

## CONTENTS

A Review of the Quaternary Processes in the Offshore and Coastal Areas of China	1
Correlation of Quaternary Marine Transgressions in China Onshore and Off-shore Areas	37
Clay Mineralogy and Some Properties of the Quaternary Sediments from a Deep Borehole Core in the Central Plain. Thailand	55
Quaternary Stratigraphy of the Khorat Plateau Area, Northeastern Thailand	69
Catastrophic Flooding-An Agent for Landform Development of the Khorat Plateau: A Working Hypothesis	95
Late Holocene Alluvial Stratigraphy and History in the SiSatchanalai Area, North Central Thailand	117
Coastal Landforms and Development of a Tidal Deltaic Plain-A case study of two mangrove on the Mangrove on the Gulf of Thailand	135
Quaternary Geology of Yala Area, Southern Thailand	159
Active Tectonics in the Indonesian Archipelago	165
Chocolate Hills : Their Quaternary morpho-evolutionary framework and terrestrial succession in Boholisland Central Philippines	187
Reconstructing a Quaternary Drainage System	205
The Quaternary Geology of the Mekong Lower Plain and Islands in Southern Vietnam	215
Stratigraphy of the Pliocene-Quaternary Deposits on the Southeastern Vietnam Continental Shelf and the Mekong Delta	243
Correlation of Quaternary Successions in Vietnam	251
Pliocene-Quaternary Geological Processes on the SE. Vietnam Continental Shelf	257
Origin and Evolution of the Coastal Zone of India-A General Geohistoric Model(Abstract)	261
Appendix	265
