

CONTENTS

| | |
|---|-----|
| The History of Ore Microscopy | |
| Introduction | 3 |
| I. The beginning of microscopic investigation of ores | 5 |
| II. Ore microscopy of today | 8 |
| References | 20 |
| Reflected Light Microscopy | |
| Introduction | 31 |
| I. The reflected light microscope | 32 |
| II. The optical fundamentals of the reflected light microscopy | 82 |
| III. Methods of determination in reflected light | 126 |
| IV. The preparation of specimens | 184 |
| Reflected Light Microscopy in the Investigation of Ore Deposits an Introduction and Review | |
| Introduction | 197 |
| I. The study of ore deposits | 201 |
| II. Determination of the ore minerals | 282 |
| III. Intergrowths | 292 |
| IV. The quality of the polished section | 309 |
| Final remarks | 314 |
| References | 315 |
| The Selection of Ore Specimens and the Preparation of Polished Sections | |
| Introduction | 319 |
| I. The preparation of ore specimens for grinding and polishing | 320 |
| II. Earlier grinding and polishing procedures | 324 |
| III. The Rewald-Vanderwilt grinding and polishing method and its application | 326 |
| IV. The preparation of polished sections of grain samples | 357 |
| References | 380 |
| Microscopic Investigation of the Iron Ore Minerals and of the More Important Minerals of the Steel Alloy Metals | |
| I. Iron ores: | 383 |
| II. Ores of manganese | 415 |
| III. Ores of chromium | 421 |
| IV. Ores of chromium | 429 |
| References | 434 |
| The Application of Ore Microscopy in Beneficiation of Ores of the Precious Metals and of the Nonferrous Metals | |
| Introduction | 441 |

| | |
|---|-----|
| I. The field of application of ore dressing processes | 443 |
| II. The possibility of application of methods of ore microscopy | 444 |
| III. Occurrence of the individual metals | 500 |
| References | 536 |
