LIST OF PERIODICALS . . . . .	XV
OFFICIAL PUBLICATIONS. . . . .	XVII
LIST OF COMMON ABBREVIATIONS AND SYMBOLS USED . . . . .	XVII

*Chapter XVI. Compounds Containing a Six-Membered Ring with  
Two Hetero Atoms; Oxazines, Thiazines; Dioxans and Their Analogues*

by G. R. RAMAGE, E. H. RODD and J. K. LANDQUIST

<i>Oxazines</i> . . . . .	1465
1. Monocyclic Oxazines . . . . .	1466
a. 1:2-Oxazines and Their Hydro-Derivatives . . . . .	1466
(i) 1:2-Oxazines, 1466 - (ii) Hydro-1:2-oxazines, 1467	
b. 1:3-Oxazines and Their Hydro-Derivatives . . . . .	1469
(i) 1:3-Oxazines, 1469 - (ii) Hydro-1:3-oxazines, 1469	
c. 1:4-Oxazines and Their Hydro-Derivatives . . . . .	1473
(i) 1:4-Oxazines, 1473 - (ii) Hydro-1:4-oxazines, 1474 [Morpholines, 1474- Morpholones, 1479]	
2. Benzoxazines . . . . .	1482
a. Benzo Derivatives of 1:2-Oxazine . . . . .	1483
b. Benzo Derivatives of 1:3-Oxazine . . . . .	1484
(i) 1:3:2-Benzoxazines, 1484 - (ii) 1:3:4-Benzoxazines, 1485 - (iii) 3:1:4- Benzoxazines, 1486	
c. Benzo-1:4-oxazines and Their Hydro-Derivatives . . . . .	1488
(i) 1:4-Benzoxazines (5:6-Benzo-1:4-oxazines), 1488 - (ii) Dihydro-1:4- benzoxazines, 1490	
3. Phenoxazines . . . . .	1491
(i) Nitrophenoxazines, 1495 - (ii) Aminophenoxazines and Phenoxazines, 1495 - (iii) Phenoxazones, 1497 - (iv) Phenoxazinecarboxylic Acids, 1498 [Natural Products Related to Phenoxazone, 1499] - (v) Oxazine Deriva- tives with Two Hetero Rings, 1499 - (vi) Benzophenoxazines, 1500	
<i>Thiazines</i> . . . . .	1502
1. Monocyclic Thiazines . . . . .	1502
a. 1:3-Thiazines and Their Hydro-Derivatives . . . . .	1502
b. 1:4-Thiazines and Their Hydro-Derivatives . . . . .	1505

2. Benzothiazines and Their Hydro-Derivatives . . . . .	1508
a. Benzo-1:2- and -1:3-thiazines	
b. 1:4-Benzothiazines and Their Hydro-Derivatives . . . . .	1510
3. Phenothiazines . . . . .	1512
(i) Phenothiazine Homologues, 1515 - (ii) Halogenophenothiazines, 1515 -	
(iii) Nitrophenothiazines, 1517 - (iv) Aminophenothiazines, 1517 - (v)	
Hydroxyphenothiazines, 1518 - (vi) Carbonyl Compounds and Carboxylic	
Acids of Phenothiazine, 1519 - (vii) 10-Substituted Derivatives of Pheno-	
thiazine, 1519 - (viii) Sulphoxides, Sulphones and Phenazthionium (Pheno-	
thiazonium) Salts, 1522 - (ix) Desulphurisation of Phenothiazines, 1523 -	
(x) Azaphenothiazines, 1524	
 Six-Membered Rings Containing Two Oxygen Atoms or Other Atoms of	
Group <i>IVb</i> . . . . .	1525
1. 1:2-Dioxans and 1:2-Dithians, . . . . .	1525
2. 1:3-Dioxan Group . . . . .	1526
a. 1:3-Dioxans and 1:3-Dithians . . . . .	1526
b. Benzo-1:3-dioxen and Derivatives . . . . .	1527
3. 1:4-Dioxan Group . . . . .	1528
a. 1:4-Dioxan and Derivatives . . . . .	1528
b. 1:4-Oxathian, 1:4-Dithian and Analogues . . . . .	1530
c. Benzo Derivatives . . . . .	1532

Chapter *XVII*. Dyes Derived from Phenazine,  
Phenoxazine and Phenothiazine, and Sulphur Dyes

by H. T. HOWARD and G. R. RAMAGE

Introduction . . . . .	1535
1. Phenazine Dyes . . . . .	1536
a. Eurhodines and Eurhodols . . . . .	1536
b. Aposafranines and Rosindulines . . . . .	1537
c. Safranines . . . . .	1539
d. Fluorindines . . . . .	1541
e. Indulines, Nigrosines and Aniline Black . . . . .	1542
2. Phenoxazine Dyes . . . . .	1544
a. Basic Type . . . . .	1544
b. Gallocyanines . . . . .	1546
c. Triphenidioxazine Dyes . . . . .	1547
3. Phenothiazine Dyes . . . . .	1550
4. Sulphur Dyes . . . . .	1553

Chapter *XVIII*. Compounds Containing a Six-Membered Ring  
*with* More Than Two *Hetero Atoms*

by E. HOGGARTH

1. Triazines . . . . .	1559
a. 1:2:3-Benzotriazines ( $\beta$ -Phenotriazines) . . . . .	1559
b. 1:2:4-Triazines . . . . .	1516
(i) 3-Hydroxy-1:2:4-triazines, 1562 - (ii) 3:5-Dihydroxy-1:2:4-triazines,	
1562 - (iii) 5-Hydroxy-1:2:4-triazine-3-thiols, 1563 - (iv) 3-Amino-1:2:4-	
triazines, 1563 - (v) Di-1:2:4-triazinyls, 1563 - (vi) Compounds with a	
Reduced 1:2:4-Triazine Ring, 1563 - (vii) 1:2:4-Benzotriazines (a-Pheno-	

triazines), 1564 - (viii) 1:2:4-Benzotriazines with a Reduced Triazine Ring, 1567 - (ix) Naphtho-1:2:4-triazines and Phenanthro-1:2:4-triazines, 1567 - (x) Compounds Containing a 1:2:4-Triazine Ring Fused to Another Heterocyclic Ring, 1567	
c. 1:3:5-Triazines ( <i>s</i> -Triazines) . . . . .	1568
(i) Hydroxy- and Amino-1:3:5-triazines, 1571 - (ii) Carbonyl Derivatives and Carboxylic Acids, 1572 - (iii) Compounds Containing a Fully Reduced 1:3:5-Triazine Ring, 1573	
2. Oxadiazines and Thiadiazines . . . . .	1573
3. Dioxazines and Dithiazines . . . . .	1575
4. Trioxans and Trithians . . . . .	1575
5. Tetrazines . . . . .	1575
a. 1:2:3:4-Tetrazines . . . . .	1576
(i) Benzo-1:2:3:4-tetrazines and Naphtho-1:2:3:4-tetrazines, 1577	
b. 1:2:4:5-Tetrazines . . . . .	1577
6. Pentazines . . . . .	1580

*Chapter XIX. Compounds Having a Seven-Membered or  
Larger Ring Containing Hetero Atoms*

by P. M. MAITLIS

Introduction . . . . .	1581
1. Seven-Membered Rings . . . . .	1583
a. Seven-Membered Rings Containing One Nitrogen Atom . . . . .	1583
(i) Azepines, 1583 - (ii) Hexamethyleneimine (Azacycloheptane) and its Derivatives, 1584 - (iii) Fused Bicyclic and Tricyclic Compounds, 1589	
b. Seven-Membered Rings Containing Two Nitrogen Atoms . . . . .	1593
(i) 1:2-Diazepines, 1593 - (ii) 1:3-Diazepines, 1594 - (iii) 1:4-Diazepines, 1595	
c. Seven-Membered Rings Containing Three Nitrogen Atoms . . . . .	1599
d. Seven-Membered Rings Containing Four Nitrogen Atoms . . . . .	1600
e. Seven-Membered Rings Containing One Oxygen Atom . . . . .	1600
(i) Monocyclic Compounds, 1600 - (ii) Fused Ring Compounds, 1602	
f. Seven-Membered Rings Containing Two or More Oxygen Atoms . . . . .	1604
(i) Cyclic Acetals, 1604 - (ii) Benzo-1:2-dioxacycloheptanes, 1605 - (iii) Cyclic Ethers of Catechol, 1605 - (iv) Depsidans and Depsidones, 1605 - (v) Rings with Three Oxygen Atoms, 1606	
g. Seven-Membered Rings Containing Sulphur or Selenium . . . . .	1606
(i) Thiopin Derivatives, 1606 - (ii) Benzothiopin Derivatives, 1607 - (iii) Rings Containing Two or More Sulphur Atoms, 1609 - (iv) Seven-Membered Rings Containing Selenium, 1611	
h. Seven-Membered Rings Containing Two or More Different Hetero Atoms . . . . .	1611
(i) Rings Containing Oxygen and Nitrogen, 1611 - (ii) Rings Containing Oxygen and Sulphur, 1612 - (iii) Rings Containing Nitrogen and Sulphur, 1612	
2. Eight-Membered Rings . . . . .	1614
a. Rings Containing One Nitrogen Atom . . . . .	1614
(i) Heptamethyleneimine and Derivatives, 1614 - (ii) Fused Ring Compounds, 1615	
b. Eight-Membered Rings Containing Two Nitrogen Atoms . . . . .	1616
(i) 1:2-Diazacyclooctane Derivatives, 1616 - (ii) 1:4-Diazacyclooctane Derivatives, 1616 - (iii) 1:5-Diazacyclooctane Derivatives, 1617	

c. Eight-Membered Rings Containing Three Nitrogen Atoms . . . . .	1618
Triazocine Derivatives, 1618	
d. Eight-Membered Rings Containing Four Nitrogen Atoms . . . . .	1619
1:2:5:6-Tetrazocine Derivatives, 1619	
e. Eight-Membered Rings Containing Oxygen . . . . .	1620
f. <b>Eight-Membered Rings Containing Sulphur or Selenium</b> . . . . .	1621
g. Miscellaneous . . . . .	1621
3. Nine-Membered Rings . . . . .	1622
a. Rings Containing Nitrogen . . . . .	1622
(i) Rings with One Nitrogen Atom, 1622 - (ii) Ring with Two or More Nitrogen Atoms, 1624	
b. Nine-Membered Rings Containing Oxygen . . . . .	1624
c. Nine-Membered Rings Containing Sulphur . . . . .	1625
4. Ten-Membered Rings. . . . .	1625
a. Rings Containing Nitrogen . . . . .	1625
b. Ten-Membered Rings Containing Oxygen . . . . .	1626
c. Ten-Membered Rings Containing Sulphur. . . . .	1626
5. Rings with More than Ten Atoms . . . . .	1627
a. Rings Containing Nitrogen . . . . .	1627
(i) Rings with One Nitrogen Atom, 1627 - (ii) Rings with Two Nitrogen Atoms, 1629	
b. Rings Containing Oxygen . . . . .	1631
(i) Lactones, 1631 - (ii) Cyclic Ethers, 1631 - (iii) Cyclic Esters. 1632 - (iv) More Complex Rings Containing Oxygen. 1632	

### *Chapter XX. Purines and Related Ring Systems*

by G. A. HOWARD

1. Purines, Iminazolo[4,5-d]pyrimidines. . . . .	1635
Natural Occurrence of Purine Derivatives, 1635 - Nomenclature, 1635 - Synthetic Methods, 1637 [(1) From 4:5-Diaminopyrimidines, 1637 - (2) From 4:5-Dihydroxypyrimidines, 1643 - (3) From 5-Amino-4-hydroxypyrimidines, 1644 - (4) From Iminazoles, 1645 - (5) Other Syntheses, 1649]	
a. Purine and Alkylpurines . . . . .	1650
b. Hydroxypurines. . . . .	1651
(i) Uric Acid, 2:6:8-Trihydroxypurine, 1652 - (ii) Dihydroxypurines and Their Derivatives, 1659 - (iii) Monohydroxypurines, 1661 - (iv) N-Alkylhydroxypurines, 1663 - (v) Alkoxypurines, 1672	
c. Halogenopurines . . . . .	1673
Methods of Preparation, 1673 - Properties, 1675 - Chlorohydroxypurines and Their N-Substituted Derivatives, 1679	
d. Mercaptopurines . . . . .	1680
e. Aminopurines. . . . .	1685
Methods of Preparation, 1685 - Nuclear N-Alkyl Derivatives of Aminopurines, 1691	
f. Aminohydroxypurines . . . . .	1693
Absorption Spectra of Purines. . . . .	1695
Paper Chromatography. . . . .	1697
2. Thiazolopyrimidines . . . . .	1697
3. Pyrazolopyrimidines . . . . .	1698
a. Pyrazolo[3,4-d]pyrimidines or 1:2:5:7-Tetraazaindenes . . . . .	1698
b. Pyrazolo[4,3-d]pyrimidines or 1:2:4:6-Tetraazaindenes . . . . .	1701

4. *vic*-Triazolo[4,5]pyrimidines (8-Azapurines or 1:2:3:4:6-Pentaazaindenes) . . . . . 1702

*Chapter XXI. Nucleosides, Nucleotides and Nucleic Acids*

by J. BADDILEY

1. Nucleosides . . . . . 1707
- a. Structure of Nucleosides . . . . . 1708
- (i) The Nature of the Sugar, 1709 - (ii) The Size of the Lactol Ring, 1710 - (iii) Position and Configuration of the Glycoside Linkage, 1710
- b. Synthesis of Nucleosides . . . . . 1712
- c. Individual Nucleosides . . . . . 1717
2. Nucleotides . . . . . 1723
- a. Structure of Nucleotides . . . . . 1724
- b. Synthesis of Nucleotides . . . . . 1727
- c. Nucleotide Coenzymes . . . . . 1732
- (i) Nucleoside Di- and Tri-phosphates, 1732 - (ii) Di- and Tri-phosphopyridine Nucleotides, 1738 - (iii) Flavin-Adenine Dinucleotide (FAD), 1740 - (iv) Coenzyme A, 1742 - (v) Uridine-Diphosphate-Glucose (UDPG), 1743 - (vi) Uridine-Diphosphate-Glucuronic and -Galacturonic Acid (UDPGA and UDPGal), 1744 - (vii) Uridine-Diphosphate-Acetylglucosamine (UDPAG) and Uridine-Diphosphate-Acetylgalactosamine (UDPAGal), 1745 - (viii) Uridine-Diphosphate-Xylose and Uridine-Diphosphate-Arabinose, 1746 - (ix) Guanosine-Diphosphate-Mannose (GDPM) and Related Nucleotides, 1746 - (x) Cytidine-Diphosphate-Choline and Cytidine-Diphosphate-Ethanolamine, 1747 - (xi) Cytidine-Diphosphate-Glycerol and Cytidine-Diphosphate-Ribitol, 1748 - (xii) Uridine-Diphosphate-Acetylmuramic Acid, 1749 - (xiii) Adenosine 3'-Phosphate 5'-Sulphatophosphate (Active Sulphate, PAPS), 1749
3. Nucleic Acids . . . . . 1750
- Structure of Nucleic Acids . . . . . 1752
- (i) Carbohydrates, 1752 - (ii) Pyrimidines and Purines, 1752 - (iii) Nature of the Nucleotide Chain, 1754 - (iv) Position of Phosphate Linkages, 1754

*Chapter XXII. Pteridines; Alloxazines, Flavins, Vitamin B<sub>2</sub> and Related Compounds; Vitamin B<sub>1</sub> and Related Compounds*

by G. R. RAMAGE and T. S. STEVENS

1. Pteridines . . . . . 1760
- Methods of Preparation, 1761 - General Physical Properties, 1763 - General Chemical Properties, 1764
- a. Pteridine and its Homologues . . . . . 1765
- b. Chloropteridines . . . . . 1766
- c. Aminopteridines . . . . . 1767
- d. Hydroxypteridines . . . . . 1768
- e. Mercapto- and Alkylthio-pteridines . . . . . 1772
- f. Aminohydroxypteridines . . . . . 1773
- g. Pteridinecarboxylic Acids . . . . . 1776
- (i) Hydroxypteridinecarboxylic Acids, 1777 - (ii) Aminohydroxypteridinecarboxylic Acids, 1777 - (iii) Pteroylglutamic Acid and Related Compounds, 1778
- h. Dihydropteridines . . . . . 1781
- i. Tetrahydropteridines . . . . . 1784
2. Alloxazines . . . . . 1786

a. Alloxazine and Homologous Compounds . . . . .	1787
b. Vitamin B <sub>2</sub> and Related Compounds . . . . .	1788
Synthetic Analogues of Vitamin B <sub>2</sub> , 1790 – Riboflavin as Component of Enzymes and Co-enzymes, 1791	
3. Vitamin B <sub>1</sub> and Related Compounds . . . . .	1793
a. Vitamin B <sub>1</sub> (Thiamine, Aneurin) . . . . .	1793
Functional Derivatives and Biological Specificity, 1795	
b. Thiochrome . . . . .	1796
Co-carboxylase, 1798	

Chapter XXIII. Alkaloids: General Introduction; Pyrrolidine, Pyridine and Piperidine, Pyrrolizidine and Tropane Groups

by A. R. PINDER

Introduction . . . . .	1799
1. Pyrrolidine Group . . . . .	1801
2. Pyridine and Piperidine Group . . . . .	1803
a. Alkaloids of Areca Nut. . . . .	1805
b. Alkaloids of Hemlock . . . . .	1806
c. Alkaloids of Pomegranate Bark . . . . .	1810
d. Alkaloids of Lobelia . . . . .	1811
(i) Lobeline Group, 1812 – (ii) Lelobine Group, 1814 – (iii) Lobinine Group, 1816	
e. Alkaloids of Tobacco. . . . .	1818
f. Miscellaneous Alkaloids . . . . .	1824
3. Pyrrolizidine Group . . . . .	1826
a. Necines . . . . .	1826
b. Necic Acids. . . . .	1833
c. Alkaloids. . . . .	1842
(i) Alkaloids Derived from Monohydroxy-1-methylpyrrolizidines, 1842 – (ii) Alkaloids Derived from Dihydroxy-1-methylpyrrolizidines, 1843 – (iii) Alkaloid Derived from a Trihydroxy-1-methylpyrrolizidine, 1849	
Pharmacology of the Pyrrolizidine Alkaloids, 1849	
4. Tropane and N-Methylgranatanine Alkaloids . . . . .	1849
a. Tropane Alkaloids . . . . .	1850
(i) Atropine, Hyoscyamine and Scopolamine, 1850 – (ii) Alkaloids from 3:6-Dihydroxytropane, 1860 – (iii) Alkaloids from 3:6:7-Trihydroxytropane, 1862 – (iv) Cocaines and Ecgonines, 1864 – (v) Miscellaneous Tropane Alkaloids, 1868	
b. N-Methylgranatanine Alkaloids . . . . .	1870

Chapter XXIV. Alkaloids of the Quinoline and *iso*Quinoline Groups

by A. R. PINDER

1. Quinoline Group. . . . .	1874
a. Echinopsine (N-Methyl-4-quinoline) . . . . .	1874
b. Angostura Bark Alkaloids . . . . .	1875
c. Cinchona Alkaloids . . . . .	1878
d. Acridine Alkaloids . . . . .	1892
2. <i>iso</i> Quinoline Group . . . . .	1894
a. $\beta$ -Phenylethylamines and Simple <i>iso</i> Quinoline Derivatives . . . . .	1897
b. Benzylisoquinoline Alkaloids . . . . .	1903
c. Phthalideisoquinoline Alkaloids . . . . .	1910

d. Alkaloids Related to Berberine . . . . .	1921
e. Alkaloids Related to Cryptopine. . . . .	1934
f. Aporphine Alkaloids . . . . .	1941
g. Phenanthridine Alkaloids. . . . .	1949
h. 1:2-Benzophenanthridine Group. . . . .	1961
i. Alkaloids of Ipecac . . . . .	1967
j. Alkaloids Related to Cularine . . . . .	1974
k. Bisbenzylisoquinoline Alkaloids . . . . .	1975
(i) Mono-ethers, 1975 - (ii) Di-ethers, 1977 - (iii) Tri-ethers, 1983	

*Chapter XXV. Alkaloids of the Lupinane, Iminazole and  
Quinazoline Groups*

by A. R. PINDER

1. Lupinane Group . . . . .	1988
a. Lupinine Alkaloids . . . . .	1988
b. Phenanthronorlupinane Alkaloids . . . . .	1991
c. Cytisine Alkaloids . . . . .	1992
d. Anagyrene, Lupanine and Sparteine Alkaloids . . . . .	1996
e. Matrine Alkaloids . . . . .	2005
2. Iminazole Group . . . . .	2007
3. Quinazoline Group. . . . .	2012

*Chapter XXVI. Alkaloids of the Diterpene and Steroid Groups*

by A. R. PINDER

1. Diterpene Group . . . . .	2019
a. Garrya Alkaloids . . . . .	2019
b. Atisine and Related Alkaloids. . . . .	2025
c. More Complex Alkaloids . . . . .	2028
2. Steroid Group. . . . .	2033
a. Solanum Alkaloids. . . . .	2034
b. Veratrum Alkaloids . . . . .	2041
(i) Glycoalkaloids and Alkamines, 2041 - (ii) Ester-alkaloids, 2046	
c. Holarrhena Alkaloids . . . . .	2051

*Chapter XXVII. Alkaloids of the Morphine Group*

by K. W. BENTLEY

Introduction . . . . .	2058
1. Morphine, Codeine, Neopine, Thebaine, and Oripavine . . . . .	2059
a. Structure. . . . .	2061
b. Total Synthesis of Morphine . . . . .	2067
c. Reactions and Derivatives of the Morphine Alkaloids . . . . .	2069
(i) Metal-catalysed Rearrangements, 2069 - (ii) Codeimethines, 2069 -	
(iii) The Halogeno-codides and -morphides, 2070 - (iv) The Deoxy-com-	
pounds, 2071 - (v) The Thebainones, 2072 - (vi) The Thiocodides, 2073 -	
(vii) The Dihydrothebaines, 2074 - (viii) Pseudomorphine and Disino-	
menine, 2075	
d. The Molecular Rearrangements of the Morphine Alkaloids . . . . .	2076
e. The Stereochemistry of the Morphine Alkaloids . . . . .	2081
2. Sinomenine and Hasubanonine . . . . .	2083
a. Structure of Sinomenine . . . . .	2084
b. Structure of Hasubanonine . . . . .	2086

*Chapter XXVIII. The Indole Alkaloids*

by G. F. SMITH

Introduction . . . . .	2088
1. Harmine, Harmaline and Cryptolepine . . . . .	2092
2. Indolopyridocoline Group . . . . .	2095
3. Ibogaine . . . . .	2105
4. Ergot Alkaloids . . . . .	2106
5. Strychnine Group. . . . .	2110

*Chapter XXIX. Erythrina Alkaloids*

by A. R. PINDER

1. Lactonic Alkaloids . . . . .	2120
2. Aromatic Alkaloids . . . . .	2127

INDEX . . . . .	2131
-----------------	------
