

## CONTENT

1. Introduction	1
1.1 The Beginning	2
1.2 Essential Developments for CNMR	2
1.3 CNMR in the Solid State: Cross-Polarization and Magic-Angle Spinning	3
1.4 Heteronuclear Polarization Transfer	4
References	4
2. Methodology and Applications of Heteronuclear and Multidimensional <sup>13</sup> C NMR to the Elucidation of Molecular Structure and Dynamics in the Liquid State	7
2.1 Introduction	7
2.2 General Considerations	8
2.3 Heteronuclear Coherence Transfer	13
2.4 Multidimensional Correlation Experiments	19
2.5 Determination of <sup>13</sup> C Relaxation Times	51
2.6 Heteronuclear Coupling Constants	54
2.7 Concluding Remarks	61
References	61
3. Measurement of Internuclear Distances in Biological Solids by Magic-Angle Spinning <sup>13</sup> C NMR	65
3.1 Introduction	65
3.2 Measuring Distances between Isolated Heteronuclear Spin Pairs by MAS NMR	69
3.3 <sup>13</sup> C- <sup>13</sup> C Distances by MAS NMR	95
3.4 Concluding Remarks	112
References	113
4. <sup>13</sup> C NMR Studies of the Interactions of Fatty Acids with Phospholipid Bilayers, Plasma Lipoproteins, and Proteins	117
4.1 Introduction	117
4.2 Properties of Fatty Acids	118
4.3 Interactions of Fatty Acids with Serum Albumin	119
4.4 Binding of Medium-Chain Fatty Acids to Human Serum Albumin	132
4.5 Binding of Fatty Acids to Human Serum Lipoproteins	134
4.6 Binding of Fatty Acids to Cytosolic Fatty Acid Binding Proteins	138
4.7 Binding of Fatty Acids to Model Membranes	139
4.8 Exchange of Fatty Acids between Albumin and Model Membranes	143
4.9 Exchange of Fatty Acids among Proteins, Model Membranes, and Lipoproteins	151
4.10 Concluding Remarks	154
References	155

5. Application of <sup>13</sup> C NMR Spectroscopy to Metabolic Studies on Animals	159
5.1 Introduction	159
5.2 <sup>13</sup> C MRS and the Concepts of <sup>13</sup> C Labeling	161
5.3 <sup>13</sup> C MRS, <sup>13</sup> C Labeling, and Models of Intermediary Metabolism	168
5.4 Experimental Considerations	176
5.5 Metabolism in the Liver	186
5.6 Metabolism in the Heart	214
5.7 Metabolism in the Brain	226
5.8 Metabolism in the Ocular Lens	241
5.9 Metabolism in the Kidneys	244
5.10 Metabolism in the Skeletal Muscles	250
5.11 Metabolism in Parasites	251
5.12 Metabolism in Tumors	257
5.13 Concluding Remarks	260
6. <sup>13</sup> C Magnetic Resonance Spectroscopy as a Noninvasive Tool for Metabolic Studies on Humans	269
6.1 Introduction	269
6.2 Coils	271
6.3 Decoupling	272
6.4 Schemes for the Acquisition and Enhancement of <sup>13</sup> C Signals and for <sup>13</sup> C Editing	273
6.5 Spatially Localized <sup>13</sup> C Spectroscopy	276
6.6 Absolute Quantification of Metabolites	288
6.7 In Vivo Metabolic Studies with <sup>13</sup> C MRS	289
6.8 Noninvasive Determination of the Degree of Unsaturation of Fatty Acids From Adipose Tissue	304
6.9 Body Fluids and Isolated Tissues	305
6.10 Diseased States	307
6.11 Concluding Remarks	316
References	318
Index	323
