

CONTENTS

1.	Introduction and Brief Theory	1
2.	Near-Infrared Spectroscopy	25
3.	Sampling Methods	41
4.	Quantitative Analysis	80
5.	Hydrogen Bonding	84
6.	Carbohydrates	100
7.	Lipids	142
8.	Amides	165
9.	Amino Acids, Related Compounds, and Peptides	173
10.	Proteins and Polypeptides	188
11.	Hydrogen-Deuterium Exchange	232
12.	Nucleic Acids and Related Compounds	271
13.	Steroids	315
14.	Porphyrins and Related Compounds	350
15.	Enzymology	364
16.	Drugs, Pharmaceuticals, and Pharmacological Applications	390
17.	Microbiology	418
18.	Applications in Medicine and Related Fields	440
19.	Special Topics of Interest in Biochemistry and Related Fields	468
20.	Information Sources Concerning Infrared Spectroscopy and Spectra	536
APPENDIXS		
1.	Fractionation Methods Before the Use of Infrared Spectroscopy	544
2.	Conversion Table-Wave Numbers and Wavelength	560
General, Index		563
Chemical Compound Index		591
