

1	Introduction to Yeasts	1
	1.1 The World of Yeasts	1
	1.2 Importance of Yeasts to Mankind	5
	1.3 Yeast Physiology and Biotechnology	9
	1.4 References	9
2	Yeast Cytology	11
	2.1 Introduction	11
	2.2 General Cellular Characteristics of Yeasts	12
	2.3 Cytological Methods for Yeasts	13
	2.4 Yeast Cell Architecture and Function	17
	2.5 Summary	41
	2.6 References	42
3	Yeast Nutrition	51
	3.1 Introduction	51
	3.2 Yeast Nutritional Requirements	52
	3.3 Nutrient Acquisition by Yeasts	61
	3.4 Summary	91
	3.5 References	92
4	Yeast Growth	101
	4.1 Introduction	101
	4.2 Cellular Growth of Yeasts	102
	4.3 Population Growth of Yeasts	127
	4.4 The Physicochemical Environment and Yeast Growth	144
	4.5 Biotic Factors Influencing Yeast Growth	169
	4.6 Yeast Cell Death	175
	4.7 Summary	181
	4.8 References	183
5	Yeast Metabolism	203
	5.1 Introduction	203
	5.2 Carbon and Energy Metabolism	205
	5.3 Nitrogen Metabolism	241
	5.4 Phosphorus and Sulphur Metabolism	247
	5.5 Specialized Metabolism	254
	5.6 Summary	254
	5.7 References	255
6	Yeast Technology	265

6.1 Introduction	265
6.2 Applied Molecular Genetics of Yeasts	268
6.3 Developments in Yeast technologies	283
6.4 Yeasts in Biomedical Research	308
6.5 Summary	310
6.6 References	311
Index	321
