

CONTENT

Chapter 1 INTRODUCTION	1
Chapter 2 BLOCK ELECTROPHORESIS	6
1. Apparatus	7
2. Buffers	10
3. Preparation of the supporting medium	13
4. Electrode vessels	18
5. Safety system	20
6. Insertion of the sample	21
7. Electrophoretic run	23
8. Influence of electro-osmosis	29
9. Influence of temperature	32
10. Location of substance	34
11. Cutting	35
12. Elution	37
13. Estimations	41
14. Applications	42
Chapter 3 GEL ELECTROPHORESIS	55
1. Apparatus	56
2. Electrodes	60
3. Preparation of the supporting medium	61
4. Insertion of the sample	66
5. Electrophoretic run	71
6. Influence of temperature	71
7. Location of substance	73
8. Elution from starch gel	78
9. Quantitative evaluation of starch gel strips	81
10. Photography of stained gels	86
11. Applications	87
Chapter 4 CONTINUOUS ELECTROPHORESIS	102
1. Apparatus	104
2. Electrodes	105
3. Regulation of buffer flow	107
4. Automatic regulation of bath current	108
5. Preparation of packing material	115
6. Electrophoretic run	115

7. Applications	118
Chapter 5 COLUMN ELECTROPHORESIS	120
1. Apparatus	120
2. Electrodes	132
3. Preparation of the supporting medium	132
4. Introduction of the sample	134
5. Electrophoretic run	134
6. Influence of temperature	135
7. Influence of elector-osmosis	144
8. Elution and automatic analysis	144
9. Application	149
Chapter 6 COLUMN ELE CTROPHORESIS IN DENSITY GRADIENTS	159
1. The density gradient	160
2. Apparatus	163
3. Medium and buffers	164
4. Filling, according to Svensson et al	165
5. Insertion of the sample	166
6. Collecting of fractions	166
7. Modified procedures	166
8. Felling procedure after Colehour	167
9. Ethanol gradients	168
10. The improved procedure of Svensson and Valmet	168
11. The method of Berg and Beeler	169
12. The method of Kolin	171
13. The apparatus of Choules and Ballentine	173
14. Filling procedure	186
15. "Cutting "	176
16. Elect5rophoresis	178
17. Applications	178
Chapter 7 CONCLUDIGN REMARKS	184
References	187
Author index	201
Subject index	215
