Foreword	v
Preface	vii
Acknowledgements	xi

PART I

CONSIDERATIONS AND EQUIPMENT

<i>Chapter</i>		
①	Preliminary Considerations	1
②	Practical Considerations	4
3	Apparatus and Equipment	9

PART II

METHODS OF ANALYSIS

④	Stock Reagents; Indicators and Standard Solutions	35
⑤	Analysis of High-silica Materials, Aluminosilicates and Aluminous Materials	43
	(A) Coagulation Method	43
	(B) Single Dehydration Method	54
6	Analysis of High-silica Materials, Aluminosilicates and Aluminous Materials; Classical Method	58
7	Analysis of High-silica Materials and Aluminosilicates: Rapid Method	73
8	Analysis of High-silica Materials and Aluminosilicates: Spectrophotometric Method	80
9	Direct Determination of Alumina in High-silica Materials	93
	(A) Oxine Gravimetric Method	93
	(B) EDTA Volumetric Method	96
10	Direct Determination of Alumina in Aluminosilicates and Aluminous Materials	99
11	Analysis of Magnesites and Dolomites	102
12	Analysis of Chrome-bearing Materials	113
	(A) Classical Method	114
	(B) Proposed British Standard Method	125
13	Analysis of Zircon and Zircon-bearing Refractories	136
14	Analysis of Bone Ashes	144

<i>Chapter</i>		<i>Page</i>
15	Analysis of Frits and Glazes .	156
	(A) Method for the Analysis of Borax Frits .	156
	(B) Method for the Analysis of Lead Bisilicate Frits .	165
	(C) General Method for Colourless or White Opacified Glazes	173
	(D) Possible More Rapid Procedures .	188
16	Determination of Alkalis .	192
	(A) Procedure for the Determination of Alkalis in High- silica, Aluminosilicates, and Aluminous Materials, Borax Frits, Lead Bisilicate Frits and Glazes (and Extension to Include High-lithium Materials) .	195
	(B) Procedure for the Determination of Alkalis in Magne- sites, Dolomites, Zircon-bearing Materials, Chrome- bearing Materials and Bone Ashes .	199
	(C) Procedure for the Determination of "Soluble Salt" Alkalis .	201
17	Determination of Alumina Using DCTA .	202
18	Determination of Sulphate in Silicate Materials. .	205
19	Determination of Carbon Dioxide (Carbonate) in Ceramic Materials .	208
20	Determination of Small Amounts of Fluorine in Silicate Materials .	211
	(A) Pyrohydrolytic Method. .	211
	(B) Chemical Method	214
21	Determination of Small Amounts of Phosphate in Clays etc.	219
22	Determination of Ferrous Oxide in High-silica Materials and Aluminosilicates .	221
23	The Analysis of Materials Containing Significant Amounts of Fluorine and/or Phosphate e.g. Cornish Stone .	223
24	Determination and Analysis of Soluble Salts in Clays and Bricks .	227
25	Determination of Resistance to Acids, and Acid-soluble Iron	234
26	Determination of Lead Solubility of Frits and Glazes .	237
27	Colorimetry and Methods of Calibration .	241
28	Rational Analysis	253
	APPENDIX: Some Specimen Analyses .	255
	Index .	263
