

CONTENTS

1 General Mineralogy and Classification of the Rock-forming Feldspars	
1.1 Potassium Feldspars	2
1.2 Sodium Feldspars	2
1.3 Calcium Feldspar: Anorthite	13
1.4 The Feldspar Series	15
1.5 Summary of Occurrence and Formation	46
References	51
2 Survey of Pseudosymmetry and Twinning	
2.1 Pseudosymmetry	60
2.2 Twinning Laws	61
2.3 Twin Boundaries	65
2.4 Rhombic Section	68
2.5 Genesis of Twins	75
References	83
3 The Structures of the Feldspars	
3.1 The Structures of the feldspars	88
3.2 The Structures of the Alkali Feldspars	102
3.3 The Structure of Anorthite	134
3.4 The Structure of the Plagioclases	135
References	140
4 Physical Properties of Feldspars	
4.1 Hardness	147
4.2 Density of Crystals and Glasses	151
4.3 Thermal Expansion	171
4.4 Elastic Constants	181
References	186
5 Thermodynamic Properties of Feldspars	
5.1 Thermochemical Data	189
5.2 Solubility and Alteration of Feldspars	201
5.3 Phase Equilibria and Melting in Feldspars	206
6 Historical Notes and Old Names	
References	247
Author Index	253
Subject Index	259
