

## CONTENTS

1. Vitrinite Reflectance as Maturity Parameter: Petrographic and Molecular Characterization and Its Applications to Basin Modeling	1
2. Need for Standardization of Vitrinite Reflectance Measurements	26
3. Presence of Remnant Cell Structure in Vitrinite and Its Influence on Reflectance Properties	39
4. Corpohuminite from Canadian Paleozoic Source Rocks: Petrology and Reflectance Properties	52
5. Iso-rank Variation of Vitrinite Reflectance and Fluorescence Intensity	64
6. Petrographic and Geochemical Anomalies Detected in Spanish Jurassic Jet	76
7. Reflectance Suppression in Some Cretaceous Coals from Alberta, Canada	93
8. Coalification Reactions of Vitrinite Derived from Coalified Wood: Transformations to Rank of Bituminous Coal	112
9. Flash Pyrolysis-Gas Chromatography-Mass Spectrometry of Lowe Kittanning Vitrinites: Changes in Distributions of Polyaromatic Hydrocarbons as a Function	136
10. Molecular Characterization of Vitrinite Maturation as Revealed by Flash Pyrolysis Methods	149
11. Influence of Pressure on Pyrolysis of Coal	161
12. Evolution of Vitrinite Ultrafine Structures During Artificial Thermal Maturation	194
13. Pyrolysis-Carbon-Isotope Method: Alternative to Vitrinite Reflectance as Kerogen Maturity Indicator	206
14. Calculation of Vitrinite Reflectance from Thermal Histories and Peak Temperatures: A Comparison Of Methods	216
15. Measured Versus Predicted Vitrinite Reflectance from Scotian Basin Wells: Implications for Predicting Hydrocarbon Generation-Migration	230
16. Apatite Fission Track Thermochronology Integrated with Vitrinite Reflectance: A Review	249
17. Paleohot Flux Reconstruction from Thermal Indicators	269
Author Index	286
