

CONTENTS

1. Introduction	1
2. Elastic Distortions	3
3. Plastic Distortions	17
4. Dislocations	28
4.1 Distortions	28
4.2 Burgers Vector	40
5. Free Surface Boundary Conditions	57
5.1 Dislocations and Free Surfaces	57
5.2 Surface Dislocations	77
6. Grain Boundaries and Two-Phase Interfaces	109
7. Coincidence Site lattice	142
8. Small Distortions and the Linear Approximation	155
9. Dislocations in the Linear Approximation	167
10. Screw-Type Dislocation Arrays	181
11. Relationship Between Stress and Strain in the Linear Approximation.	196
12. Disclinations	208
13. Applications to Specific Problems	231
13.1 The fracture Process	231
13.2 Calculation of Grain Boundary Energies	244
13.3 Surface Tension in Liquids and Solids	249
References	253
Index	257
