CHAPTER I
The Logical Basis of Statistical Inference **1**

CHAPTER 2
Quantitative Data **34**

CHAPTER 3
Enumeration Data **93**

CHAPTER 4
Correlation **129**

Tables
1. Random Digits 234
2. Squares of Numbers 235
3. Four-place Logarithms 239
4. Areas of the Normal Curve 241
5. Critical Values of *t* 242
6. Factors (*K*) for One-sided Tolerance Limits 243
7. Critical Values of the Variance Ratio, *F* 244
8. Factors (*k*)* for the Studentized Range 248
9. Critical values of X^2 250
10. Critical Numbers of Items in the Smaller Binomial Category 251
11. Binomial Confidence Limits 252
12. Values of the Exponential Function, $e^{-\lambda}$ 254
13. Confidence Limits for the Poisson Expectation 256
14. Significance of an Observed Difference Between two Poisson Variables 257
15. Critical Values of *U* in the Two-sample Rank Test 258
16. Critical Values of the Smaller Sum (*T*) in the Signed –ranks Test 262
17. Conversion of Percents to Probits 263
18. Working Probits and Weighting Coefficients 263

Index **267**
