

CONTENTS

I. Introduction and History	1
II. Methods and Instrumentation for Exploring the Ocean Floor	9
III. Ocean Waves and Associated Currents (D.L.Inman)	49
IV. Catastrophic Waves and Ocean Currents	82
V. Sediments: Physical Properties and Mechanics of Sedimentation (D.L. Inman)	101
VI. Defining and Classifying Shorelines and Sea Coasts	152
VII. Beaches and Related Shore Processes	167
VIII. Continental Shelves: Topography and Sediments	206
IX. Origin and History of the Continental Shelves	260
X. Continental Slopes	279
XI. Submarine Canyons, Deep Channels, and Other Marine Valleys	311
XII. Coral and Other Organic Reefs	349
XIII. Deep Ocean Floor Topography	371
XIV. Deep Ocean Deposits and Strtigraphy	400
XV. Suboceanic Layers and Origin of Basins	422
XVI. Mineralogy and Chemistry of Marine Sedimentation (E. D. Goldberg)	436
XVII. Modern Sediments and the Interpretation of Ancient Sediments	467
Index	541
