

CONTENT

Chapter 1	Bufers	1
Chapter 2	Methods for Protein Determination (with Introductory Remarks Concerning Photometry in General)	14
Chapter 3	Properties and preparation of Yeast Alcohol Dehydrogenase	22
Chapter 4	The Isolation of Rabbit Muscle Aldolase	35
Chapter 5	Sephadex and Gel Filtration	40
Chapter 6	Criteria of Protein Purity	43
Chapter 7	Protein Structure: Aldolase	54
Chapter 8	Some Theoretical Considerations Involved in Isotope Work	69
Chapter 9	Radioisotopes in Biochemical Research	72
Chapter 10	Carbohydrates	88
Chapter 11	Glass Blowing	109
Chapter 12	Oxidative Phosphorylation	111
Chapter 13	Bacterial Genetics	122
Appendix A	Conversion Tables and Tables of Constants	135
Appendix B	Setting Up the Laboratory: Equipment, Materials, Solution Making	144
Index		165
