Preface, xix

Part I Production and Bioactivity of Oligosaccharides

Part I.1 Naturally Occurring Oligosaccharides

1 Bioactivity of Human Milk Oligosaccharides, 5

Clemens Kunz, Sabine Kuntz, and Silvia Rudloff

- 1.1 Introduction, 5
- 1.2 Structural uniqueness of human milk oligosaccharides, 5
- 1.3 Human milk oligosaccharides and their functions in the gastrointestinal tract, 8
- 1.4 Human milk oligosaccharides and systemic effects, 15
- 1.5 Human milk oligosaccharides and studies in animals and humans, 15
- 1.6 Conclusion and perspective, 16
 - Acknowledgment, 17
 - References, 17

2 Production and Bioactivity of Bovine Milk Oligosaccharides, 21

David C. Dallas, Mickael Meyrand, and Daniela Barile

- 2.1 Introduction, 21
- 2.2 Bovine milk oligosaccharides' composition, 22
- 2.3 Bovine milk oligosaccharides' concentration, 27
- 2.4 Resistance to digestion, 27
- 2.5 Oligosaccharides' biological activities, 28
- 2.6 Isolation approaches, 30
- 2.7 Conclusion, 31
 - Acknowledgments, 31
 - References, 31

3 Production and Bioactivity of Oligosaccharides in Plant Foods, 35

Cristina Martínez-Villaluenga and Juana Frías

- 3.1 Introduction, 35
- 3.2 Chemical structure and natural occurrence of oligosaccharides in plant foods, 35
- 3.3 Production of naturally occurring plant oligosaccharides, 40
- 3.4 Scientific evidence on the bioefficacy of plant oligosaccharides and mechanisms of action, 43
- 3.5 Conclusions and future perspectives, 48
 - References, 48

4 Production and Bioactivity of Oligosaccharides from Chicory Roots, 55

Matthias Moser, Arnaud Agemans, and Wim Caers

- 4.1 Production of oligosaccharides from chicory roots, 55
- 4.2 Bioactivity of oligosaccharides from chicory roots, 60
- 4.3 Future trends, 68
- 4.4 Conclusions, 69
- References, 69

5 Production and Bioactivity of Pectic Oligosaccharides from Fruit and Vegetable Biomass, 76

Jesper Holck, Arland T. Hotchkiss, Jr., Anne S. Meyer, Jørn D. Mikkelsen, and Robert A. Rastall

- 5.1 Production of pectic oligosaccharides, 76
- 5.2 Bioactivity of pectic oligosaccharides, 79
- 5.3 Conclusions, 83
- References, 83

6 Production and Bioactivity of Oligosaccharides from Biomass Hemicelluloses, 88

Patricia Gullón, Beatriz Gullón, María Jesús González-Muñoz, José Luis Alonso, and Juan Carlos Parajó

- 6.1 Hemicelluloses: general aspects, 88
- 6.2 Manufacture of oligosaccharides from hemicellulosic polymers, 89
- 6.3 Properties of hemicellulose-derived oligosaccharides, 93
- 6.4 Conclusion, 99
- References, 99

7 Starch Hydrolysis Products with Physiological Activity in Humans, 107

Juscelino Tovar and Ana Rascón

- 7.1 Introduction, 107
- 7.2 Starch degradation may yield minor saccharides with physiological activity, 107
- 7.3 Physiological activity of starch hydrolysis products, 112
- 7.4 Concluding remarks, 115
- References, 115

8 Biosynthesis and Bioactivity of Exopolysaccharides Produced by Probiotic Bacteria, 118

Patricia Ruas-Madiedo

- 8.1 Bacterial exopolysaccharides, 118
- 8.2 Biosynthesis of exopolysaccharides in *Lactobacillus* and *Bifidobacterium*, 120
- 8.3 Production and purification of exopolysaccharides, 121
- 8.4 Bioactivity of exopolysaccharides from probiotics, 124
- 8.5 Concluding remark and future trends, 128
- Acknowledgments, 128
- References, 128

Part I.II Non-Naturally Occurring Oligosaccharides

9 Production and Bioactivity of Oligosaccharides Derived from Lactose, 137

Mar Villamiel, Antonia Montilla, Agustín Olano, and Nieves Corzo

- 9.1 Introduction, 137

-
- 9.2 Mono- and disaccharides, 137
 - 9.3 Lactosucrose, 145
 - 9.4 Galactooligosaccharides, 146
 - 9.5 Other oligosaccharides, 154
 - 9.6 Purification of carbohydrates derived from lactose, 156
 - 9.7 Conclusions, 157
 - Acknowledgments, 157
 - References, 157
- 10 Production and Bioactivity of Glucooligosaccharides and Glucosides Synthesized using Glucansucrases, 168**
Young-Min Kim, Hee-Kyoung Kang, Young-Hwan Moon, Thi Thanh Hanh Nguyen, Donal F. Day, and Doman Kim
- 10.1 Glucooligosaccharides from lactic acid bacteria, 168
 - 10.2 Glucan and glucooligosaccharides synthesis by glucansucrases, 169
 - 10.3 Production of glucooligosaccharides, 171
 - 10.4 Bioactivities of glucan and glucooligosaccharides, 174
 - 10.5 (Oligo)glucosides synthesized by glucansucrases and their functionalities, 177
 - 10.6 Conclusions, 178
 - Acknowledgments, 178
 - References, 178
- 11 Production and Bioactivity of Fructan-Type Oligosaccharides, 184**
Javier Arrizón, Judith E. Urias-Silvas, Georgina Sandoval, N. Alejandra Mancilla-Margalli, Anne C. Gschaedler, Sandrine Morel, and Pierre Monsan
- 11.1 Introduction, 184
 - 11.2 Enzymatic synthesis, 186
 - 11.3 Functional properties of fructan-type oligosaccharides, 193
 - 11.4 Conclusions, 196
 - Acknowledgments, 196
 - References, 196
- 12 Application of Immobilized Enzymes for the Synthesis of Bioactive Fructooligosaccharides, 200**
Francisco J. Plou, Lucia Fernandez-Arrojo, Paloma Santos-Moriano, and Antonio O. Ballesteros
- 12.1 Enzyme immobilization, 200
 - 12.2 Immobilized biocatalysts for the production of fructooligosaccharides, 202
 - 12.3 Production of fructooligosaccharides with a covalently immobilized fructosyltransferase, 204
 - 12.4 Production of fructooligosaccharides with alginate-entrapped fructosyltransferases, 207
 - 12.5 Conclusions and future trends, 212
 - Acknowledgments, 212
 - References, 213

Part I.III Assessment of Bioactivity

13 In Vitro Assessment of the Bioactivity of Food Oligosaccharides, 219

Koen Venema

- 13.1 Introduction, 219
- 13.2 Gut microbiota, 220
- 13.3 Interaction with the host, 221
- 13.4 *In vitro* fermentation models of the gut to study bioactivity of oligosaccharides, 221
- 13.5 Applications of *in vitro* fermentation models to study the effect of oligosaccharides on the gut microbiome, 226
- 13.6 Mechanistic studies using ¹³C-labeled oligosaccharides and fibers, 227
- 13.7 *In vitro* cell culture systems, 230
- 13.8 Conclusions, 231
- 13.9 Future perspectives, 231
- Acknowledgments, 233
- References, 233

14 In Vivo Assessment of the Bioactivity of Food Oligosaccharides, 238

Alfonso Clemente

- 14.1 The prebiotic concept, 238
- 14.2 *In vivo* assessment of dietary oligosaccharides as prebiotics, 240
- 14.3 Concluding remarks, 249
- Acknowledgments, 249
- References, 249

Part II Analysis

15 Fractionation of Food Bioactive Oligosaccharides, 257

F. Javier Moreno, Cipriano Carrero-Carralero, Oswaldo Hernández-Hernández, and M. Luz Sanz

- 15.1 Introduction, 257
- 15.2 Membrane techniques, 258
- 15.3 Chromatographic techniques, 267
- 15.4 Fractionation techniques using solvents, 272
- 15.5 Microbiological and enzymatic treatments, 275
- 15.6 Conclusions, 276
- Acknowledgments, 277
- References, 277

16 Classical Methods for Food Carbohydrate Analysis, 284

Qingbin Guo, Steve W. Cui, and Ji Kang

- 16.1 Introduction, 284
- 16.2 Sample preparation and purification, 284
- 16.3 Classical methods for total sugar analysis, 285
- 16.4 Classical methods for monosaccharide determination, 289
- 16.5 Classical methods for structure characterization of polysaccharides, 291
- 16.6 Some physical methods for carbohydrate analysis, 294

-
- 16.7 Classical methods for dietary fiber analysis, 294
- 16.8 Conclusions, 296
References, 297
- 17 Infrared Spectroscopic Analysis of Food Carbohydrates, 300**
Mikihito Kanou, Atsushi Hashimoto, and Takaharu Kameoka
- 17.1 Introduction, 300
- 17.2 Monosaccharides, 301
- 17.3 Oligosaccharides, 309
- 17.4 Applications, 312
- 17.5 Concluding remarks, 317
References, 318
- 18 Structural Analysis of Carbohydrates by Nuclear Magnetic Resonance Spectroscopy and Molecular Simulations: Application to Human Milk Oligosaccharides, 320**
Arnold Maliniak and Göran Widmalm
- 18.1 Introduction, 320
- 18.2 Nuclear magnetic resonance spectroscopy, 323
- 18.3 Molecular dynamics computer simulations, 335
- 18.4 Three-dimensional structures of human milk oligosaccharides, 336
- 18.5 Concluding remarks, 341
Acknowledgments, 341
References, 341
- 19 Analysis of Food Bioactive Oligosaccharides by Thin-Layer Chromatography, 350**
Katarína Reiffová
- 19.1 Introduction, 350
- 19.2 Thin-layer chromatography, 351
- 19.3 Thin-layer chromatography analysis of food bioactive oligosaccharides, 353
- 19.4 Conclusions, 366
References, 366
- 20 Gas Chromatographic Analysis of Food Bioactive Oligosaccharides, 370**
Ana Cristina Soria, Sonia Rodríguez-Sánchez, Jesús Sanz, and Isabel Martínez-Castro
- 20.1 Introduction, 370
- 20.2 Sample preparation, 371
- 20.3 Instrumentation, 382
- 20.4 Advanced analysis by comprehensive two-dimensional gas chromatography (GC×GC), 392
- 20.5 Conclusions, 392
Acknowledgments, 394
References, 394
- 21 Analysis of Bioactive Food-Sourced Oligosaccharides by High-Performance Liquid Chromatography, 399**
Jonathan A. Lane and Rita M. Hickey
- 21.1 Introduction, 399

- 21.2 Derivatization of oligosaccharides, 400
- 21.3 High-performance liquid chromatography analysis of bioactive food sourced oligosaccharides, 402
- 21.4 Application of high-performance liquid chromatography for the separation of bioactive food sourced oligosaccharides, 407
- 21.5 Novel analytical methods, 412
- 21.6 Conclusion, 414
 - Acknowledgments, 415
 - References, 415
- 22 Capillary Electrophoresis and Related Techniques for the Analysis of Bioactive Oligosaccharides, 421**
 - Yu-ki Matsuno, Kazuaki Kakehi, and Akihiko Kameyama*
 - 22.1 Introduction, 421
 - 22.2 Capillary electrophoresis analysis of functional oligosaccharides, 423
 - 22.3 Capillary electrophoresis analysis of glycosaminoglycan-derived oligosaccharides, 428
 - 22.4 Capillary electrophoresis analysis of oligosaccharides derived from glycoproteins, 431
 - 22.5 Conclusions, 434
 - References, 435
- 23 Mass Spectrometric Analysis of Food Bioactive Oligosaccharides, 439**
 - Oswaldo Hernández-Hernández and Peter Roepstorff*
 - 23.1 Introduction, 439
 - 23.2 Instrumentation for mass spectrometric analysis of oligosaccharides, 439
 - 23.3 Fragmentation techniques, processes and nomenclature, 442
 - 23.4 Applications to analysis of food bioactive oligosaccharides, 445
 - 23.5 Strategies, challenges, and conclusion, 450
 - References, 450
- Part III Prebiotics in Food Formulation**
- 24 Nutritional and Technological Benefits of Inulin-Type Oligosaccharides, 457**
 - Matthias Moser and Rudy Wouters*
 - 24.1 Introduction, 457
 - 24.2 Nutritional aspects of chicory inulin and oligofructose, 457
 - 24.3 Technical properties of chicory inulin and oligofructose, 458
 - 24.4 Technical functionality in food applications, 461
 - 24.5 Conclusions, 468
 - References, 468
- 25 Industrial Applications of Galactooligosaccharides, 470**
 - Ellen van Leusen, Erik Topping, Paul Groenink, Pieter Kortleve, Renske Geene, Margriet Schoterman, and Bert Klarenbeek*
 - 25.1 Introduction, 470
 - 25.2 Global market development for galactooligosaccharides, 470
 - 25.3 Nutritional benefits of galactooligosaccharides for infants and young children, 473

-
- 25.4 Legislative aspects and safety of galactooligosaccharides, 477
 - 25.5 Galactooligosaccharide products, 479
 - 25.6 Applications of galactooligosaccharides, 483
 - 25.7 Stability of galactooligosaccharides, 485
 - 25.8 Concluding remarks and future developments, 487
References, 487
- 26 Successful Product Launch: Combining Industrial Technologies with Adapted Health Ingredients, 492**
- Pascal Ronfard*
- 26.1 Developing new foods: the health dimension, 492
 - 26.2 A global approach to successful food conception, applied to the case of digestive health, 493
 - 26.3 The ingredients and the formulation: practical aspects of the incorporation of nondigestible oligosaccharides, 503
 - 26.4 Elaborating new food products with nondigestible oligosaccharides, 507
 - 26.5 What are the key success factors? Synthesis and comments from an expert chef, 518
 - 26.6 Conclusion, 520
References, 520
- Epilogue: Concluding Thoughts on Food Bioactive Oligosaccharides, 523**
- Index, 527**
