

CONTENTS

1. Elementary Concepts of Light	1
2. The Petrographic Microscope	17
3. Refractometry	47
4. Isotropism and Isotropic Media	69
5. Optical Crystallography of Uniaxial Crystals	75
6. Uniaxial Crystals and the Petrographic Microscope	89
7. Optical Crystallography of Biaxial Crystals	121
8. Biaxial Crystals and the Petrographic Microscope	135
9. The Universal Stage	171
10. Application of the Universal Stage to Uniaxial Crystals	191
11. Application of the Universal Stage to Biaxial Minerals	205
12. Preparation of the Sample	231
References	237
Index	245
