

CONTENTS

1 Retrospect and Prelude,	1
2 Alkanes, Cycloalkanes, and Their Derivatives,	50
3 Energy Changes in Chemical Reactions,	87
4 Conformations of Alkanes and Cycloalkanes,	128
5 Introduction to Spectroscopy,	171
6 Stereochemistry,	225
7 Alkenes: Structure, Acid Additions, and Preparation,	276
8 More Addition Reactions of Alkenes,	325
9 Alkynes,	367
10 Nuclear Magnetic Resonance Spectroscopy,	405
11 Alcohols,	449
12 Nucleophilic Substitution and Elimination Reactions,	504
13 Ethers and Epoxides,	549
14 Aldehydes and Ketones,	589
15 Carboxylic Acids, Their Salts, and Their Esters,	650
16 Acyl Transfer Reactions: Interconversion of Carboxylic Acid Derivatives,	697
17 Enols and Enolate Anions,	752
18 Free Radical Reactions,	799
19 π Electron Delocalization in Acyclic Compounds and Intermediates,	838
20 Aromaticity: π Electron Delocalization in Cyclic Compounds,	885
21 Chemistry of Benzene and Its Derivatives,	921
22 Amines,	961
23 Halobenzenes, Phenols, and Quinones,	1007
24 Chemistry of Difunctional Compounds,	1046
25 Carbohydrates,	1092
26 Amino Acids, Polypeptides, Proteins, and Enzymes,	1144
27 Nucleic Acids,	1188
Answers to Selected Exercises,	A-1
Glossary,	G-1
Index,	I-1
