

CONTENTS

Introductory Remarks	1
The Influence of Topography on Ground Water Formation	3
Ground Water in Precambrian Rocks in Southern Sweden	23
On the Ground Water Conditions in the Sedimentary Rocks of Scania	43
Short-time Variation of the Ground Water and Its Reasons	57
Some hydrogeological Aspects on Aquifers, especially Eskers	73
The Chemistry of Ground Waters	89
Tracers for Ground Water Investigations	123
Protected Areas for Ground Water Sources	153
Ground Water production from the Bedrock of Sweden	161
Ground Water Draft from Earth Layers	181
Artificial Replenishment of Ground Water	197
Excursion to the Verka District	213
