Foreword	vii
General Preface	ix
Preface to Volume One	xi

SECTION I: PSYCHROMETRY

1. A Critical Review of Tables and Charts used in Psychrometry, <i>H. H. Bindon</i>	3
2. Calculation of the Temperature of a Flat-plate Wet Surface under Adiabatic Conditions with Respect to the Lewis Relation, <i>Tamami Kusuda</i>	16
3. Proposal for an Experimental Triple-tubed Adiabatic Saturator to Measure Thermodynamic Wet-bulb Temperature as a Limit Approached During the Saturation Process, <i>Louis P. Harrison</i>	33
4. Wet-and-dry-plate Dew-point Hygrometer, <i>Kamekichi Shiba and Tatsumi Tozawa</i>	64
5. Experimental Results of the Psychrometer Constant, <i>M. Yoshitake and I. Shimizu</i>	70
6. The Response of a Psychrometer to Fluctuations in Vapor Pressure, <i>R. J. Taylor</i>	76
7. An Integrating Temperature and Humidity Gradient Recorder, <i>B. G. Collins</i>	83
8. A Proposed Technique for Measuring Relative Humidity at Below Freezing Temperature, <i>C. Ivan Branton</i>	95
9. A Thermocouple Recording Psychrometer for Measurement of Relative Humidity in Hot Arid Atmosphere, <i>Lee Richardson</i>	101
10. Psychrometric Determination of Relative Humidities in Air with Dry-bulb Temperatures Exceeding 212°F, <i>Robert W. Worrall</i>	105
11. Design and Calibration of a Thermocouple Psychrometer which uses the Peltier Effect, <i>J. E. Box, Jr.</i>	110

SECTION II: DEW-POINT HYGROMETRY

12. The Basic Process of the Dew-point Hygrometer, <i>R. G. Wylie, D. K. Davies and W. A. Caw</i>	125
13. The Dew- or Frost-point Hygrometer, <i>A. W. Brewer</i>	135
14. A Frost-point Hygrometer for Use at Low Frost Points, <i>Stanley Martin</i>	144
15. A Laboratory Standard Manually Operated Dew-point Hygrometer using Thermoelectric Cooling, <i>Stanley Martin</i>	149
16. Design Features of the NYU Automatic Frost-point Hygrometer, <i>Alan M. Nathan</i>	155
17. An Automatic Dew-point Hygrometer with Thermoelectric Cooling, <i>Charles C. Francisco and David J. Beaubien</i>	165
18. Design and Applications of High-performance Dew-point Hygrometers, <i>Louis C. Paine and H. R. Farrah</i>	174
19. An Automatic Frost-point Hygrometer using Radioactive Detection, <i>John G. Ballinger</i>	189
20. The Direct Measurement of Dew-point Temperature with Semiconducting Thermoelements, <i>Victor Armstrong</i>	202
21. Dew-point Apparatus of High Accuracy, <i>J. L. Hartley, J. L. Chamberlin and W. D. Huff</i>	205
22. A Recording Dew-point Hygrometer, <i>Einar Brendeng</i>	209

SECTION III: ELECTRIC HYGROMETRY

23. Review of the Lithium Chloride Radiosonde Hygrometer, <i>Donald A. Mathews</i>	219
24. Some Research on the Lithium Chloride Radiosonde Hygrometer and a Guide for Making it, <i>Donald A. Mathews</i>	228
25. The Aging Effect of an Electrolytic Hygrometer, <i>J. Kobayashi and Y. Toyama</i>	248
26. A Study of the Accuracy of Dunmore Type Humidity Sensors, <i>G. O. Handegord, C. P. Hedlin and F. N. Trofimenkoff</i>	265
27. A Resistance-humidity Relationship for Sensors of the Dunmore Type, <i>C. P. Hedlin</i>	273
28. An Application of the Dunmore Electric Hygrometer to Humidity Measurement at Low Temperatures, <i>G. O. Handegord and C. E. Till</i>	280
29. A Method of Measuring the Moisture Content of Air directly in Grains Per Pound of Dry Air, <i>E. E. Stanley and P. J. Cousins</i>	285
30. Apparatus for the Assessment of Equilibrium Relative Humidity in the Temperature Range of 0 to -30°C , <i>Lajos Szalai</i>	298
31. A Small Electrical Hygrometer for Microclimate Measurements, <i>Marlin N. Rogers</i>	302
32. The Measurement of Relative Humidity in Confined Spaces, <i>J. E. Kennedy</i>	310
33. Carbon Humidity Elements—Manufacture, Performance and Theory, <i>S. L. Stine</i>	316
34. The Dynamic Behavior of the Carbon Humidity Element ML-476, <i>R. M. Marchgraber and H. H. Grote</i>	331
35. Polyelectrolyte Electrical Resistance Humidity Elements, <i>Robert C. Musa and George L. Schnable</i>	346
36. Humidity Meter using Cerium Titanate Elements, <i>Clark E. Johnson, Jr. and Stephen R. Duggan</i>	358
37. A Study of the Variation of the Surface Electrical Resistance of Lead Iodide Films with Relative Humidity at Room Temperature, <i>Frank E. Jones</i>	361
38. A Ceramic Relative Humidity Sensor, <i>Elias J. Amdur, D. E. Nelson and J. C. Foster</i>	366
39. Some Properties and Limitations of the Aluminum Oxide Hygrometer, <i>A. C. Jason</i>	372
40. A Hygrometer Which Utilizes an Anodic Oxide Film of Aluminum, <i>Akira Miyata and Hiroshi Watari</i>	391
41. A Partial Evaluation of the Performance of an Aluminum Oxide Humidity Element, <i>David Chleck and Frederick J. Brousaides</i>	405

SECTION IV: SPECTROSCOPIC HYGROMETRY

42. The Absorption of Radiation by Water Vapor, <i>J. W. C. Johns</i>	417
43. Water Vapor Density Measurements Utilizing the Absorption of Vacuum Ultraviolet and Infrared Radiation, <i>James E. Tillman</i>	428
44. The NRL Lyman-Alpha Humidiometer, <i>D. L. Randall, T. E. Hanley and O. K. Larison</i>	444
45. A Spectral Hygrometer for Measuring Total Precipitable Water, <i>Norman B. Foster, David T. Volz and Laurence W. Foskett</i>	455
46. Infrared Absorption Hygrometer, <i>Wayne F. Staats, Laurence W. Foskett and Hans P. Jensen</i>	465
47. A Long-path Infrared Hygrometer, <i>W. G. Tank and E. J. Wergin</i>	481
48. The Infrared Hygrometer—Its Application to Difficult Humidity Measurement Problems, <i>R. C. Wood</i>	492

SECTION V: COULOMETRIC HYGROMETRY

49. Additional Performance Data on a new Electrolytic Hygrometer Cell, <i>R. H. Jones and Arne Petersen</i>	507
50. Mixing Ratio Indicator, <i>Paul B. MacCreedy, Jr., and John A. K. Lake</i>	512

51. Adaptation of the Electrolytic Moisture Detector to Atmospheric Humidity Measurement, <i>Michael Czuha, Jr.</i>	522
52. The Detection of Parts Per Million Moisture in Refrigerants, <i>C. M. Finley and John Shaffer</i>	529

SECTION VI: MISCELLANEOUS METHODS

53. Thermal Conductivity Gas Analysis in Hygrometric Applications, <i>R. H. Cherry</i>	539
54. Continuous-Absorption Hygrometry with a Pneumatic Bridge Utilizing Critical Flow, <i>William A. Wildhack, Thomas A. Perls, Charles W. Kissinger and John W. Hayes</i>	552
55. Hair Humidity Elements, <i>Frederick K. Davey</i>	571
56. Humidity Sensors from Natural Materials, <i>Hans Gerhard Muller</i>	574
57. The Piezoelectric Sorption Hygrometer, <i>W. H. King, Jr.</i>	578
58. A Sensitive Heat-of-Adsorption Water Vapor Recorder, <i>Gene C. Flumerfelt</i>	584
59. The Interaction of Water Vapor with a Thin Liquid Layer: Applications to Gas Chromatography and Hygrometry, <i>R. J. Charlson</i>	591
60. A Relative Humidity Sensor based on the Capacitance Variations of a Plastics Film Condenser, <i>David E. Nelson and Elias J. Amdur</i>	597
61. Properties and Uses of Color Change Humidity Indicators, <i>Bruce G. Blinn</i>	602
62. Accurate Hygrometry with Ionic Single Crystals, <i>R. G. Wylie</i>	606
63. The Mode of Operation of Saturation Temperature Hygrometers based on Electrical Detection of a Salt-solution Phase Transition, <i>David E. Nelson and E. J. Amdur</i>	617
64. An Investigation of the Accuracy and Response Rate of a Lithium Chloride Heated Electrical Hygrometer, <i>C. P. Hedlin and P. N. Trojimenkoff</i>	627
65. Improvements in Dew-point Measurements of Gases by the Use of Peltier Devices <i>Otto J. Leone</i>	635
66. Hygrometer Developments at the U.S. Naval Research Laboratory, <i>R. E. Ruskin</i>	643
67. A Technique for the Continuous Indication of Medium-low Water Vapor Pressures, <i>R. G. Wylie, W. A. Caw and N. W. Bryant</i>	651
68. Detection and Measurement of Humidity and Moisture by the Hygrophotographic Technique, <i>M. Joseph Sivadjian</i>	656
Author Index	667
Subject Index	669
