

CONTENTS

	Page
SECTION I	
AN ILLUSTRATION OF ENVIRONMENTAL COMPLEXITIES	
1. Mercury in the Aquatic Ecosystem	3
SECTION II	
USES OF BIOASSAY, GENERAL PRINCIPLES EMPHASIZED	
2. Concepts and Outlook in Testing the Toxicity of Substances to Fish	73
3. Chemistry and Fish Toxicology	97
4. Recent Developments in the Use of Laboratory Bioassays to Determine "Safe" Levels of Toxicants for Fish	107
SECTION III	
EXAMPLES OF END POINTS AND INDICATORS USED IN BIOASSAY	
5. Recent Developments in the Measurement of the Response of Plankton and Periphyton to Changes in Their Environment	119
6. Diatoms as Bioassay Organisms	139
7. Algal Bioassays for Estimating the Effect of Added Materials Upon the Planktonic Algae in Surface Waters	153
8. Plant Content of Elements as a Bioassay of Nutrient Availability in Lakes and Steams	159
9. The Importance of Chemical Signals in Effects of Altered Environmental Chemistry on Animal communication	177
10. Analysis of Toxic Responses in Marine Poikilotherms	199
11. Chemical Toxicity Studies with Cultured Mammalian Cells	217
12. Electrophysiological Responses of Trout to Dissolved Oxygen and Cyanide	231
SECTION IV	
CONDITIONS AND SUPPORTING TECHNIQUES FOR BIOASSAY	
13. The Significance of Physicochemical Variables in Aquatic Bioassays of Heavy Metals	259
14. Determination of Trace Elements in Water and Aquatic Biota by Neutron Activation Analysis	277
15. Continuous Flow Nutrient Bioassays with Natural Phytoplankton Populations	299
16. The Effect of Citrate on Phytoplankton in Lake Ontario	321
17. A Description of Bioassay Flow-Through Techniques, and the Use of Bioassay to Measure the Effects of Low Oxygen at the Whole-Animal and the Molecular Level	335
18. Descriptions of a Continuous-Flow Bioassay Laboratory Trailer and the Michigan Diluter	345
19. The Use of Fish bioassays to Determine the Rate of Deactivation of Pesticides	358
20. Determination of Trace Quantities of Anticholinesterase Pesticides in Air and Water	367
21. The Relationship Between Continuous Biological Monitoring and Water Quality Standards for Chronic Exposure	383
22. Environmental Testing of Trisodium Nitrotriacetate: Bioassays for Aquatic Safety and Algal Stimulation	403
23. The Measurement of Phosphorus Metabolism in Natural Populations of Microorganisms	425
24. Nutrient Availability and Algal Production	433
25. Response of Plankton and Periphyton Diatoms in Lake George (N.Y.) to the Input of Nitrogen and Phosphorus	441
26. Zooplankton Reproduction and Water Blooms	467
27. Effect of Wastewater Organic Fractions on the Growth of Selected Algae	479
INDEX	497
