Contributors	xiii
Foreword	xv
Preface	xvii
<hr/>	
Part I Principles	1
1. Disease Processes in Foodborne Illness	3
<i>Steve L. Taylor</i>	
I. Classification of Disease Processes in Foodborne Illness	3
II. Structure and Function of the Digestive Tract	3
III. Infections	11
IV. Intoxications	18
V. Metabolic Food Disorders	22
VI. Allergy	23
VII. Idiosyncratic Illness	27
VIII. Summary	28
Bibliography	29
2. Epidemiology, Cost, and Risk of Foodborne Disease	31
<i>Jill A. Snowdon, Jean C. Buzby, and Tanya Roberts</i>	
I. Introduction	31
II. Epidemiology of Foodborne Disease	34
III. Measuring the Cost of Foodborne Disease	43
IV. Analyzing the Risk of Foodborne Disease	47
V. The Future of Foodborne Disease	49
Disclaimer	50
Bibliography	50
<hr/>	
Part II Infections	53
3. Salmonella	55
<i>Jeffrey T. Gray and Paula J. Fedorka-Cray</i>	
I. Overview	55
II. Characteristics of the Organism	56
III. Characteristics of the Disease	57
IV. Pathogenesis	59

	V. Virulence Factors of <i>Salmonella</i>	61
	VI. Transmission	62
	VII. Isolation and Identification	63
	VIII. <i>Salmonella</i> Surveillance	65
	IX. Treatment and Prevention	66
	X. Summary	67
	Bibliography	67
4.	<i>Shigella</i>	69
	<i>Keith A. Lampel and Anthony T. Maurelli</i>	
	I. Introduction	69
	II. Shigellosis	70
	III. Taxonomy and Characteristics of <i>Shigella</i>	71
	IV. Foodborne Transmission	73
	V. Treatment and Prevention	76
	VI. Summary	76
	Bibliography	77
5.	<i>Escherichia coli</i>	79
	<i>Pina M. Fratamico, James L. Smith, and Robert L. Buchanan</i>	
	I. Introduction	79
	II. General Characteristics of <i>Escherichia coli</i>	80
	III. Enteroinvasive <i>Escherichia coli</i>	81
	IV. Diffusely Adherent <i>Escherichia coli</i>	82
	V. Enteropathogenic <i>Escherichia coli</i>	82
	VI. Enterogaagregative <i>Escherichia coli</i>	84
	VII. Enterotoxigenic <i>Escherichia coli</i>	86
	VIII. Enterohemorrhagic <i>Escherichia coli</i>	90
	IX. Emerging Diarrheic <i>Escherichia coli</i> Groups	100
	Bibliography	100
6.	<i>Campylobacter jejuni</i> and Related Organisms	103
	<i>Sean F. Altekruze and David L. Swerdlow</i>	
	I. <i>Campylobacter jejuni</i>	103
	II. Organisms Related to <i>Campylobacter jejuni</i>	109
	III. Summary	112
	Bibliography	112
7.	<i>Yersinia enterocolitica</i>	113
	<i>Georg Kapperud</i>	
	I. Introduction	113
	II. Characteristics of the Disease	113
	III. Characteristics of the Organism	114
	IV. Transmission via Food	115
	V. Isolation and Identification	116
	VI. Control and Prevention	116
	VII. Summary	118
	Bibliography	118
8.	<i>Clostridium perfringens</i>	119
	<i>R. G. Labbe and V. K. Juneja</i>	
	I. Introduction	119
	II. Characteristics of the Disease	120

III. Characteristics of the Organism	121
IV. Transmission via Food	124
V. Isolation and Identification	124
VI. Treatment and Prevention	125
Bibliography	126
9. <i>Vibrio</i>	127
<i>Riichi Sakazaki</i>	
I. Introduction	127
II. <i>Vibrio cholerae</i>	127
III. <i>Vibrio parahaemolyticus</i>	131
IV. <i>Vibrio vulnificus</i>	134
V. Summary	135
Bibliography	135
10. <i>Listeria monocytogenes</i>	137
<i>Linda J. Harris</i>	
I. Introduction	137
II. <i>Listeria monocytogenes</i>	137
III. Listeriosis	140
IV. Foodborne Transmission of <i>Listeria monocytogenes</i>	142
V. Control in Foods	145
VI. Regulatory Control	146
VII. Isolation and Identification of <i>Listeria monocytogenes</i>	148
VIII. Summary	149
Bibliography	149
Suggested Web Sites	150
11. Infrequent Microbial Infections	151
<i>Dean O. Cliver</i>	
I. Scope	151
II. Bacteria Less Commonly Foodborne than Formerly	152
III. Bacteria Rarely Transmitted via Foods	153
IV. Bacteria not Conclusively Proved to be Pathogenic in 'Normal' People	154
V. Concept of Emerging Foodborne Pathogens	155
VI. Summary	158
Bibliography	158
12. Viruses	161
<i>Dean O. Cliver and Suzanne M. Matsui</i>	
I. Introduction	161
II. Hepatitis A and E Viruses	163
III. Norwalk-like Gastroenteritis Viruses	165
IV. Other Gastroenteritis Viruses	167
V. Other Viruses and Food	168
VI. Detection and Monitoring	170
VII. Prevention	173
VIII. Summary	174
Bibliography	174

13.	Parasites	177
	<i>J. P. Dubey, K. Darwin Murrell, and John H. Cross</i>	
	I. Introduction	177
	II. Meatborne Parasites	177
	III. Fishborne Parasites	183
	IV. Parasites Disseminated in Fecally Contaminated Food and Water	187
	V. Summary	190
	Bibliography	190
<hr/>		
	Part III Intoxications	191
14.	Natural toxicants	193
	<i>Steve L. Taylor and Susan L. Hefle</i>	
	I. Introduction	193
	II. Natural Sources of Toxicants in Foods	194
	III. The Preoccupation with Natural Foods	194
	IV. Intoxications from Naturally Occurring Toxicants	199
	V. Summary	209
	Bibliography	209
15.	Seafood Toxins	211
	<i>Eric A. Johnson and Edward J. Schantz</i>	
	I. Introduction	211
	II. Overview of the Causes of Seafood Intoxications	212
	III. Incidence and Economic Costs of Seafood Intoxications	213
	IV. Amnesic Shellfish Poisoning (Domoic Acid)	214
	V. Ciguatera Fish Poisoning	218
	VI. Diarrhetic Shellfish Poisoning	219
	VII. Neurotoxic Shellfish Poisoning	220
	VIII. Paralytic Shellfish Poisoning	220
	IX. Puffer Fish Poisoning	222
	X. <i>Pfiesteria</i> Toxins	223
	XI. Cyanobacterial Intoxications	224
	XII. Scombroid (Histamine) Fish Poisoning	225
	XIII. Other Finfish and Shellfish Toxins	227
	XIV. Treatment and Prevention of Seafood Intoxications	227
	XV. Safety Precautions for Handling Toxic Seafoods and Algae	228
	XVI. Conclusions and Perspectives	228
	Bibliography	229
16.	Staphylococcal Food Poisoning	231
	<i>Amy C. Lee Wong and Merlin S. Bergdoll</i>	
	I. Introduction	231
	II. Characteristics of the Disease	232
	III. Characteristics of the Organism	234
	IV. Transmission via Foods	241
	V. Isolation and Identification	243
	VI. Treatment and Prevention	247
	VII. Summary	248
	Bibliography	248

17.	Botulism	249
	<i>Nina Gritzai Parkinson and Keith Ito</i>	
	I. Introduction	249
	II. Characteristics of the Organism	249
	III. Characteristics of the Disease	251
	IV. Transmission via Food	251
	V. Isolation and Identification of the Organism and Its Toxin	253
	VI. Treatment and Prevention	255
	VII. Infant Botulism	258
	VIII. Therapeutic Applications	258
	IX. Summary	259
	Bibliography	259
18.	<i>Bacillus cereus</i> Food Poisoning	261
	<i>Mansel W. Griffiths and Heidi Schraft</i>	
	I. Introduction	261
	II. Characteristics of <i>Bacillus cereus</i> Food Poisoning	262
	III. Characteristics of the Organism	263
	IV. Pathogenesis	264
	V. Transmission via Food	267
	VI. Isolation and Identification	268
	VII. Treatment and Prevention	269
	VIII. Summary	270
	Bibliography	270
19.	Mycotoxins	271
	<i>Fun S. Chu</i>	
	I. Introduction	271
	II. Production of Mycotoxin by Toxicogenic Fungi	272
	III. Natural Occurrence and Toxic Effects of Selected Mycotoxins	273
	IV. Modes of Action of Mycotoxins	288
	V. Preventive Measures	295
	VI. Concluding Remarks	298
	Abbreviations	299
	Bibliography	301
20.	Chemical Intoxications	305
	<i>Steve L. Taylor</i>	
	I. Introduction	305
	II. Agricultural Chemical Residues	306
	III. Food Additives	310
	IV. Chemicals Migrating from Packing Materials	313
	V. Chemicals Produced During Processing, Storage, Preparation, and Handling of Foods	313
	VI. Inadvertent or Accidental Contaminants	314
	VII. Summary	316
	Bibliography	316
21.	Diet and Cancer	317
	<i>Elisabeth Garcia and Carl K. Winter</i>	
	I. Introduction	317
	II. Incidence of Major Cancers	318

III. Carcinogens in Food	320
IV. Nutritional Factors and Cancer	322
V. Dietary Protective Factors	325
VI. Conclusion	327
Bibliography	328
<hr/>	
Part IV Prevention	329
22. Microbiology of Food Preservation and Sanitation	331
<i>Maha N. Hajmeer and Dean O. Cliver</i>	
I. Introduction	331
II. Food Preservation – Why and How?	332
III. Sources of Foodborne Disease Agents	337
IV. Microbial Ecology of Foods	339
V. HACCP	342
VI. Predictive Microbiology	345
VII. Processing for Safety	349
VIII. Distribution and Preparation	349
IX. Inspection and Testing	350
X. Summary	351
Bibliography	352
23. Organizing a Safe Food Supply System	353
<i>Rhona S. Applebaum, Dane T. Bernard, and Virginia N. Scott</i>	
I. What is ‘Safe’?	353
II. Producers’ Role in Food Safety	355
III. Industry’s Role in Food Safety	356
IV. Government’s Role in Food Safety	360
V. The Role of Universities in Food Safety	369
VI. Consumers’ Role in Food Safety	369
VII. Summary	373
Bibliography	373
Internet URLs	373
Index	379
