1. Phosphoproteins as Mediators of Biomineralization	1
1. Macromolecule—Crystal Recognition in Biomineralization: Studies Using Synthetic Polycarboxylate Analog	13
3. Crystal Engineering of Inorganic Materials at Organized Organic Surfaces	28
4. Role of Membranes in De Novo Calcification	42
5. Inhibition of Calcium Carbonate and Phosphate Crystallization by Peptides Enriched in Aspartic Acid and Phosphoserine	50
6. CaCO ₃ . Crystal-Binding Properties of Peptides and Their Influence on Crystal Growth	72
7. Structural Relationship of Amelogenin Proteins to Their Regulatory Function of Enamel Mineralization	85
8. Purification and Characterization of a Shell Matrix Phosphoprotein from the American Oyster	107
9. Invertebrate Calcium Concretions: Novel Biomineralization Systems	125
10. Mineral Regulating Proteins from Fossil Planktonic Foraminifera	139
11. Phosphorylated and Nonphosphorylated Carboxylic Acids: Influence of Group Substitutions and Comparison of Compounds to Phosphocitrate with Respect to Inhibition of Calcium Salt Crystallization	149
12. Synthesis of <i>O</i> -Phosphoserine-Containing Peptides by Solution and Solid-Phase Methods	161
13. Factors Contributing to Dental Calculus Formation and Prevention	177
14. Commercial Production of Bovine Somatotropin in <i>Escherichia coli</i>	186
15. Synthesis, Biological Activity, and Conformation of Cyclic Growth Hormone Releasing Factor Analogs	201
16. Tumor-Secreted Protein Associated with Human Hypercalcemia of Malignancy: Biology and Molecular Biology	212
17. Lytic Peptides from the Skin Secretions of <i>Xenopus Laevis</i> : A Personal Perspective	222
18. Peptide Antibiotics from the Animal Kingdom: Cecropins and Synthetic Analogs	237
19. Inhibition of Ice Crystal Growth by Fish Antifreezes	249
20. Marine Metal Chelating Proteins	256
21. Corrosion Inhibition by Thermal Polyaspartate	263
22. Mechanistic Insights Concerning the Role of Polymers as Scale Inhibitors and Dispersants in Cooling Water Systems	280
23. Macromolecular Assemblages in Controlled Biomineralization	316
24. Some Structural and Functional Properties of a Possible Organic Matrix from the Frustules of the Freshwater Diatom <i>Cyclotella meneghiniana</i>	340
25. Silica Inhibition in Cooling Water Systems	354
