

## CONTENTS

I.	Introduction	
	Symmetry, Art, and Science	9
	The Representation of Symmetry	19
II.	Basic Concepts	
	The Concept of a Symmetry Operation	25
	Symmetry Operations in Three Dimensions	29
	Groups of Symmetry Operations	31
	Point Group Symmetry in the Plane	33
III.	Crystallographic Symmetry in Two Dimensions	
	The Crystal Lattice	41
	The Ten crystallographic Plane Point Groups	43
	Crystallographic Plane Groups	55
	A Few of the Crystallographic Plane Groups	57
III.	The Three-dimensional Point Groups	
	Symmetry Groups in Three Dimensions	65
	Point Groups with Pure Rotation Axes	67
	Point Groups with a Single Rotation Axis That Lies in a Mirror Plane	81
	Point Groups with Only Rotation-Reflection Axes	93
	Point Groups with a Single Rotation Axis and a Mirror Plane Perpendicular to the Axis	101
	Simple Dihedral Point Groups	115
	Dihedral Point Groups with Vertical Diagonal Mirror Planes	127
	Dihedral Groups with Horizontal Mirror Planes	133
	The Cubic Point Groups	145
	Problems and Answers	157
	Glossary	173
	A Brief Bibliography	179
	Indexes	181
