenclature of Carbonyl Compounds	278
13-2	Physical Properties of Alcohols – Hydrogen Bonding	280
13-3	Spectroscopic Properties of Alcohols – Hydrogen Bonding	281
13-4	Preparation of Alcohols	284
	Chemical Reactions of Alcohols	286
13-5	Reactions Involving the O—H Bond	286
13-6	Reactions Involving the C—O Bond of Alcohols	291
13-7	Oxidation of Alcohols	296
13-8	Polyhydric Alcohols	298
13-9	Unsaturated Alcohols	299
	Ethers	301
13-10	Types and Reactions of Simple Ethers	301
13-11	Cyclic Ethers	303
Chapter 14	ALDEHYDES AND KETONES. REACTIONS AT THE CARBONYL GROUP	309
14-1	Preparation of Aldehydes and Ketones	309
14-2	Carbonyl Groups of Aldehydes and Ketones	312
14-3	Some Typical Carbonyl Addition Reactions	317
14-4	Condensations of Carbonyl Compounds with RNH, Derivatives	325
14-5	Hydrogen Halide Addition and Replacement by Halogen	327
14-6	Reduction of Carbonyl Compounds	327
14-7	Oxidation of Carbonyl Compounds	330
14-8	The Cannizzaro Reaction	330
Chapter 15	ALDEHYDES AND KETONES. REACTIONS INVOLVING THE SUBSTITUENT GROUPS. UNSATURATED AND POLYCARBONYL COMPOUNDS	335
15-1	Halogenation of Aldehydes and Ketones	335
15-2	Reactions of Enolate Anions	340
15-3	α,β -Unsaturated Aldehydes and Ketones	346
15-4	Ketenes	348

	Polycarbonyl Compounds	351
15-5	1,2-Dicarbonyl Compounds	351
15-6	1,3-Dicarbonyl Compounds	352
15-7	1,4-Dicarbonyl Compounds	354
<i>Chapter 16</i>	CARBOXYLIC ACIDS AND DERIVATIVES	361
	Physical Properties of Carboxylic Acids	363
16-1	Hydrogen Bonding	363
16-2	Spectra of Carboxylic Acids	365
	Chemical Properties of Carboxylic Acids	367
16-3	Dissociation of Carboxylic Acids	367
16-4	Reactions at the Carbonyl Carbon of Carboxylic Acids	370
16-5	Decarboxylation of Carboxylic Acids	372
16-6	Reactions at the Alpha Carbons of Carboxylic Acids	374
	Functional Derivatives of Carboxylic Acids	377
16-7	Reactions at the Carbonyl Carbon	379
16-8	Reactions at the Alpha Carbons of Carboxylic Acid Derivatives	383
	Reactions of Unsaturated Carboxylic Acids and Their Derivatives	389
16-9	Migration of the Double Bond	390
16-10	Double-Bond Addition Reactions	390
	Dicarboxylic Acids	392
16-11	Acidic Properties of Dicarboxylic Acids	393
16-12	Thermal Behavior of Dicarboxylic Acids	393
<i>Chapter 17</i>	OPTICAL ISOMERISM	399
17-1	Plane-Polarized Light and the Origin of Optical Rotation	399
17-2	Specific Rotation	401
17-3	Optically Active Compounds with Asymmetric Carbon Atoms	401
17-4	Optically Active Compounds Having No Asymmetric Carbon Atoms	409
17-5	Absolute and Relative Configuration	413
17-6	Separation or Resolution of Enantiomers	417

17-7	Asymmetric Synthesis and Asymmetric Induction	419
17-8	Racemization	421
Chapter 18	CARBOHYDRATES	427
18-1	Classification of Carbohydrates	428
18-2	The Structure and Properties of D-Glucose	432
18-3	Projection Formulas for Carbohydrates	435
18-4	Conformations of Carbohydrates	436
18-5	Conventions for Indicating Ring Size of Monosaccharides	437
18-6	Mutarotation	438
18-7	Reactions of Glucose with Amines. Osazone Formation	439
18-8	Glycosides	440
18-9	Disaccharides	441
18-10	Polysaccharides	443
18-11	Vitamin C	446
Chapter 19	ORGANIC NITROGEN COMPOUNDS. AMINES, AMIDES, NITRILES. NITRO, AZO, DIAZO, AND RELATED COMPOUNDS	449
	Derivatives of Ammonia	450
19-1	Types and Nomenclature of Amines	450
19-2	Physical and Spectroscopic Properties of Amines	452
19-3	Stereochemistry of Amines	456
19-4	Amines as Acids and Bases	457
19-5	Methods for the Preparation of Amines	459 ^e
19-6	Reactions of Amines	462
19-7	Oxidation of Amines	464
	Amides	466
19-8	Physical and Spectral Characteristics of Amides	466
19-9	Syntheses of Amides	471
19-10	Hydrolysis of Amides	471
19-11	Nitriles	472
	Nitroso and Nitro Compounds	473
19-12	Nitroso Compounds	473
19-13	Nitro Compounds	473

	Some Compounds with N—N Bonds	475
19-14	Hydrazines	475
19-15	Azo Compounds	476
19-16	Diazo Compounds	477
<i>Chapter 20</i>	AMINO ACIDS, PEPTIDES, PROTEINS, AND ENZYMES	481
20-1	Types of Biologically Important Amino Acids	481
20-2	Synthesis of α -Amino Acids	482
20-3	The Acid-Base Properties of Amino Acids	486
20-4	Analysis of Amino Acids	487
20-5	Lactams	491
20-6	Peptides and Proteins	492
20-7	Protein Structures	497
20-8	Enzymes	501
20-9	Coenzymes	503
20-10	Biosynthesis of Proteins	504
20-11	The Structure of DNA	505
20-12	Genetic Control and the Replication of DNA	509
<i>Chapter 21</i>	ORGANOSULFUR COMPOUNDS	513
21-1	Types and Nomenclature of Organosulfur Compounds	514
21-2	Thiols	515
21-3	Alkyl Sulfides	520
21-4	Sulfoxides and Sulfones	522
21-5	Sulfenic, Sulfinic, and Sulfonic Acids	523
<i>Chapter 22</i>	ARENES. ELECTROPHILIC AROMATIC SUBSTITUTION	529
22-1	Nomenclature of Arenes	530
22-2	Physical Properties of Arenes	533
22-3	Spectroscopic Properties of Arenes	534
	Reactions of Aromatic Hydrocarbons	540
22-4	Electrophilic Aromatic Substitution	540
22-5	Effect of Substituents on Reactivity and Orientation in Electrophilic Aromatic Substitution	551

Contents		xvii
22-6	Substitution Reactions of Polynuclear Aromatic Hydrocarbons	558
22-7	Nonbenzenoid Aromatic Compounds	563
Chapter 23	ARYL HALOGEN COMPOUNDS. NUCLEOPHILIC AROMATIC SUBSTITUTION	571
23-1	Physical Properties of Aryl Halogen Compounds	572
23-2	Preparation of Aryl Halides	573
23-3	Reactions of Aryl Halides	575
Chapter 24	ARYL NITROGEN COMPOUNDS	585
	Aromatic Nitro Compounds	586
24-1	Synthesis of Nitro Compounds	586
24-2	Reduction of Aromatic Nitro Compounds	590
24-3	Polynitro Compounds	592
24-4	Charge-Transfer (π) Complexes	592
	Aromatic Amines	594
24-5	General Properties	594
24-6	Aromatic Amines with Nitrous Acid	598
	Diazonium Salts	599
24-7	Preparation and General Properties	599
24-8	Replacement Reactions of Diazonium Salts	600
24-9	Reactions of Diazonium Compounds that Occur without Loss of Nitrogen	601
Chapter 25	ARYL OXYGEN COMPOUNDS	605
25-1	Synthesis and Physical Properties of Phenols	605
25-2	Some Chemical Properties of Phenols	609
25-3	Polyhydric Phenols	617
	Quinones	618
25-4	Reduction of Quinones	619
25-5	Photographic Developers	620
25-6	Addition Reactions of Quinones	621
25-7	Vitamin K ₁	622
25-8	Tropolones and Related Compounds	622

<i>Chapter 26</i>	AROMATIC SIDE-CHAIN DERIVATIVES	627
	Preparation of Aromatic Side-Chain Compounds	627
26-1	Aromatic Carboxylic Acids	627
26-2	Preparation of Side-Chain Aromatic Halogen Compounds	629
26-3	Side-Chain Compounds Derived from Arylmethyl Halides	629
26-4	Preparation of Aromatic Side-Chain Compounds by Ring Substitution	630
	Properties of Aromatic Side-Chain Derivatives	632
26-5	Arylmethyl Halides. Stable Carbonium Ions, Carbanions, and Free Radicals	632
26-6	Aromatic Aldehydes	636
26-7	Natural Occurrence and Uses of Aromatic Side-Chain Derivatives	637
26-8	Electron Paramagnetic Resonance (e.p.r.) Spectroscopy	640
 <i>Chapter 27</i>	 HETEROCYCLIC AROMATIC COMPOUNDS	 643
27-1	Nomenclature of Heterocyclic Ring Systems	644
	Monohetero Ring Systems	648
27-2	Some Derivatives of Furan, Pyrrole, Thiophene, and Pyridine	648
27-3	Aromatic Character of Unsaturated Heterocycles	648
27-4	Chemical Properties of Pyrrole, Furan, Thiophene, and Pyridine	650
	Polyhetero Ring Systems	659
27-5	Synthesis of Polyhetero Ring Systems by 1,3-Cycloaddition	660
	Heterocyclic Natural Products	664
27-6	Natural Products Related to Pyrrole	664
27-7	Natural Products Related to Indoles	666
27-8	Natural Products Related to Pyridine, Quinoline, and Isoquinoline	669
27-9	Natural Products Related to Pyrimidine	670

Contents		xix
27-10	Natural Products Related to Purine	671
27-11	Natural Products Related to Pteridine	672
27-12	Natural Products Related to Pyran	672
27-13	Polyhetero Natural Products	674
Chapter 28	DYES AND PHOTOCHEMISTRY	677
	Color and Constitution	678
28-1	Light Absorption, Fluorescence, and Phosphorescence	678
28-2	Light Absorption and Structure	682
	Dyes	687
28-3	Methods for Applying Dyes to Fabrics	687
28-4	Other Commercial Uses of Light-Absorbing Compounds	693
	Organic Photochemistry	695
28-5	Photodissociation Reactions	695
28-6	Photochemical Reduction. Benzopinacol Formation	696
28-7	Photochemical Oxidation	698
28-8	Photochemical Isomerization of <i>Cis</i> - and <i>Trans</i> - Unsaturated Compounds	698
28-9	Photochemical Cycloadditions	699
Chapter 29	POLYMERS	703
29-1	Types of Polymers	704
	Physical Properties of Polymers	706
29-2	Forces Between Polymer Chains	706
29-3	Correlation of Polymer Properties with Structure	710
	Preparation of Synthetic Polymers	716
29-4	Condensation Polymers	716
29-5	Addition Polymers	720
	Naturally Occurring Polymers	724
29-6	Silk	724
29-7	Wool	725
29-8	Collagen	726

<i>Chapter 30</i>	THE CHEMISTRY OF NATURAL PRODUCTS	729
30-1	Civetone	729
30-2	Spectroscopic Methods in the Determination of the Structures of Natural Products	733
	Isoprenoid Compounds	740
30-3	Terpene Hydrocarbons	741
30-4	Oxygenated Isoprenoid Compounds	746
	Steroids	749
30-5	Cholesterol	750
30-6	Representative Steroids	755
	Biogenesis of the Terpenes and Steroids	759
30-7	Cholesterol Biogenesis	759
<i>Chapter 31</i>	ORGANOSILICON, PHOSPHORUS, AND BORON COMPOUNDS	763
	Organosilicon Compounds	763
31-1	Types of Organosilicon Compounds	763
31-2	Bonding Involving <i>d</i> Orbitals in Organosilicon Compounds	766
31-3	Preparation and Properties of Organosilicon Compounds	767
31-4	Silanols, Siloxanes, and Polysiloxanes	770
	Organophosphorus Compounds	771
31-5	Types of Phosphorus Compounds	771
31-6	Nomenclature of Phosphorus Compounds	775
31-7	General Considerations of Reactivity of Organophosphorus Compounds	777
31-8	Organophosphorus Compounds as Nucleophilic Reagents	779
31-9	Organophosphorus Compounds as Electrophilic Reagents. Nucleophilic Reactions at Phosphorus	780
31-10	Free-Radical Reactions	780
31-11	Stereochemistry of Organophosphorus Compounds	781
31-12	Reactions of Quaternary Phosphonium Compounds	782

	Organoboron Compounds	784
31-13	Types of Bonding in Boron Compounds	784
31-14	Multicenter Bonding and Boron Hydrides	786
31-15	Nomenclature and Physical Properties of Organoboron Compounds	788
31-16	Preparation and Chemical Properties of Organoboron Compounds	789
	INDEX	795
