

CONTENTS

1	Introduction to Digital Images in Geology	1
2	Digitization and Processing of Images	7
3	Transformations of Binary Images	13
4	Example of Processing of Geological Data: Study of a Geological Map Pattern Near Bathers, New Brunswick	29
5	Example of Processing of Geological Data: Analysis of a Portion of a Thin Section of a Thin Section of a Metamorphic Rock	51
6	Techniques for Capturing Data from Geological and Ancillary Maps	65
7	A Geological Database in Northwestern Manitoba, Canada	87
8	Quantitative Characterization of Geological and Ancillary Map Patterns in Northwestern Manitoba	99
9	Digitization and Preprocessing of Microscopic Images Rocks in Thin Section	113
10	Some Aspects of the Quantitative Characterization of a Thin Section of a Granulite	131
11	Experiments on the Characterization of Metamorphic Textures from a Micrograph of and Amphibolite	155
12	Petrology and Textures	167
13	Toward Pattern Recognition	177
14	Epilogue	191
	Index	235
