FOREWORD	9
ACKNOWLEDGEMENTS	13
INTRODUCTION	15
CHAPTER 1. GENERAL INTRODUCTION TO THE TETRACYCLIC TRITERPENES	17
Nomenclature and Formulae	18
Natural occurrence and Isolation	20
CHAPTER 2. REACTIONS OF TETRACYCLIC TRITERPENES.	24
Stereochemistry of the tetracyclic triterpenes	24
1. REACTIONS OF RING A	28
Interconversions of hydroxyl and keto functions at C-3	31
Bromination of C-3 ketones and reactions of the bromoketones	34
Preparation of 2-alkylidene and 2-arylidene derivatives of C-3 ketones	36
Dehydration involving the C-3 hydroxyl group	36
Other methods for the contraction of ring A (fig. 2).	38
4-Methyl steroids.	39
Cleavage of ring A between C-3 and C-4.	41
Ring A in limonin and related substances	42
Ring A of the cucurbitacins.	43
" Elimination " of the C-4 gem-dimethyl grouping	44
2. REACTIONS OF RINGS B AND C	46
Isomerizations of the double bond.	47
Reactions of the cyclopropane ring (<i>cf.</i> de Mayo, 1958)	51
Reactions involving oxidation in rings B or C.	53
Onocerin series.	53
Limonin series	54
Other series	56
Selective dehydrogenations.	57
Oxidation of 8-enes and 7,9(11)-dienes	59
Reduction of the various oxidation products	60
Additional reactions of the oxidation products of rings B and C	64
Oxidation reactions of Δ^7 -enes.	69
Oxidation of polyporenic acid A.	71
Rings B and C in the cucurbitacins	71
3. REACTIONS OF RING D	74
The limonin series	75
Reactions of the " iso " derivatives	76
Reactions of the 17-keto derivatives	78

4. REACTIONS INVOLVING THE SIDE-CHAIN	81
Degradation of the side-chain	83
Systematic degradations	83
Interconversions. The iso-octenyl side-chains	89
Correlations. Side-chains of more complex structure.	92
Some additional side-chain reactions. Isomerizations.	94
Reactions involving a carboxyl group in the side-chain	97
Side-chain degradations under drastic conditions.	100
5. REACTIONS INVOLVING THE ENTIRE RING SYSTEM	102
Dhydrogenation	102
Mass spectra (<i>cf.</i> Beynon, 1961; Biemann, 1963).	104
Spectral measurements	105
CHAPTER 3. SYNTHESSES OF TETRACYCLIC TRITERPENES	107
Synthesis of lanosterol	107
Synthesis of onocerin.	109
CHAPTER 4. SOME ASPECTS OF TETRACYCLIC TRITERPENE BIO- CHEMISTRY	115
I. BIOGENESIS OF THE TETRACYCLIC TRITERPENES	115
Formation of isopentenol	117
Biogenesis of squalene.	119
Modifications of squalene	120
The dammarane series	121
The tirucallane and euphane series.	122
The lanostane series	122
The cucurbitacin series	123
The onocerin series.	124
The C ₃₁ and C ₃₂ triterpenes	124
2. CATABOLISM OF THE TETRACYCLIC TRITERPENES	125
3. NATURAL OCCURENCE OF THE TETRACYCLIC TRITERPENES. TAXONOMIC IMPLICATIONS.	128
4. PHYSIOLOGICAL ACTIVITY OF TETRACYCLIC TRITERPENES	129
CATALOGUE	131
I. TETRACYCLIC TRITERPENES	133
Lanostane group	134
Euphane and tirucallane group	153
Dammarane group	161
Onocerane group	167
Limonin group.	168
Cucurbitacin group	173
Triterpenes of incompletely proved structure	177
II. ULTRAVIOLET AND INFRARED SPECTRA, ROTATORY DATA.	181
Isolated carbonyl groups	182
Conjugated dienes	188
α,β -Unsaturated ketones	189
Dienones, Trienones.	192
Diketones, Polyketones	193
Enediones, Polyenepolyones	195
Aromatic chromophores.	197
BIBLIOGRAPHY	199
AUTHOR INDEX.	215
SUBJECT INDEX.	223
