

# CONTENTS

Preface . . . . .	V
Contents . . . . .	VI
<b>Part I</b>	
<b>G. K. WERTHEIM, The study of crystalline defects by Mossbauer effect . . . . .</b>	<b>1-85</b>
1. INTRODUCTION TO THE MÖSSBAUER EFFECT . . . . .	1-11
References 11	
2. LATTICE DEFECTS . . . . .	12-31
2.1. Radiation damage 12	
2.2. Plastic deformation 20	
2.3. Ionization effects 21	
References 29	
3. IMPURITIES AND THEIR ASSOCIATION WITH DEFECTS IN NONMETALS	32-45
3.1. Halides 32	
3.2. Oxides' 37	
3.3. Sulphides 41	
3.4. Semiconductors 42	
References 44	

4. CHEMICAL IMPURITIES IN METALS . . . . .	46-66
4.1. Effects on the host lattice 46	
4.1.1. <i>Substitutional impurities in iron</i> 46	
4.1.2. <i>Interstitial impurities in iron</i> 47	
4.1.3. <i>Hydrogen in palladium and nickel</i> 50	
4.2. Properties of dilute chemical impurities in metals 53	
4.3. Order-disorder transformations and precipitation 59	
References 63	
 Appendix 1. COMMONLY USED ABBREVIATIONS, SYMBOLS AND FUNDAMENTAL CONSTANTS . . . . .	67-68
 Appendix 2. NUCLEAR DECAY SCHEMES . . . . .	69-73
 BIBLIOGRAPHY . . . . .	74
 AUTHOR INDEX . . . . .	75-79
 SUBJECT INDEX . . . . .	80-85
 <b>Part II</b>	
<b>A. HAUSMANN and W. SANDER, Study of structural defects by spin resonance methods . . . . .</b>	<b>87-222</b>
 Preface . . . . .	89
 Introduction . . . . .	90
 PART A. BASIC PRINCIPLES OF SPIN RESONANCE SPECTROSCOPY . . . . .	91-136
I. ELECTRON SPIN RESONANCE. . . . .	93-128
1.1. Basic concepts 93	
1.2. The free ion Hamiltonian 96	
1.3. The Hamiltonian of ions in a crystalline solid 97	
1.4. A simplified example 102	
n e structure 108	
.5.1. <i>HFS of an S state ion</i> 108	
.5.2. <i>HFS interaction with several nuclei</i> 109	

1.6. Determination of the parameters. Forbidden transitions	110
1.7. Orbitally degenerate states	114
1.8. The Jahn–Teller effect	116
1.9. Line width and relaxation times	117
1.9.1. <i>Spin–lattice relaxation</i>	119
1.9.2. <i>Spin–spin interaction</i>	119
1.9.3. <i>Exchange interaction</i>	120
1.9.4. <i>Other reasons for broadening</i>	120
1.9.5. <i>Measurements of relaxation times</i>	120
1.10. The information obtained by ESR spectra	121
1.11. Experimental techniques	123
1.11.1. <i>General</i>	123
1.11.2. <i>Special techniques</i>	125
1.11.2.1. <i>Application of low temperatures</i>	125
1.11.2.2. <i>Normal cryostats</i>	125
1.11.2.3. <i>Cold finger cryostats</i>	125
1.11.2.4. <i>Gas flow cryostats</i>	126
References	127
2. ELECTRON NUCLEAR DOUBLE RESONANCE . . . . .	129–133
2.1. General	129
2.2. Example: The $U_2$ centre	131
References	133
3. NUCLEAR MAGNETIC RESONANCE . . . . .	134–136
3.1. General	134
3.2. Example: Dislocations	135
References	136
PART B. SUMMARY OF EXPERIMENTAL RESULTS . . . . .	137–210
4. COLOUR CENTRES IN THE ALKALI HALIDES . . . . .	139–150
4.1. The F centre	140
4.2. F aggregate centres	144
4.3. V centres	145
4.4. Impurity centres	147
References	149
5. PARAMAGNETIC DEFECTS IN II–VI GROUP COMPOUNDS . . . . .	151–176
5.1. The Hamiltonian	152
5.2. Iron group impurities	154

5.2.1. <i>Superhyperfine structure</i>	155
5.2.2. <i>Effect of covalency on the ESR parameters</i>	158
5.2.3. <i>Optical excitation</i>	160
5.2.4. <i>The Jahn-Teller effect of 3d ions</i>	161
<del>5.3.</del> Rare earth impurities	161
<del>5.4.</del> Mobile electrons	164
<del>5.5.</del> Acceptor centres	169
5.6. The A centre	170
5.7. The F centre in ZnS	172
5.8. S state centres	174
References	174
6. III-V SEMICONDUCTING COMPOUNDS . . . . .	177-180
6.1. Mobile electrons	177
6.2. Other centres	179
References	180
7. GROUP IV ELEMENTS AND COMPOUNDS . . . . .	181-188
7.1. Silicon	182
7.1.1. <i>Shallow donors</i>	182
7.1.2. <i>Shallow acceptors</i>	185
7.1.3. <i>Transition metal ions</i>	185
7.1.4. <i>Radiation damage</i>	186
7.2. Germanium, diamond and SiC	187
References	188
8. OTHER CRYSTALS . . . . .	189-210
8.1. Centres in simple oxides	189
8.2. Alkaline earth fluorides	193
8.3. Complex oxides	196
8.3.1. <i>Rutile (TiO<sub>2</sub>)</i>	197
8.3.2. <i>Perovskites</i>	199
8.3.3. <i>Spinel</i>	203
8.3.4. <i>Garnets</i>	203
8.4. Alkali hydrides and alkali azides	204
8.5. Centres in the ammonium halides	204
8.6. Irradiation induced centres in quartz	205
8.7. Conduction electron spin resonance (CESR) in metals	205
References	208

LIST OF SYMBOLS . . . . . 211–212

BIBLIOGRAPHY . . . . . 213–214

AUTHOR INDEX . . . . . 215–218

SUBJECT INDEX . . . . . 219–222
