About the Editors	xvii
Chapter 1 History of Sustainable Bio-based Polymers	1
<i>Tim A. Osswald and Sylvana García-Rodríguez</i>	
1.1 Background	1
1.2 Silk: From a Royal Stitch to a Wounded Peasant	4
1.3 Cellulose: The Quintessential Bio-based Plastic	7
1.4 Casein Plastics: From Food to Plastic	9
1.5 Soy Protein Plastic: Back to Nature	12
1.6 Building Scaffolds for Our Bodies: Collagen and Chitosan	15
1.7 Letting Bacteria Make Our Plastics	17
1.8 Conclusions	19
References	19
Chapter 2 Synthetic Green Polymers from Renewable Monomers	22
<i>Naozumi Teramoto</i>	
2.1 Introduction	22
2.2 Triglycerides of Fatty Acids and their Derivatives	24
2.2.1 Monomers from Triglycerides	24
2.2.2 Polymers Synthesized from Triglycerides	29
2.3 Essential Oils, Natural Phenolic Compounds and their Derivatives	34
2.3.1 Terpenoids	35
2.3.2 Phenylpropanoids	40
2.3.3 Lignin Digests or Extracts and Liquefied Wood	46
2.3.4 Other and Natural Phenolic Compounds	48

RSC Green Chemistry No. 12

A Handbook of Applied Biopolymer Technology: Synthesis, Degradation and Applications

Edited by Sanjay K. Sharma and Ackmez Mudhoo

© Royal Society of Chemistry 2011

Published by the Royal Society of Chemistry, www.rsc.org

2.4	Carbohydrates and their Derivatives	51
2.4.1	Polymers from Popular Carbohydrates	51
2.4.2	Furan Derivatives	54
2.5	Monomers Obtained by Fermentation	55
2.6	Conclusions and Outlook	60
	References	61
Chapter 3	Polyhydroxyalkanoates: The Emerging New Green Polymers of Choice	79
	<i>Ranjana Rai and Ipsita Roy</i>	
3.1	Introduction	79
3.2	History of Polyhydroxyalkanoates	80
3.3	Chemical Organization of PHAs	80
3.4	Occurrence and Biosynthesis of PHAs	81
3.5	Cheap Substrates for Cost-effective PHA Production	86
3.6	Physical Properties of PHAs	86
3.7	Biocompatibility of PHAs	88
3.8	Biodegradation of Polyhydroxyalkanoates	89
3.8.1	Factors Affecting Biodegradation	89
3.8.2	Biodegradation in the Environment	89
3.8.3	Biodegradation and Biocompatibility	90
3.9	Applications of Polyhydroxyalkanoates	90
3.9.1	Industrial Application	90
3.9.2	Medical Applications	91
3.10	PHAs as Green Biofuels	94
3.11	Market and Economics of PHAs	95
3.12	Concluding Remarks	97
	Acknowledgement	97
	References	97
Chapter 4	Fully Green Bionanocomposites	102
	<i>P. M. Visakh, Sabu Thomas and Laly A. Pothan</i>	
4.1	Green Composites – Introduction	102
4.2	Green Materials: Fibres, Whiskers, Crystals and Particles	103
4.2.1	Cellulose Fibres	103
4.2.2	Chitin Whiskers	105
4.2.3	Starch Crystals	107
4.2.4	Soy Protein Particles	110
4.2.5	Polylactic Acid	111
4.2.6	Natural Rubber Uncross-linked Particles	114
4.3	Green Nanocomposites	114
4.3.1	Cellulose-based Green Composites	114
4.3.2	Chitin and Chitosan-based Green Composites	116

4.3.3	Starch-based Green Composites	117
4.3.4	Soy Protein-based Green Composites	117
4.3.5	PLA-based Green Composites	118
4.4	Applications	121
4.5	Conclusion	122
	References	123
Chapter 5	Biopolymer-based Nanocomposites	129
	<i>Kikku Fukushima, Daniela Tabuani and Cristina Abbate</i>	
5.1	Introduction	129
5.2	Experimental	131
5.2.1	Materials and Methods	131
5.2.2	Biodegradation Conditions and Evaluation Methods	133
5.3	Results and Discussions	133
5.3.1	Characterization	133
5.3.2	Biodegradation	139
5.4	Conclusions	145
	Acknowledgements	146
	References	146
Chapter 6	Biodegradable Polyesters: Synthesis and Physical Properties	149
	<i>Jasna Djonlagic and Marija S. Nikolic</i>	
6.1	Introduction	149
6.2	Poly(α -hydroxy acid)s	153
6.2.1	Poly(glycolic acid)	153
6.2.2	Poly(lactic acid)	154
6.3	Poly(ϵ -caprolactone)	161
6.3.1	Synthesis of Poly(ϵ -caprolactone)	161
6.3.2	Properties and Degradation of Poly(ϵ -caprolactone)	164
6.4	Poly(hydroxyalkanoate)s	166
6.4.1	Synthesis of Poly(hydroxyalkanoate)s	166
6.4.2	Properties and Degradation of Poly(hydroxyalkanoate)s	171
6.5	Poly(alkylene dicarboxylate)s	174
6.5.1	Synthesis of Poly(alkylene dicarboxylate)s	174
6.5.2	Properties and Degradation of Poly(alkylene dicarboxylate)s	177
6.6	Application of Biodegradable Polyesters	181
6.6.1	Ecological Applications	181
6.6.2	Medical Applications	184
6.7	Future Trends in Biodegradable Polyesters	185
	References	185

Chapter 7	Synthesis and Characterization of Thermoplastic Agro-polymers	197
	<i>C. J. R. Verbeek and J. M. Bier</i>	
7.1	Introduction	197
	7.1.1 Polysaccharides	198
	7.1.2 Proteins	200
7.2	Synthesis	200
	7.2.1 General Considerations	201
	7.2.2 The Role of Additives	201
	7.2.3 Starch	202
	7.2.4 Proteins	204
7.3	Characterization	206
	7.3.1 Overview of Characterization	206
	7.3.2 Mechanical Behaviour	210
	7.3.3 Thermal Properties	218
7.4	Conclusions	236
	References	237
Chapter 8	Degradable Bioelastomers: Synthesis and Biodegradation	243
	<i>Q. Y. Liu, L. Q. Zhang and R. Shi</i>	
8.1	Character, Definition and Category of Degradable Bioelastomers	243
8.2	Requirements of Degradable Bioelastomers	245
	8.2.1 Safety	245
	8.2.2 Biodegradation	246
	8.2.3 Cross-linking	247
8.3	Synthesis and Biodegradation of Degradable Bioelastomers	247
	8.3.1 Degradable Segmented Polyurethane Bioelastomers	248
	8.3.2 Poly(ϵ -caprolactone) Related Bioelastomers	254
	8.3.3 Polylactide-related Bioelastomers	259
	8.3.4 Polycarbonate-related Bioelastomers	264
	8.3.5 Poly(glycerol sebacate) Bioelastomer and its Derivatives	267
	8.3.6 Citric Acid-related Polyester Bioelastomers	271
	8.3.7 Poly(ether ester) Bioelastomers	276
	8.3.8 Poly(ester amide) Bioelastomers	278
	8.3.9 Other Novel Degradable Bioelastomers	280
8.4	Conclusions	284
	Acknowledgements	284
	References	284

Chapter 9	Functionalization of Poly(L-lactide) and Applications of the Functionalized Poly(L-lactide)	291
	<i>Xiuli Hu and Xiabin Jing</i>	
9.1	Introduction	291
9.2	PLA Functionalization	293
9.2.1	Morpholine Diones	293
9.2.2	α -Amino acid <i>N</i> -Carboxyanhydride (NCA)	295
9.2.3	Cyclic Carbonates	297
9.2.4	Lactones	299
9.2.5	Cyclic Diesters	299
9.3	Applications of the Functionalized PLAs	299
9.3.1	Drug Delivery Systems	300
9.3.2	Artificial Oxygen Carriers	302
9.3.3	Protein Separation and Purification	304
9.4	Conclusions	305
	References	305
Chapter 10	Biodegradation of Poly (3-hydroxyalkanoates)	311
	<i>Rachana Bhatt, Kamlesh Patel and Ujjval Trivedi</i>	
10.1	Introduction	311
10.2	Degradation of Plastics	314
10.2.1	Abiotic Degradation	314
10.2.2	Biotic Degradation	314
10.2.3	Standard Methods for Plastic Biodegradation Studies	315
10.3	Biodegradation of Polyhydroxyalkanoates	316
10.3.1	Extracellular Degradation of PHA	316
10.3.2	Intracellular Degradation of PHA	325
10.4	Conclusions	327
	References	327
Chapter 11	Degradation of Biodegradable and Green Polymers in the Composting Environment	332
	<i>Ackmez Mudhoo, Romeela Mohee, Geeta D. Unmar and Sanjay K. Sharma</i>	
11.1	Introduction	332
11.1.1	Biodegradable Polymers	333
11.1.2	Degradability through Composting	333
11.2	Degradation of Biodegradable Polymers	334
11.2.1	Polymer Biodegradation Mechanisms	334
11.2.2	Assessment of Biodegradable Polymers Degradability	336
11.2.3	Biodegradable Polymers Blends	338

11.3	Composting Process Essentials	339
11.3.1	Composting Chemistry	339
11.3.2	Physical Parameters in Composting	344
11.3.3	Composting Systems	345
11.3.4	Vermicomposting	345
11.4	Biopolymer Degradation and Composting	345
11.4.1	Polyhydroxyalkanoates	346
11.4.2	Poly(lactic acid)-based Polymers	348
11.4.3	Polyethylenes	350
11.4.4	Poly- ϵ -caprolactones	355
11.5	Concluding Remarks	357
	Acknowledgements	358
	References	358

Chapter 12 Biodegradable Polymers: Research and Applications **365**

*X. W. Wei, G. Guo, C. Y. Gong, M. L. Gou and
Zhi Yong Qian*

12.1	Introduction	365
12.1.1	Biodegradable Polymers and the Environment	366
12.1.2	Biodegradable Polymers and Biomedical Uses	367
12.2	Natural Biodegradable Polymers and their Derivatives	368
12.2.1	Starch and Derivatives	368
12.2.2	Cellulose and Derivatives	369
12.2.3	Chitin and Chitosan	370
12.2.4	Alginic Acid	371
12.2.5	Collagen	372
12.2.6	Gelatin	373
12.2.7	Other Biodegradable Natural Polymers	373
12.3	Synthetic Polymers	374
12.3.1	Polyesters	374
12.3.2	Polyurethanes	379
12.3.3	Polyamides	380
12.3.4	Polyanhydrides	380
12.3.5	Polyphosphoesters	381
12.3.6	Others	382
12.4	Conclusions	383
	References	383

Chapter 13	Impacts of Biodegradable Polymers: Towards Biomedical Applications	388
	<i>Y. Omid and S. Davaran</i>	
13.1	Introduction	388
13.2	Classification of Biodegradable Polymers	390
13.3	Biodegradable Polyesters	391
13.3.1	Properties of PLA/PGA Polymers	392
13.3.2	Pharmaceutical Application of Biodegradable Polyesters	393
13.3.3	Impacts of Micro and Nano Fabrication of PLGA-based Copolymers	394
13.3.4	Biocompatible Magnetite-PLGA Composite Nanoparticles	399
13.3.5	PLGA-based Carriers for Macromolecule Delivery	400
13.3.6	Application of Polyester Polymers in Tissue Engineering	405
13.4	Functional Polymers: Cellular Toxicity	408
13.5	Genocompatibility and Toxicogenomics of Polymers	409
13.6	Final Remarks	413
	Acknowledgements	414
	References	414
Chapter 14	Biodegradable Injectable Systems for Bone Tissue Engineering	419
	<i>Richard T. Tran, Dipendra Gyawali, Parvathi Nair and Jian Yang</i>	
14.1	Introduction	419
14.2	Rationale and Requirements for Injectable Bone Tissue Engineering	421
14.2.1	Injectability and <i>In Situ</i> Cross-linking	422
14.2.2	Mechanical Properties	422
14.2.3	Porosity	423
14.2.4	Biodegradation	423
14.2.5	Cellular Behavior	424
14.2.6	Biocompatibility	425
14.3	Network Formation	425
14.3.1	Free Radical Polymerization (FRP)	426
14.3.2	Chemical Cross-linking Systems (CCS)	427
14.3.3	Thermally Induced Gelation Systems (TGS)	428
14.3.4	Self-assembly Systems (SAS)	428
14.3.5	Ion-mediated Gelation Systems (IGS)	429

14.4	Injectable Ceramics	429
14.5	Injectable Cell Vehicles	431
	14.5.1 Naturally Derived Hydrogels	432
	14.5.2 Synthetic-based Hydrogels	433
14.6	Injectable Drug Delivery Systems	434
	14.6.1 Antibiotic Delivery	435
	14.6.2 Growth Factor Delivery for Osteogenesis	436
14.7	Citric Acid-based Systems	439
14.8	Future Directions	441
14.9	Conclusions	441
	Acknowledgments	442
	References	442
Chapter 15	Production of Polyhydroxybutyrate (PHB) from Activated Sludge	452
	<i>M. Suresh Kumar and Tapan Chakrabarti</i>	
15.1	Introduction	452
15.2	Polymers	453
15.3	Storage Polymers in Microorganisms	454
	15.3.1 PHB Biosynthesis	454
	15.3.2 Enzymes Involved in Biosynthesis and Degradation	455
	15.3.3 Properties of PHB	456
	15.3.4 Potential Applications	457
	15.3.5 Biodegradation of PHB	458
15.4	PHB Production	458
	15.4.1 PHB Production with Pure Substrates	458
	15.4.2 PHB Production with Wastes	459
	15.4.3 PHB Production by Mixed Culture	460
15.5	Factors Affecting PHB Production	462
	15.5.1 Feast/Famine Conditions	462
	15.5.2 Microaerophilic Conditions	463
	15.5.3 Carbon/Nitrogen Limitation Conditions	464
	15.5.4 Phosphate Limitation Conditions	464
15.6	PHB Yields and Recovery Processes	465
15.7	Techno-economic Feasibility	467
15.8	Conclusions	468
	References	468
