

## CONTENT

	<b>Page</b>
1. Introduction	1
2. The Relationship of Probability to Randomization	6
3. Random Sampling and the Description of Data	18
4. The Normal Distribution Curve	27
5. Samples and the Universe of Discourse	42
6. The Null Hypothesis and Comparison of Means	52
7. Graphs and Equations (Regression)	62
8. Correlation	79
9. Enumeration Statistics	89
10. The Chi-Square Distribution	110
11. The $F$ -Test and the Analysis of Variance	125
12. Tolerance Limits and Indices of Discrimination	151
13. Quality Control	162
14. Testing Alternatives to the Null Hypothesis	171
15. Elements of Sequential Analysis	185
16. Distribution-Free Methods (nonparametric Statistics)	203
