

Table of Contents

| | Page |
|---|------|
| Preface | |
| I. Introduction | 1 |
| A. Components of Asbestos Insulation | 3 |
| B. Composition of Talc | 3 |
| C. Definition of Asbestos | 4 |
| D. Mineralogy of Asbestos | 4 |
| E. Chemical Composition of Asbestos | 9 |
| II. Crystallographic Background | 9 |
| A. Crystalline vs Amorphous | 10 |
| B. Crystal Axes and Faces | 10 |
| C. Optical Crystallography | 13 |
| 1. Optical indicatrix | 15 |
| 2. Refractive index measurement | 16 |
| a. uniaxial crystals | 16 |
| b. biaxial crystals | 20 |
| 3. Dispersion staining | 21 |
| a. technique | 22 |
| b. applications of dispersion staining | 27 |
| III. Identification of Asbestos | 31 |
| A. Analytical Methods | 31 |
| B. Polarized Light Microscopy (PLM) | 33 |
| 1. Sampling | 34 |
| 2. Identification of Asbestos | 36 |
| a. chrysotile | 36 |
| b. amosite and crocidolite | 38 |
| c. other asbestiform minerals | 41 |
| d. interfering substances | 44 |
| e. asbestos substitutes | 44 |
| f. other possible nonfibrous constituents | 48 |
| IV. Quantitation | 56 |
| V. The Photomicrographic Atlas | 56 |
| A. Photomicrographic Procedure | 56 |
| B. Use of the Atlas | 57 |
| C. The Color Plates | 58 |
| VI. Conclusion | 64 |
| Color Plates | 67 |
| Appendices | |
| A. Kohler Illumination | 103 |
| B. Exposure Control in Photomicrography | 110 |
| C. Purchasing a Microscope | 114 |
| Bibliography | 120 |
| Index | 121 |
